Science is donig wonders these days in medicine as well as in mechanics. Since Adam lived, the human race has been troubled with dandruff, for which no hair preparation has heretofore proved a sucsful cure until Newbro's Herpicide was put on the market. It is a scientific preparation that kills the germ that makes dandruff or scurf by digging into the scalp to get at the root of the hair, where it saps the vitality; causing itching scalp, falling hair, and finally baldness. CHAPTER XX.

T was 4 o'clock when George left Bawdsey. The two had spoken little of the newspaper paragraph which informed them of Lola's escapade. Although her name was not mentioned there was no doubt in the mind of Brendon that she was the culprit. The newspaper gave the year of the book when the sheet was torn, and that corresponded to the year when Percy Vane married-or had been supposed to marry-Rosina Lockwood. And this was the explanation of Lola's absence from town. She had not fled from the rebuke of Brendon, but had gone to do him an injury by destroying the evidence of his parents' marriage. This finally was the meaning of her wild threat to Dorothy. Bawdsey was much upset over the

news. He would have fled immediately to Wargrove, but some special business kept him in town. However, he purposed to go the next morning by the first train. But George was going that very day. Lola could not have known that his parents had been married at Wargrove without having seen Mrs. Jersey's confession wherein the fact was probably mentioned. Therefore she must have obtained the confession in some way. How she achieved this, George could not conjecture. Then he thought of Lola's hot Spanish blood, of the stiletto-a peculiarly foreign weapon-and shuddered. It oc-

have stabbed the woman. He found that a train left Liverpool street station for Southend at ten minutes past 5 and that Wargrove was a tiny rural town which could be reached in an hour. Ever quick and expeditious in his movements, at the appointed time he was on his way down the country.

It was a dull journey. It seemed that the new town of Wargrove was the place where the train stopped, but old Wargrove was three miles distant, and it was there that the parish church was situated. As it proved, there was no necessity

stopping in the ponceman's house prior to her removal to the prison at Chelmsford. Her attempt at robbery had been committed on the previous day, and Brendon thought she would have already been removed. However, he was informed that there was some delay owing to the illness of the Chelmsford inspector, and therefore Lola would have to remain in Wargrove for another twelve hours. Brendon was glad to hear this, as it would save him a long journey. He thanked was directed by the man to the house raged." of his superior officer, which was on the outskirts of the town. George soon found a semi-detached house with door explained his errand to a brisk little woman. She pursed up her lips, looked inquisitively at him with bright eyes and called her husband. George produced a sovereign, but the official, although his eyes twinkled, hesitated to take the bribe. It was then that Mrs. Policeman came to Brendon's as-

sistance. "Nonsense, Jeremiah," she said briskly. "Let the young gentleman see his young lady. She's dying to have a sight of him.'

"It's all very well," grumbled Jeremiah. "But 'tis against the law." "You can be present at our interview

If you like." "There, Jeremiah, you can't have the gentleman saying fairer than that." Here the sharp little woman nudged curred to him that Lola herself must her husband's arms. This was a hint for him to swallow his scruples and take the sovereign. Jeremiah agreed, and shortly the sovereign was in his pocket and he was leading George to a back upstairs room.

Before introducing George to this abode it struck Jeremiah that the prisoner had been inquired for as "the young lady." He stopped Brendon at the door. "Might you know her name, sir?"

"She is the most celebrated dancer in London, and her name is Lola Velez," said George. "I don't suppose she'll be punished much for this. She's mad

She had-china blue eyes and light brown hair, she was neatly and simply dressed, and she looked so very young that I experienced relief when she mentioned that she was twenty-one.

It appeared that Mr. and Mrs. Merrill had recently arrived in Glenning and that both expected to obtain work in the enormous watch factory which is sometimes called the "mainspring" of our little city's life. At present they no!" with far too great alacrity. were living in one of the big boarding

"I was crossing the street," said she, "in front of the opera house on Tuesday evening after the performance, and a trolley man rang his gong and frightthe way of a horse. One of the shafts struck me on the head."

At this moment the beli of the clock on my mantel chimed once for half if he had been connected with the machinery. "I shall have to go," said he in a

strained and nervous voice. I looked at him and saw that his forehead was dripping.

"You'll come back for me?" said she. "It will be very dark to go home alone." "Of course I'll come back," he replied; "in about half an hour, doctor."

"Yes," said I, "in half an hour." And he hurried out of the room without a word of good cheer or even a glance of affection. The look he gave her was all coward or had he some private source fear, and the instant that the door of terror? closed behind him she buried her face

in her hands. When she raised her head, however, she was perfectly calm. "You're the surgeon at the Ogden hospital, aren't you?" said she. "You can send me there and tell me how to hire a private room-not a very expensive one, because we haven't much money."

"You can get a nice room for \$10 a week," said I, "but I hope you won't have to go." "Oh, yes, I shall," she replied. "And

I may not come away again-everalive, I mean." And she looked up at me with a brave smile.

I summoned my nurse and proceeded to examine the patient's injury. She had worn a cloak with a hood, and this had covered the wound, which was almost precisely in the middle of the top of her head. It had received medical attention, but not of the best, as I much worse tomorrow, as I'm afraid "No; she had 'em taken to an express thought.

My patient seemed singularly free from resentment, and if this reckless jehu had been her brother or her husband and on trial for hurting somebody else she could not have been more forpeople will exercise at least a rudigetful of the circumstances.

Meanwhile I had caused a carriage to be called, and presently I put my patient into it.

The next day I performed what my experience taught me might be only the first of a series of operations, perhaps three, of which the last would mean life or death. The immediate results, however, seemed to be very favorable, stand aside and let her pass before him and I was pleased professionally and otherwise.

This thought suggested Mr. Merrill, for it was to him that I must send her, and I had taken a great dislike to him. In fact, I had already begun to distrust him and to entertain vague suspicions. By arrangement he called at the hos-

FRIDAY CLUB

Entertain the Gentlemen and Other Guests.

Gentlemen's night of the Friday club was observed last evening at the home of Mr. and Mrs. Emery L. Crane, Whitney road. Most of the members were present with a man guest. Among the honorary members were: Mrs. Lewis Bass, and as her guest her son, Lewis Bass, Jr.; Mrs. Adelaide Claflin, and son, Alan Claffin; Mrs. Howard Barnes, and daughter, Miss Helen Barnes; Miss Elizabeth Hubbard, and Mr. Lawrence Loring; and Miss Elizabeth Souther, and Mr. Allen.

Mrs. George G. Saville, president of the club, welcomed the guests.

A program of early English music was given interspersed with original poems, papers, etc.

The musical program was: Song, Hearts of Oak, Mrs. Henry M.

Difficult Work by School Chorus.

Orchestra of Wonderful Ability.

Numbers of Great Instrumental

The annual concert of the pupils of the Quincy High school, last evening, was one of great excellence. Nothing appeared to be too difficult either for the chorus or the orchestra, composed entirely of pupils at the school. All the eighteen numbers on the program were excellent, and were heartily applauded by the large, and enthusiastic audience, which completely filled the

Last year the work of the High school orchestra came as a surprise, but this year it was even better, and delighted the friends of the school. The orchestra is composed as follows:

First violins. - Beatrice Cashman, Carl Gram, Ernest Merrill and New

Second Violins, -Clifford Farrington, William Charles Pratt, Bertha Reed, Ethel Smith, Francis Sweeney and George Weston.

Flutes, -Osborne Sterns and Lucien Thayer. Cornet,-Chester Brown and James

Costello. Piano-William Weston

It will be seen by the selection that there was a great variety, including "Asmodens," by T. H. Rollinson 'The Last Hope," by Gottschalk, 'The Cavalier," by T. H. Rollinson, "The Hunters Joy," by R. Gruenwald, and the "Slavenic Dance," by G. Sarakowski

In the chorus were about half the pupils of the school. Had all the pupils participated there would not have an opportunity for an audience to get into the hall. These selections

Service for Men.

Instead of the monthly social and talk of the Men's club of Christ church there will be a Lenten service in the church on Monday evening, April 3, at eight o'clock. The service will be brief and bright; the music will be furnished by the vested choir of men and boys and the Granite City quartette. Rev. William J. Dunstan of West Quincy Charles Hutcheson of the Church of the Ascension, Boston, will be the speaker.

Mr. Hutcheson is considered one of the best of the younger clergy of Boston because of his ability to interest men. At the conclusion of the service the men are invited to come to this service and bring a friend.

Summer Homes.

Spring is already upon us. The eason of recreation and outdoor sport is about to open and already thousands of families are making ready for an early departure to the country and seashore. The indications all along the line are that the season will begin earlier this year than ever before for the winter has been a long and somewhat depressing one. Quaint old Cape Cod will be sought more than ever. Besides the scenic beauty and the healthful conditions that abound everywhere there is a charm that is utterly undefinable.

There is still a wealth of locations and retreats to draw from and now is the time for the drawing. A few weeks hence may be too late. The New York, New Haven & Hartford Railroad's increased train facilities is a crowning inducement to hundreds of for the summer.

Do You Know Good Healthy Sleep?

A healthy person sleeps a healthy sleep when

When you find that half the time you can't sleep in the same old healthy way then it is time to take care of your nerves.

Tired nerves won't let you sleep well and won't let you feel well. They are sick; they demand attention and they won't let you alone until they get it. No prescription has ever been formulated that produced such wonderful and rapid results in building up tired nerves as Paine's Celery Com-

Sleeplessness is simply one of the many warnings that tired, sick nerves give. Feed them with Paine's Celery Compound and you will build them back to their real strength and find again that good, healthy sleep,-which should come as natural to-day as it did in childhood.

You can take Paine's Celery Compound once a day, or once a month, or four times a day, according to your need; and when the medicine has done its work and your system is again running in the complete harmony of true health, you can cease taking the medicine, and you will not miss it. The reason is that Paine's Celery Compound is a real food for the nerve. It feeds and strengthens the entire nerve fabric.

MOEBUS' PETITION

Claims He Is Not "Max Shin. burn," as Charged

HE ASKS FOR RELEASE

Was Taken From New York to New Hampshire to Serve Balance of Prison Sentence Begun In 1865 -- Of Wide Reputation

Littleton, N. H., April 1.-By a decision of Judge Aldrich of the United States circuit court the New Hampshire authorities will be required to prove that a man claiming to be Henry E. Moebus, now in the state prison at Concord, is Max Schoenbein, better known as Max Shinburn, the famous bank robber.

Moebus, or Schoenbein, is serving the last part of a 10-year sentence imposed in 1865 for the robbery of the Walpole (N. H.) National bank, which sentence was interrupted by his remarkable es. cape from prison, nine months after he entered its walls.

Schoenbein, as the New Hampshire authorities claim, was brought from New York in 1900 at the expiration of his four years' term at the Dannemora prison for the robbery of the Middleburg bank in that state. Since his arrival at Concord he has strongly maintained that he is Moebus and 'not Schoenbein, and recently he secured counsel, who presented a petition to Judge Aldrich for habeas corpus proceedings on the ground that the prisoner was being detained without warrant of state or federal laws.

At the hearing on Feb. 14 the petition was denied, but the prisoner's attorney amended it. Attorney General Eastman appearing in opposition with a motion to dismiss

In closing his review of the case, Judge Aldrich said: "The motion to dismiss is denied and the warden is required to answer and show cause why the writ should not issue.'

At the hearing, the date of which has not yet been fixed, the state authorities will be required to prove that the prisoner is Schoenbein. It is expected that the proceedings will be interesting, as very few of the state authorities are living who were concerned in the trial and imprisonment of the Walpole bank robber.

Maximilian Schoenbein, according to the police records in many states of the Union, as well as the-criminal rec ords of several foreign countries, is one of the most famous bank burglars of the latter part of the last century. He came to this country from Germary 50 years ago and, being well educated and a mechanical genius, readily secured work in a safe manufacturing company. Within a few years he had become one of the greatest lock exerts of his time.

It appears, however, that his talents were not used in a legitimate direction for in 1865 he was arrested ing in luxury at Saratoga, N. Y., for the Walpole bank robbery. He was tried, convicted and sentenced to 10 years in state prison, but the night after his sentence, which took place at Keene, N. H., he escaped from the

jail there. He was recaptured almost immediately and taken to Concord. Nine months after he entered the prison he eluded the officials, picked several locks and was once more a free man. Schoenbein's feat of breaking out of the Concord prison has never been duplicated since. Several bank, robberies followed Schoenbein's escape from Concord, which have always been credited to his genius.

In 1868 he went to Belgium and lived there for 13 years, when his supply of money became exhausted and he again turned to his old pursuit, only to be arrested and convicted of the robbery of a bank in Belgium. Upon the completion of his sentence he caused the report to be spread about that he had died while in prison, but in 1895 he appeared in this country, where he was arrested for the robbery of the bank at Middleburg, N. Y.

For this crime he served four years in the Dannemora prison, and when he came out the New Hampshire authorities were waiting for him. Extradition proceedings were fought, but the Granite state officials won and carried their man back to Concord, to serve out the balance of a 10-year sentence, entering the prison in November, 1900, after an absence of nearly a quarter of a century.

Since his incarceration he has firmly maintained, that he was not Schoenbein, but Moebus, and has at last been successful in bringing his claim before the courts for a decision and possible freedom.

The alleged peace negotiations appear to have no basis beyond the worldwide desire that the war should end. The peace talk in certain quarters is undoubtedly another phase of the press campaign against Russia, waged in the hope that the universal sympathy with the object will have its influence on the czar's government. The Times' special cable from St. Petersburg is an example. It claimed to have unimpeachable authority for the statement that peace was in sight and that President Roosevelt had been selected as

Spring goods have arrived at Miss Hubbard's.

day afternoon was for a grass fire off

The March 31st report of the Quincy Saving bank shows an increase of over \$70,000 in deposit in three months.

That brick wall, after the English style, in front of the Brooks Adams place on Adams street, is quite an improvement.

Last week Thursday was the lucky March day to trade at the store of Geo. W. Jones. People too, are catching on to the generous offer.

Rev. O. N. Oleson of the Boston University school of Theology will preach at the West Quincy Methodist church on Sunday evening.

Commissioner Burke received the thanks of the business men in City Square last night by sending one of the watering carts around to lay the dust.

Council will go on a junket about the tastes of all amusement-seekers. Heading the City next week, viewing street locations, | bill is Richard Golden, supported by a company and locations for which petitions for seven people in the comedy sketch, "Jed street lights have been received Prouty's Visit to Boston," which is one of the street lights have been received.

Michael J. Daley was arraigned for larceny of a watch valued at \$50 from John Topliff at Quincy. Case continued until Monday.

Charles E. Leavitt was arraigned upon two complaints for assault and threatening assault on his wife Annie Leavitt at Quincy. Case continued until April 10.

Sadie Sanford was arraigned upon two complaints, one charging her with the larceny of money from Mary R. Cleaves and the second for the larceny of a hat, gloves, etc., from Gertrude E. Cleaves at Quincy. She pleaded guilty and was sentenced to six months in the house of correction upon each complaint.

The Weymouth schools have been enjoying their spring vacation.

A Popular New York Hotel.

Situated at Broadway and 63d street, fronting on Empire Square, and less than 300 feet from the 64th street entrance to the famous Central Park, the Hotel Empire enjoys one of the most desirable positions in New York

Within two minutes' walk from the Empire are two stations of new Subway, and the stations of the 6th and 9th avenue Elevated railways. All car lines of the Metropolitan Traction Company either pass or transfer to the Empire for one fare. It is within six minutes of the Grand Central station, and within twelve minutes of all ferries.

The Hotel Empire was built in 1894, and has been, since its opening, under the management of Mr. W. Johnson Quinn, who has just completed improvements costing over \$300,000.

The restaurant had always been noted for its excellent cooking, efficient service and moderate charges. The rooms are large, airy and beautifully furnished, and the rates are very moderate. Every room contains a long distance telephone, electric clock and automatic lighting

Anyone contemplating a visit to New York will be repaid for their trouble in sending a postal to the management for a free "Guide to the Metropolis."

BOSTON AMUSEMENTS.

PARK THEATRE.

A drama of great strength, splendidly done the best thing Mr. Edeson has ever attempted. This, in a word, is "Strongheart," produced in Boston Monday night at the Park Theatre before one of the largest and most fashionable from Harvard to Amherst, every high school boy and girl from Boston High to the smallest primary school will be talking of "Strongheart" within the week and there is every reason to predict that in the new play Mr. Edeson has the greatest success of his stage career, surpassing The alarm from Box 171 at 3.55 Fri-av afternoon was for a grass fire off new play the story is a man's story of the things men love to see and remember-the old college days, the football battles, the college troubles and scandals and successes-incidentlly perhaps the little college romances, but when one looks back to those pleasant days the overwhelming interest is not the romance, it is the life, action, rush of events-the good old-fashioned, brawny, sinewy battles. Edeson is a veritable surprise. His role is radically different from any in which he has recently appeared. He is an American still-the greatest American of them all-an educated, refined and up-to-date Indian struggling to make the red man the brother of the white. The entire character demands strength and force. His emotional scenes demonstrate a power which is unusual. It is truthful and accurate. It pleases because it is consistent. Mr. Edesons is natural, frank and manly. His work excites nothing but sincere

KEITH'S THEATEE.

Woods Fires.

Over Thirty Calls But Loss Only Twenty-five Dollars.

> Saturday will go down in the records of the Quincy fire department as the busiest day it has ever had. There were three bell alarms during the day and in addition to these the department responded to thirty still alarms. These were largely for grass and woods fires and the total loss was only \$25.

Box 37 sounded at 3.27 for a fire on the roof of one of Charles H. Spear's houses on Franklin place. The fire started from a spark from a passing locomotive. The loss will not exceed

Box 69 sounded at 3.55 for an extensive grass fire at Montclair near the Wollaston golf grounds.

Box 445 sounded at 5.25, and was for a fire in the old engine house on Quarry street of Peter T. Fallon. The loss here will not be over \$10. The fire was evidently the work of an incendiary. During the afternoon Hose 4 was called to the Fore River shipyard on a still alarm to extinguish a fire in a pile over No. 3. of soft coal. JAB AT STANDARD OIL

Might Be Canonized as a "Patare ever present in the ron Saint of Industry"

New Haven, April 3 .- Rev. Dr. New-We will fill YOUR orders over man Symth, pastor of Center church, preached a sermon yesterday drawn from the recent discussion of the propriety of the American Board of Commissioners for Foreign Missions accepting a gift of \$100,000 from John D. Rockefeller. Dr. Symth said in part: "If the acceptance of this gift, the manner in which it has been offered,

or any conditions upon which it has been received, directly or indirectly, would compromise the board in any commercial unrighteousness, or in any exploitation of the people, then the remonstrants would be clearly in the right. If, by the acceptance of it, any teacher in the educational institutions benefited by it should be hindered in telling the heathen that the notorious methods of the Standard Oil company are not to be accepted by them as the choice fruit of American Christian civilization, then the gift should be spurred as a bribe.

"I do not care here to enter into the fuquiry which has been raised anew by this American Board protest as to whether or not the Standard Oil company has been a sinner above others. If its vice president, even at this eleventh hour, can produce a valid legal certificate of its good moral character and on the platform of the American Board at its annual meeting could convince fair-minded laymen as well as ciergymen that this trust has been ropularly maligned, and that it might rather apply for canonization as a patron saint of industry, then he will certainly confer upon the American Board and the whole country a greater benefit than this donation of a hundred thousand dollars."

SIMPLON TUNNEL OPEN

Traffic Begun In World's Greatest Underground Railroad

Rome, April 3 .- Traffic in the Simpion tunnel, the longest in the world, was inaugurated Sunday, when, from the Swiss and Italian sides, the first trains passed through, meeting at the centre, where there was an iron door, which originally prevented the overflow of a torrent of hot water, and which was yesterday opened for the first time. The weather at the entrance to the tunnel was spring-like, though the surrounding mountains were covered with snow, but once inside, the temperature became very high.

Engineer Brandau, who had directed the work on the tunnel, conducted the Italian train, which part of the way was lighted by miners with lanterns. The train from the Italian end was the first to reach the iron door, but a little later the train from the Swiss

end was heard on the other side. There was a brief time spent in communicating through the door by means of hammering and finally the door was knocked down amidst frantic applause and cries of "long live Switzerland" and "long live Italy;" bands played the Italian royal march and the Swiss anthem, and the two parties embraced and kissed each other. Engineer Brandau shook hands with Engineer Rosemund, the director of the work on | ing by A. Ryden and good fielding by the Swiss side, and the Italian bishop, all. [Special Despatch to the Globe-Democrat.] JEFFERSON CITY, Mo., March 24,-G. L. Williams, treasurer of the North American investment company of the United States, the home office of which corporation is in St. Louis, was here today and increased the company's deposit with Hon. John F. Gmelich, treasurer of the State of Missouri, to \$500,000 for the security of the company's boudholders. Only a few months ago Mr. Williams increased this deposit to \$350,000; and the half million figure now reached is the best possible evidence of the growth and prosperity of the North American investment company and the popularity among savings investors of the company's 5 per cent interest-bearing gold bonds. The deposit thus placed with the chief financial officer of Missouri is the largest made by any similar company in the world.

When the entry was shown to Holden he was greatly surprised to find that Francis V. Greene and the asphalt it had been entered on the books. His explanation at the time was that it was a personal loan.

The matter was immediately reported to Washington and, by direction of Postmaster General Cortelyou, Inspector Mayer of the New York division has been sent to this city, and is making an investigation.

Inspector Holden, last night, in an interview, told how he came to accept the loan from Storey. He said he had been sent to the offices of the Storey Cotton company to make an investigation as the result of a complaint. While there he met Storey. CHAPTER XXI. EORGE returned to town with the confession of Mrs. Jersey in his pocket. On arriving at the Liverpool street station he wrote a note to Kowlaski telling him of Lola's plight and advising him to engage counsel for her defense. In another half hour he was in his own

After making a good meal, for he felt the need of food to sustain him, he sat down to read the manuscript of Mrs. Jersey.

The confession of the wretched woman who had come to so tragic an end was written on several sheets of foolscap loosely pinned together. She wrote in a most cold blooded way and seemingly exulting in her wickedness. All through her confession ran a venomous strain of deadly hatred toward George's mother, and indeed against any woman who paid attention to than that to wood lots was sustained. Vane. I hated so deeply. "She was called Rosina Lockwood and was no better born than myself. Her father was a low man who taught singing, and she appeared herself on the stage. I never thought she was beautiful myself.

"At first I rather liked Miss Lockwood. She was kind to me in her silly way, and the gentlemen who were in love with her gave me plenty of money to deliver notes and other things. There was one gentleman who was the best of them all-and the biggest fool over her blue eyes and fair hair. His name was Ireland, and he had plenty of money. He came to learn singing from old Lockwood simply to be near her, and proposed three times to my knowledge. But she would have nothing to do with him, which was foolish, as he had money and she could have twisted him round her finger.

"I was a handsome girl in those days, though I say it myself. But if a woman is good looking why shouldn't she say so? I had a perfect figure and a complexion like cream and roses. [Special Despatch to the Globe-Democrat.]

JEFFERSON CITY, Mo., March 24,-G. L. Williams treasurer of the North American investment company of the United States, the home office of which corporation is in St. Louis, was here today and increased the company's deposit with Hon. John F. Gmelich, treasurer of the State of Missouri, to \$500,000 for the security of the company's boudholders. Only a few months ago Mr. Williams increased this deposit to \$350,000; and the half million figure now reached is the best possible evidence of the growth and prosperity of the North American investment company and the popularity among savings investors of the company's 5 per cent interest-bearing gold bonds. The deposit thus placed with the chief financial officer of Missouri is the largest made by any similar company in the world.

Judges Render Decision on Appeal of Charles Tucker

VERDICT WAS TRUE ONE

Prisoner's Rights Not Affected by Taking of Notes by Juror-Counsel Will Now Move to Carry Case to Supreme Court

Cambridge Mass., April 4.-The motion for a new trial for Charles L. Tucker, convicted of the murder of Mabel Page, is denied in a decision reached by Judges Edgar J. Sherman and Henry N. Sheldon, who presided at the trial, and made public last night. The decision of the court was mailed to Sheriff Fairbairn, and was read to Tucker this morning.

Mabel Page was stabbed to death at her home in Weston March 31, 1904. Tucker was arrested on April 9 following, and indicted on June 9 for murder in the first degree. On Jan. 24 of this year a jury in the Middlesex superior criminal court returned a verdict of murder in the first degree.

Tucker's counsel appealed for a new trial on the ground that the verdici was against the evidence, that Judge Sherman's charge included erroneous instructions to the jury, and because one of the jurors took notes during

In denying the motion, the court holds that the prisoner's rights were not affected by the taking of notes by the juror, that the judge's instructions were in accordance with the law and that the verdict was a true one, and in keeping with the evidence.

EXPLOSION OF GAS

Half a Hundred Men Entombed In an Illinois Mine

THIRTY OR MORE KILLED

Shock of Explosion Felt at Town Twelve Miles Distant -- Destruction of Main Shaft Hinders Work of Possible Rescue

Benton, Ills., April 4.-Some 50 n iners were entombed in Joseph Leiter's mine at Zeigler by a terrific explosion of gas. Thus far 15 bodies have been removed and more than 30 are said to be dead. The explosion, it is said, was due to the fact that the Leiter mines are not worked on Sunday, thus allowing gas to accumulate in the lower workings.

When between 35 and 45 miners had descended into the mine yesterday to resume work, a terrific explosion blew the mouth of the mine high into the air. One of the steel cages was blown to the surface from the bottom of a 500-foot shaft.

The shock of the explosion was felt at Benton, 12 miles from Zeigier. A teamster driving along a road half a mile from the mine was covered with falling cinders, and debris covered the floor of his wagon half an inch deep. One miner was killed and four were severely injured at the mouth of the shaft in which the explosion occurred. The work of rescue was begun at once by miners, who were arriving when the explosion took place. But

the main shaft was demolished, so that rescue work has to be carried on through the air shaft. This has hindered the work of aiding the entombed men to such an extent that when dark ness fell last night only three bodies and one injured man had been brought to the surface. These bodies were found 40 feet from the bottom of the air shaft, and this for many hours was Sawed and Split to Order at Short Notice as far as the rescuers were able to penetrate the shaft.

Superintendent Hurd of the Lelier mine estimates the number of dead at 34 and possibly 39. The wounded total

There are employed in the mine only 180 men, 120 being at work days. Four cages, each containing about 10 men of the day force, had gone down into the mine just before the catastrophe occurred. The explosion wrecked the shaft, blowing out the skids on which the cages were hoisted. Besides the 15 bodies recovered, three men were removed alive, but with probably faral

ers left at Nickerson's Candy Kitchen in In the efforts to recover the entombed Music Hall Block; or at residence, 10 Foster men, five rescuers were overcome by afterdamp. All the searchers for tha men below were let down by hand, and in two instances the man acove was nearly overcome by gas.

A committee of union miners from Duquoin and other neighboring min ing towns, headed by District President Morris, hastened to Zeigler soon after The Inspector of Milk will have the explosion occurred and offered

> The exploring party finds it difficult to work in the mine because of poor ventilation. Forty coffins have been ordered and 31 have reached Zeigler. A coroner's jury has not yet been called. Joseph Leiter is expected to reach Zeigler today, although he was reported to be on his way to Europe. Nearly all the bodies found show go marks of injury, indicating death by asphyxiation.

> C. E. Chiders, a striking Zeigler miner, last October predicted in a printed article that an explosion was likely to occur on account of what he termed improper ventilation of the shafts.

There was much excitement among miners, when the accident became HERBERT A. HAYDEN known, because there had been a strike of long duration and many conflicts had occurred between strikers and non-union miners. An investigation tends to show that the catastrophe was due to the accidental explosion of accumulated gas.

all that makes life worth living depends upon a healthy supply of Nerve Force. Paine's Celery Compound builds up the supply

of Nerve Force, it revives the old force and makes new. It not only does this, but by strengthening the nerves that control all the organs of the body, it cures the real cause of headaches, neuralgia, rheumatism, malaria, and the many diseases coming from a run down condition of the nerves.

Gertrude Jenkins allowed herself to gradually sink into nervous prostration, one of the final states that tired, abused nerves reach. Her experience is valuable to all those who feel "run down," "tired out" and are not helping themselves to get back to real health.

"Paine's Celery Compound cured me of nervous prostration when I was so weak and used up that I had to lie down part of each day. The doctor advised me to go away and take a vacation to bulld up, but I could not give the time or money. Paine's Celery Compound built me up withi weeks,-my headaches disappeared, my appetite returned and the aches and pains gave way to new strength, life and increased vigor. I enjoy perfect health to-day and used less than five bottles of Celery Compound, so know by experience how valuable it is."-Gertrude Jenkins, 714-63d St., Chicago, III. (Member Ladies of the

"Nervousness," "nervous prostration," "nerve decline,"—that run-down, worn-out feeling,—nine times in ten are simply the result of prejudice, carelessness, or ignorance.

Prof. Phelps, of Dartmouth University, was the first physician to enunciate the principle which to-day is recognized as one of the foundations of the science of medicine,—the great enlightening truth, that the nerve system rules all the body's health.

He sought and found the food that builds up and restores the nerves-his celery formula, which has become famous as Paine's Celery Compound -the celebrated nerve vitalizer and tonic.

Paine's Celery Compound is giving New Nerve Force to thousands every day by feeding and re-storing the nerves to their full strength. It never fails to build up the run down system to full, ruddy health.

To Probe Equitable Life Affairs New York, April 4.- The most important development in the Equitable Life Assurance society's affairs is the announcement that the state superinricks, has begun an investigation of the company's affairs. There was introduced in the state senate last night a resolution providing for a legislative investigation of the Equitable. The action of the state authorities followed a request made by President Alexander of the society on Feb. 21, and by Vice President Hyde later.

Mayor Sticks to His Guns Cleveland, April 4.-Mayor Johnson last night refused to comply with the city council resolution of a week ago that he either apologize to the members of that body whom he accused of accepting bribes or to take the charges into court. The mayor said that he would not do either and asserted that he still believed that "certain interests" had more influence with the votes of certain members of the council than the interests of 40,000 voters.

Trial Cancelled by Death

Lockhart, Tex., April 4.-S. M. Nixon, a prominent politician and lawyer, died yesterday of apoplexy, induced by nervous collapse. His trial on the charge of murdering two men in a street fight a year ago was set for trial yesterday. On the dockets were two suits for \$50,000 each filed by the widows of the dead men, growing out of the killing.

Washington, April 4 .- The president has carried out his plans for the reorganization of the isthmian anal commission as to personnel and business methods, generally on the lines of the legislation he suggested to cougress at the last session, which failed in the crush of business in the closing hours. The total compensation of the governor of the zone and the chief engineer are in effect unchanged. Professor W. H. Burr and William B. Parsons, civil engineers, will be appointed as members of the consulting board of engineers.

After their induction into office and their consultation with Secretary Taft, the commissioners met in the office of Governor Magoon and had a brief talk over the reorganization plans. Necessarily this was of a preliminary nature because most of the new commissioners were unfamiliar by personal experience with the mechanism the old commission has created.

Under the president's order the actual headquarters of the commission will be in Panama and there probab'y will be a considerable transfer of employes from Washington to that place, leaving here only a sufficient force to carry on the work of the administrative branch and to keep the duplicate accounts. Chairman Shonts, with lace, will spend most of his time in the zone, but, as the administrative offices are directly in Shonts' charge, he will be in Washington more or less.

Late in the day the new body met at the offices of the commission and perfected its organization. An executive committee composed of Messrs. Shonts, Magoon and Wallace was appointed. All pending business coming over from the old commission was disposed of. Before going to Panama the commission will hold daily sessions in this city. Besides, Percy loved the boy so that he used to make me envious the way he nursed him. But had I got rid of the child-and I thought of a thousand safe ways I could have done so-I should only have been sent away.

"The end of it came in Milan. We were stopping at the Hotel de Ville, and there was a waiter who fell in love with me. He was an English boy called George Rates, a horrid, scrubby, red haired, nasty, pale faced creature, who worried me to death. I told George Rates that I worshiped the very ground Percy walked on. I gave my passionate feelings full vent and bore him to the ground under the storm of my indignation. He told the other servants, and they insulted me, especially the English ones, as there were two or three in the hotel. I was persecuted, but I bore all for his dear sake. Then it came to his ears. Percy heard what I had said to George Rates. He called me in. He accused me of making him ridiculous, of being out of my mind, of a thousand and one cruel things. I lost my head. I told him how I loved him. I 'melt at his feet. I implored that he would reward my love-my long, long sufferings. He laughed in my tearful face. At that moment I hated him, but not for long. CALLS FOR A NEW TRIAL

Highest Court In State Asked Question In Addition to Constitutionality of a Warrant

Cambridge, Mass., April 5 .- Although disappointed at the refusal of Judges Sherman and Sheldon to grant a new trial to Charles L. Tucker, who stands convicted of the murder of Miss 1905 Mabel Page at Weston a year ago last Friday, James H. Vahey, senior counsel for the prisoner, still believes that Tucker will eventually be given a new trial, and this belief is now based upon the exceptions which were filed with the clerk of the superior court yesterday afternoon by one of Vahey's associates. The exceptions are those which were taken during the trial which took place in January, and there are 25 in number.

In passing upon them the supreme court will be called upon to act upon about 15 questions of law which have never been passed upon before by the highest court in this state, and Vahey says that the sustaining of any one of the exceptions by the judges of that tribunal will mean a new trial for Tucker. It will probably be several months before the supreme court of this state finally acts upon the exceptions, and then if the decision should again be adverse to Tucker, his attorneys have recourse to the supreme court of the United States on at least one exception. That is regarding the constitutional right of the police to search Tucker's house for evidence to

[Special Despatch to the Globe-Democrat.] JEFFERSON CITY, Mo., March 24,-G. L. Williams, treasurer of the North American investment company of the United States, the home office of which corporation is in St. Louis, was here today and increased the company's deposit with Hon. John F. Gmelich, treasurer of the State of Missouri, to \$500,000 for the security of the company's boudholders. Only a few months ago Mr. Williams increased this deposit to \$350,000; and the half million figure now reached is the best possible evidence of the growth and prosperity of the North American investment company and the popularity among savings investors of the company's 5 per cent interest-bearing gold bonds. The deposit thus placed with the chief financial officer of Missouri is the largest made by any similar company in the world.

OVER 24,000 PLURALITY

to Have Been Upset--Democrats Committed to Municipal Ownership of Public Utilities

Chicago, April 5.-A political tornado yesterday overwhelmed one of the most ruggedly unique leaders in the country. Incidentally the Republican party met defeat in a memorable effort to capture the mayoralty of Chicago. As a direct result the city is officially committed to the policy of the quick est possible cessation of private franchises for public utilities. Municipal ownership is especially threatening street car lines, valued high up in the

After winning successively four remarkable biennial fights of independents against the regular Republican party organization here, J. M. Harian, son of Associate Justice Harlan of the United States supreme court, was a leser as Republican candidate for mayor. The defeat is attributed to an extraordinary whirl of causes, starting with political revenge and taking in a wide sweep, embracing the most up-todate socialism as a factor. The victor is Judge Edward F. Dunne, Democrat.

Seldom, if ever, has Chicago witnessed a more lively, more picturesque Yesterday, particularly, the contest. city was hideous with the ringing of cow bells and the roar of cannon crackers. The result was evident bean hour. It was a raw, blustering day, gloomy and cold until about the hour for the close of voting. The sunburst then was not hailed joyfully by the Republicans, who felt that even in the matter of election weather the party had been under a severe handi-

Appeals to fear of domination by gauged by the Republicans. Harlan the campaign as the reputed representative of Wall street interests, intent on fastening burdensome franchise grants upon the city. The Republicans, however, had figured that the voters susceptible to appeals of this kind would support the Socialist candidate, Collins, and that losses, if any, to the Republicans, would be more than made up by Harlan's old-time admirers among independent voters. Estimates, however, of 50,000 votes as the ly short. Calculations upon negro voters were another source of error in Republican expectations. An unmistakable defection occurred in the negro districts.

One of the amusing features that is recalled as tending to center good natured feeling in Dunne's behalf is that he is the happy father of 13 children. This phase of the campaign was attended to by A. C., or "Pop" prove that the Democrats, at least in Chicago, were the original and only genuine opponents of race suicide, was humorously appreciated.

The apparent horror of the situation was increased by the breaking out of fire and the appearance of ambulances and morgue wagons, which rattled up to the factory and awaited their gruesome errand. A few moments after the explosion occurred the fire department arrived and did good work in checking the flames.

The exact cause of the explosion may never be known, as the only man in the building at the time, John Neary, was blown through the roof with a dead. The church finds itself in danger of losing its moral leadership. It cannot be blind to the growing alienation popularity personally was beyond who, after hearing a dozen witnesses, between those who have, and those who have not. Its message is to the entire human family, and a deepening sense of social obligation has touched its heart. And not only human fellowship, but the interests of righteousness are at stake in the problems of trade.

The battle is on between forces that are socially destructive and those that seek a finer order of justice and human opportunity. There is no question on which side of this contest the church that may swerve it from its own task. Every act must be avoided that seems to ally the church with the wrong side, to impede its action or to render its efforts and utterances ineffectual.

The motives which constrain us to this appeal are a deep solicitude because of the corporate evils that threaten our nation, our sense of the solemn and imperative mission of the church as the moral educator of the people, and a jealous zeal lest its energy and authority be impaired by any seeming compromise with the evil it is set to condemn. By the convergence of these the man fell from a bridge over the motives upon this special case now brought before us as a church, it is lifted into commanding importance and our decision is fraught with momentous and far-reaching consequences. CHAPTER XXI-(Continued.)

"But it was the horrid girl that caused me pain. She was one of the daughters of General Howard, whom Percy had met at Como. The two girls larceny at Quincy was called and he was both laid themselves out to catch my darling. But their arts did not succeed at Como. Jenny was the one who tried hardest to get him, but Violet took her chance also. When they came to San Remo they stopped at the Hotel d'Angleterre. I looked after their room, my tongue lest I should be accused of and, knowing what they were, I made myself their friend. They knew me as the former nurse of Percy's little son and wondered how I came to be a housemaid. I told some story which satisfied them. I forget what it was. as the criminal. I was terrified as I They believed in me thoroughly, and they found out that I loved Percy. Then they were amused, and I hated them for it. They told Percy that I was watching him, and he came to the hotel no more. But I still pretended to be their friend for my own ends. There was a masked ball coming off, and the Miss Howards wished to go unbeknown to their father. I entered into the spirit of the joke. I procured them two blue dominos and each a sprig of yellow holly so that they might know one another. They went to the ball thus disguised.

"I went also in the same dress. I had got a third blue domino, and I also wore a sprig of holly. In my pocket I took a stiletto. Why did I do that? Because I was determined to kill any one who tried to make love to my Percy. I knew that Jenny Howard, the little cat, would try to get him to love her, and I would have killed her with pleasure had she become Percy's bride. As I was masked, I had no fear of being discovered should I stab any one, and, moreover, were there trouble, the Misses Howard, being dressed as I was, even to the sprig of yellow holly, might be accused of any crime that might happen. Moreover, even if I killed Jenny I knew that the two sisters quarreled and that on the evidence of the holly and the domino Violet might be charged with the crime.

"About the stiletto. I received that from a low shopkeeper called Velez, who was in love with Percy. She and her husband kept an oil shop, and her husband was very jealous of her. She was madly in love with Percy, as I found out when buying something at her shop, and I got to know her intimately.

"I heard Percy propose to marry Jenny, and I was minded then to kill her. I drew the stiletto from my breast and would have rushed forward, hoping to escape in the confusion when I killed her. But my heart failed me; even when she was left alone my heart failed me. Jenny took off her mask, and I left her sitting waiting for Percy's return. Then I followed Percy and saw Violet join him. I knew it was Violet, owing to the unmasking of Jenny, and, moreover, I had seen Violet listening, as I was. She loved him also-the cat! However, I saw that she wanted to get Percy out of the place by making him think she was Jenny. She did. I followed. He took her home to the gates of the hotel and left her there. When he was coming back to the ball I stopped him at the bottom of the parade. There was no one in sight. it was late, and a clear moon was shin-

"Percy thought I was Violet, whom he mistook for her sister. He addressed me in such endearing tones as Jenny and remonstrated so gently about what he called the rashness of following him from the hotel that I lost my temper. I snatched off the mask and poured out my wrath. Percy burst out laughing when he recognized me. He said-never mind what he said-but it was an insult, and my To Fight Against Disease Unless They Italian blood boiled in my veins, I drew the stiletto and rushed on him. At that moment my hand was caught with from behind, and I fell. Try it yourself and if it disappoints you the loss is the secretary a brief memorandum setours, not yours, for we have instructed the grocers to refund to any dissatisfied purchaser of Jones' Superlative Flour from which she does not propose to be the purchase price. This is the way swerved. In substance the memoranwe believe in Jones' Superlative. This dum, which is couched in the most exist the way you will believe in it if plicit language, announces that:

you will take our advice and try it Germany stands for the "open door" in Morocco no less firmly than in the When you have your choice, why far east, for the preservation of the Moroccan status quo and for the safe guarding and protection of the commercial and trade interests in Morocco not only of Germany, but of all the trading nations of the world.

After presenting the memorandum the secretary and the ambassador had a brief conversation on the subject of Morocco, Sternburg calling attention to the commercial importance of that country to the trading nations and emphasizing the international importance, in Germany's opinion, of the preservation there of the "open door." The secretary thanked the ambassador for his explicit statement of the German policy and promptly forwarded the memorandum to President Roosevelt.

Secretary Taft, while expressing interest in the emperor's views, refrained from committing this government on the subject, nor did the ambassador in any way endeavor to sound him as to the president's attitude. There is no request in the German note for a statement of the Washington government's position and the reason for its presentation was the circulation in Europe of sensational reports about the German emperor's visit to Tangier and the German attitude toward Mo-

Although France is not mentioned in the memorandum, it can be stated that Germany regrets that she was not officially advised of the new position in Morocco contemplated by Great Britain and France, which was later disclosed in the treaty signed last spring by which the London government deferred to the superior interest of France in Morocco. Germany holds that her interests in Morocco are in every respect equal to those of Great Britain and the establishment by any power there of a special sphere of influence would be deplored in Berlin.

Regarding the emperor's visit to Tangier, although it was in the line of his cruise in the Mediterranean, the object of his address was, it can be stated on high authority, to impress the Moroccans with the seriousness of Germany's desire that the status quo should be maintained and that the principle of the "open door" laid down The Inspector of Milk will have by Secretary Hay with reference to office hours at City Hall each Wednes- China should be strictly adhered to in Morocco.

In diplomatic circles the significance of Germany's frank avowal at Washington of her views about Morocco is not under-estimated, and the incident has attracted all the more attention because of its occurrence on the day on which the Washington government officially disclosed the initial role played by Emperor William in the exchanges of the powers last year regarding Chinese neutrality in the far eastern war. Some diplomats believe the object of the German representations at this time is to evoke from Washington a similar avowal of adherence to the "open door" policy in

Morocco. Although Secretary Taft was not so informed nor does his memorandum indicate it, it is believed here today a similar statement of Germany's views may have been addressed also to St. Fetersburg and Madrid.

No official statement of the German rosition is obtainable at the German embassy here, in view of the fact that President Roosevelt has scarcely had the time to consider the memorandum.

Build Up Your System!

Neglect and carelessness are the general causes of all disease.

People never become dangerously sick until after nature has given them many warnings. The great mistake is not paying attention to

these warnings. When you feel "run down," "used up," "nervous," tired most of the time—it means that something is wrong and nature is warning you. You need more nerve force to build up your

Strengthen your nerves, increase your nerve force and your health will take care of itself.

Science with its unerring methods of research has proved that the various organs and tissues of the body continue in health and perform their work properly as long as their nerve supply retains its vigor and strength. But if the nerves degenerate or lose power from

poor nourishment or any other cause, the entire physiological mechanism of the body is thrown out of gear and we have as a result some "rundown" condition or disease.

The heart, the stomach, the liver, all have their great nerve centres which supply them with the power to work properly. When these nerve centres are weakened these important organs cannot act properly.

"For five years I was in very bad health and the doctors and medicine failed to help me, until I became seriously III, and then I began using Paine's Celery Compound. I derived great benefit from it at ence. I commenced to gain in weight and gained thirtynine pounds in three months. It gave me great strength and built up my entire system. I have recommended it to some of my friends and it did them a great deal of good."--O. M. Pearson, Seattle, Wash.

Prof. Phelps, of Dartmouth University, was the first physician to enunciate the principle which today is recognized as one of the foundations of the science of medicine,—the great enlightening truth, that the nerve system rules all the body's health.

The nerves must have food to keep up their strength. Their food is not the same food that we usually know. He sought and found the food that builds up

and restores the nerves-his celery formula, which has become famous as Paine's Celery Compound -the celebrated nerve vitalizer and tonic. Paine's Celery Compound is giving new nerve force to thousands every day by feeding and re-

storing the nerves to their full strength. It never fails to build up a run down system to full, ruddy health.

Two days' treatment proves its marvelous power. It braces you up. You feel better at

Sick headache, palpitation, dizziness, and heartburn are usually relieved by a single dose of Paine's Celery Compound.

Remember this,-Paine's Celery Compound is the prescription of one of the most famous physicians this country has ever known, and all reputable Druggists sell and recommend it.

A MATTER OF HEALTH

A POSTOFFICE LEAKAGE

Storey Had Received a Tip In Regard to Complaints

Washington, April 6.-The disclosures regarding the Storey company of Philadelphia are bringing to light a curious condition in the postoffice department. C. S. Bonsal, of the Buckeye Engine company, Salem, O., has written to a friend here about his experiences. He had always felt the affair a swindle, and desired to have it stopped to save his employes from loss, many of whom were putting their money into it. Acordingly, more than 21/2 years ago he wrote to the department stating his suspicions, which were met with the reply that the company's transactions were entirely legitimate.

When the postoffice frauds broke out he supposed this would mean the end of the Storey Cotton company, but it did not, and in July last he again wrote to the department, but with the same results as before. The following month Bonsall received a letter from Storey, saying that he understood that Bonsall had made charges against the company, and that if these were not retracted, civil or criminal action would be begun.

As the only charges Bonsall ever made, he says, were to the postoffice department, he thinks that some officer connected with it must have stood close to Storey, if not acting as an Sawed and Split to Order at Short Notice actual confederate. He continued to forward the literature received from the company to the department, unti it suddenly stopped coming. It will probably be found that several persons have been urging the department to take action in this case.

How Do You Figure It For

New Shipyard Will Cause a Big Jump.

Three weeks from Monday the census enumerators will begin their work all over the state. The State census is taken every ten years alternating with the National census which is also taken

The last State census showed 20,712 in increase in ten years in Quincy of ,567, or over .70 per cent. over 1885. A similar percentage of gain for the ten years from 1895 to 1905, would give Quincy an increase of 14,500, making the total 35,212.

This is more than any one anticipates. The gain from 1885 to 1900 was 3,-182, a little over 15 per cent. A similar percentage of gain from 1900 to 1905 would give Quincy an increase of 3,600 or a population of 27,500.

This is probably far too low, because the shipyard has been established in the last five years.

Here are the figures at each census of Quincy, and people may figure out for themselves the population of the city

Sudden Death of a Well Known Resident of City.

George W. Brooks, a long resident of Quincy, died at his residence, 72 Centre street, Thursday afternoon after a brief illness of pneumonia. Mr. Brooks was taken ill Saturday

and grew rapidly worse, until he passed away. He was born in New York in 1833. He came to Quincy when a young man, entering the employ of the late Thomas J. Nightingale, afterward going into the butcher business for him-

He married a daughter of Mr. Nightingale who with a son and daughter survive him. His son is Charles H. Brooks of the Consolidated grocery, and his daughter the wife of Councilman Walter E. Piper.

emperor's note to the powers in behalf of the "open door" in Morocco really signifies a disposition to oppose the political control of France there, observers as if the open door is seriously endangered.

The Anglo-French agreement regarding Egypt and Morocco, signed in London, April 8 last, specifies in its fourth article that the two governments are equally attached to the principle of commercial freedom, both in Egypt and ly awaiting the next move. in Morocco, and that they will not ish government says that France will ish government says that France will position of customs or other taxes, or in railroad charges.

The United States long has been consulted regarding Morocco tariffs, and in spite of the general French restrictive policy in Algiers, which it regards as an integral part of the republic, and in Madagascar it is not believed that that trade opportunities in Morocco are Spain, the three countries most vitally interested, have apparently agreed. Still the German emperor's move is of far-reaching significance in interna-

tional politics. Morocco is the most backward of all countries with which civilized nations have dealing, as shown Turkey are by comparison progressive joyed in Morocco.

Congress, at its recent session, raised our consul general at Tangier to the rank of minister, which might have

European powers. The latest move in Morocco goes back to the Fashoda incident. It seemed that France had renounced all claims to Abyssinia and to everything south of Egypt, as within the sphere of British influence, and when King Edward went to see President Loubet it was believed that they had an understanding by which North Africa, except Egypt, should be allowed to come under French influence. The acquisition of Morocco was the next step. Spain, be- police are still pursuing. cause of its geographical position, is vitally interested, but had apparently

agreed to it. The German emperor's move threatens to upset arrangements which have for years been ripening. It may be analogous to his telegram to Kruger and his general attitude toward the Boers. He evidently wants Morocco to resist absorption and to remain abso-

sion of this purpose. It has been assumed here that France operation much as it did in Tunis when have all his relations with foreign powers through the French minister. This virtually made that official secretary of state for Tunis, and so put an end to its existence among the nations of the

MODERN SURGERY.

Time Saving Is One of Its Most Im-TO LOAN ON PER RE OF CARE OF C

Time saving is one of the most important considerations in all surgery. Any major operation lasting more than an hour and a half entails an additional risk. In operations of long duration the chances of recovery are comparatively small. This is due to shock, to the cumulative effect of the anaesthetic, to loss of blood and to lowering of the patient's temperature by the exposure of internal areas to the air. Because of this the best surgeons work with a mechanical precision and economy of movement. Everything is ready before the operation commences; an assistant is at hand to look after the details of actual work, such as holding watches the subject's pulse and respi- her. THOUSANDS KILLED

Earthquake Caused Widespread Disaster In India

COLLAPSE OF BARRACKS

Strucrtue Built of Stone Fell Upon Three Battalions of Gurkhas, Killing Nearly Five Hundred Men--Refugees In a State of Mental Collapse

Calcutta, April 8.—It now appears that 400 men of the Seventh Gurkhas were killed at the Dharmsala cantonment by the collapse of a stone barracks building during the recent earthquake. In addition 20 members of the First battalion and 50 members of the Second battalion of the First Gurkhas were killed, while it is roughly calculated that from 20 to 30 percent of the native population of the surrounding villages were killed. Seven children of Europeans are said to have perished.

Teegraph communication has not yet been restored and the anxiety of the public to learn the details of the terrible catastrophe in outlying districts is becoming intense, it being feared that news of further disasters will come from the places not yet heard

The authorities are displaying incomprehensible reticence and press representatives experience the greatest difficulty in getting information. It is supposed that since the recent passage of the drastic "official secrets act" the police and officials are afraid to impart information to the press.

There is little doubt that when the complete extent of the disaster is known the death roll will reach into the thousands. As an indication of the tremendous force of the shock the exceptionally solid new courthouse at Dharmala was absolutely destroyed. Refugees from Dharmsala have arrived at Labore in a condition of mental collapse and are unable to give any coherent story.

The disaster to the Gurkhas was due to the sudden collapse of the stonebuilt British barracks. The men had only just reached the station and other troops ordered there had fortunately not arrived. The road to Dharmsala a mere cut or shelf on the mountain slope, has crumbled away and one of the bridges over the river has collapsed; hence the difficulty of restoring communication.

According to one report, about 200 Gurkhas were extricated alive from the ruins of the barracks, but many were so terribly crushed that there is little hope that they can survive.

Wholesale Robbery of Tourists Jacksonville, Fla., April 8.—Gus Emanuel, baggagemaster of the Florida East Coast railway, charged with robbing the baggage of north-bound tourists, waived examination and was released under \$2000 bonds. It is refully \$50,000. Only north-bound baggage was robbed, so that tourists would not discover their losses before they arrived at their distant destinations, thus making the robberies more difficult to trace.

Advice to Young Ministers Newark, N. J., April 8 .- Young ministers were cautioned by Bishop Berry, in the Newark conference of the Methodist church, to talk sparingly of women and make their pastoral calls in the evening, when the wife was surrounded by her husband and children. The afternoon call on women of the

congregation, when they were likely to be alone, should be frowned upon. Moroccan Door Still Open ambassador called on Secretary Taft

and discussed with him the Morocco situation, with special reference to the note which had been handed the secretary by the German ambassador relating to the open door. The British ambassador expressed an opinion that the open door in Morocco obtains at the present time.

Accomplished a Risky Theft Chicago, April 8 .- Last night, while the street was full of pedestrians, two robbers broke a window in the jewelry store of Turner Bros, in Madison street and stole \$8000 worth of diamonds.

The robbers had a horse and buggy

waiting across the street, and as soon

as they secured the jewels jumped in-

to the rig and made their escape. Countess to Get \$15,000 a Year Dresden, April 8.-King Frederick Augustus has given his consent to the raising of the yearly allowance of his former wife, the Countess Montigoso, to \$15,000 in return for the surrender of their daughter, Princess Anna Monica Pia. It is believed that this will settle the controversy between the king and his divorced wife.

Suicide of a Schoolgirl

New York, April 8 .- Eva Lake, a 16year-old schoolgirl, was found dead in rona, L. I. There was a bullet wound in her right temple and a revolver lay in her lap. Other than that she had been ill, no cause for suicide is known.

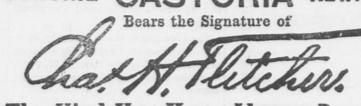

King Edward at Marsellies Marseilles, April 8.-King Edward's journey from Paris to Marseilles and his arrival here were without incident. On arriving here the king boarded the greeted Queen Alexandra and other 1387 Hancock Street, members of the royal family.

Drift of Opinion.

Is there any greater joy in life than the possession of an agate that all the boys in school beg to be permitted to "peg" at? And is there any greater sorrow than that experienced when the teacher takes all the marbles a boy has just because some of them happen to fall on the floor when his pockets gape as he sits down in school loaded with the spoils of successful play? The only thing that can be worse than that is to see her distribute those marll's to her favorites among the other boys at the end of the term. "Peggin" at agates The property consists of a 11-Room House, well built; bath, set tubs, and 7,477 square feet of land, same being a corner lot. Excellent location, rear centre of city, especially desirable as a home for a professional man; on line electrics, near schools and churches, and is worthy the attention of buyers for a home or investing. Parties desiring to see the interior of house may apply to the Auctioneer. Terms easy, to be announced at sale. Peggin " at agates teaches self-reliance, and good aim; marbles teach boys to stand up for their rights, to care for their property, to husband their resources. Every man who played marbles in his youth can remember that while he himself never carried over more than ten marbles from one season to another, other boys seemed veritable John D. Rockefellers in the number of marbles they accumulated, and managed to keep. No boy who has ever been "drunuxed" of all his store of marbles by sharp practice is ever likely to be caught again in such a game or to enter another such arrangement without some investigation. When the boy of marbles in the game of life he will forget these lessons, and will be caught in the same old game in the same old way, but while he remains a boy he will have had his lesson, and will heed it. So a marble famine is a serious thing. -Providence Journal.

At a recent meeting of the street railway club in Boston Gen. Bancroft of the Boston "L" road defended ' standing room " in American street cars as a necessity. In support of his position Gen. Bancroft said: "A shop girl, for example, comes out from ber work, tired and in a hurry to get to her home. It is raining. She stands on the curb awhile, when a car comes along and she gets aboard. Perhaps it is crowded, and perhaps there is no one of the passengers gallant enough to get up and give her a seat. But she is nevertheless, standing under cover, out of the rain, and she is moving toward home. In the foreign countries a tired shop girl comes out from her work and stands on the curb. A To Superintend the canvass of an important Household necessity in every Hotel and private family. Exclusive control. Profits, 200 per cent. car comes along; it is full, and she is not moving toward home. That is the only difference between the two systems." Surely if standing in a street car and holding onto a strap is so healthful and beneficial, much more Direct from Manufacturer to Cuscould be gained by taking out all the seats and forcing all passengers to turn strap-hangers. Then too, think of the increased capacity of the ordinary street car if the seats were removed and all passengers rode standing. - Springfield Union.

Some business men have an idea that bandbills and dodgers are superior WARES. to newspapers as advertising mediums, Handbills are good in their way as auxiliaries, but they are no more to be compared to the advertising columns of a newspaper, than a pushcart peddler on Broadway is to be compared with John Wanamaker's great emporium. The peddler attracts attention for a moment if he be an expert, but the great store We require only a small deposit as a basis to trade on. \$30.00 will carry 1,000 bushel Wheat, 3c. \$20.00 will carry 1,000 bushel Corn, 2c. strings of those whose trade is worth strings of those whose trade is worth having. The handbill is crumpled in the hand and soon thrown aside. The newspaper is carried home, read and reread and filed away. There is something besides the advertising thereentertainment, information-which adds value to the advertising beside which it is placed. Advertisements are read now more than ever before, sometimes before what is commonly known as news, for advertisements are sometimes the latest and most vital news, vital to every-day life. The headlines of an ad. can be made as attractive as the headlines of a wedding, and the bargains offered as alluring as the wedding feast. The business man who talks to the readers of a newspaper as he talks to the customer in his store is the one who wins. Use handbills and posters if you wish, but place your great hope for returns in the columns of the favorite newspaper. -Dansville Advertiser.

There are many

men in the suburbs of Boston whose time during banking hours is fully occupied, either in their own town or in the city, and there are many women who come to Boston infrequently, but who would find it greatly to their advantage to have a bank account with the Old Colony Trust Company.

To meet these conditions we have adopted a system of banking by mail. Accounts may be opened and deposits made by mail and these deposits will be acknowledged on the day of their receipt. It is not necessary to send the pass book with deposits, or to be balanced, as statements showing the condition of the account are mailed on the first of each month with the cancelled checks

QUESTION OF HUMANITY

Any Proposition Arising Out of It That Gives Advantage to One Contending Party Over Another Cannot Be Justice

London, April 8 .- Baren Suyematsu, former Japanese minister of the interior, has written an interesting and significant article for The Outlook as to the conflict between Russia and Japan under the heading: "War and Indemnity-the Japanese Claim." The whole trend of the article is intended to show that Japan will carry on the war until Russia consents to pay indemnity. The baron says: "A canon of the Japanese Bushido is,

one should not unsheath the sword unless in case of absolute necessity, nor restore it to its sheath unless one is totally overcome or has secured equitable satisfaction for one's cause.' This Transportation of pupils at public is our ideal in international intercourse. The sword of Japan is drawn sheathed has scarcely been attained. We want a peace which will secure tranquility in the far east for at least generation or two.

"The world should know that in the present war Japan staked her very existence, whereas with the enemy it was made responsible in equitable accordance with the nature of the affair?"

The article cleverly figures out the righteousness of Japan's position in demanding indemnity as a basic condition and controverts the idea which, the writer says, he finds prevalent outside of Japan, that Japan is willing to manity's sake an armistice should be concluded with a view to negotiating peace. It is all very well to talk of humanity, but no injustice must be perpetuated in the name of humanity. BANKER PHILLIPS' DEATH

Found to Be Due to Drowning -- No Evidence of Foul Play

Lynn, Mass., April - Susplcion of foul play in connection with the death: of David K. Phillips, a reputed millionaire of Swampscott, was dispelled when Medical Examiner Pinkham of Lynn held an autopsy. He found that Phillips' death was caused by drowning, but that there was no evidence of foul play.

The cause of Phillips taking his own life is a mystery, but it is thought he must have been temporarily insane, as it is believed there is nothing about his affairs that would have made him want to end his life. What made many persons think that Phillips might have been murdered was the fact that when his body was found his overcoat, undercoat and vest, collar and necktie, his diamond-studded gold watch valued at about \$1000 and a considerable sum of money were missing. The vest, containing his watch, was washed ashore near the spot where his body was

After the autopsy Dr. Pinkham said that drowning might have been accidental or it might have been by suicide, although the circumstances would indicate that the drowning was deliberate. Dr. Pinkham said that the lungs contained water. An examination of the brain showed it to be

"The man's a born idiot," he said. 'Why should Ireland run the risk of getting his neck into a noose for a second crime?"

"But failing Ireland," replied Brendon quietly, "there remains Margery," "That idiot of a girl! Yes?"

George detailed his reasons for beieving Margery's guilt. Again Derrington sniffed. "It's all supposition. If the girl came into the room, if the stiletto were on the table, if Mrs. Jersey scolded her into a fury. Pah! I don't believe it."

"And you really wish to find the assassin?"

"I should like to know, out of mere curiosity. But if it is your opinion that things should be left as they are, why, Bawdsey can take his thousand pounds and sail for America whenever he

After this conversation George took his leave. Dorothy was out of town, so he could not visit her. After the interview with Ireland in Derrington's library Mrs. Ward had found it convenient to go down the country. She felt that she was in an unpleasant position. Not that there was any danger of her being accused of murdering Vane, but if the police got hold of the story they might make inquiriesin fact, they certainly would make inquiries-and then the disagreeable fact would come out that Miss Bull was her sister. Mrs. Ward knew that she had not behaved well to Jenny and that if the truth were known her friends would blame her. As Mrs. Ward did not like blame and disliked to have her actions criticised, she went down the country, saying to Dorothy she desired a change of air. Lord Derrington wrote a note to Mrs. Ward after George had departed.

Funeral Services Held on Saturday

from Calvary Baptist Church.

Daniel F. Tinney, who died April 5 at their home, 229 Granite street, was held on Saturday. A short service was held at the house by Rev. Mr. Brady, after which the remains were conveyed to the Calvary Baptist church where many friends met to pay their last respects to the deceased. The funeral services were conducted by the pastor, Rev. Mr. Brady, assisted by Rev. Mr. Barr of the United Presbyterian church. The services were solemn and impressive. Mr. Brady spoke highly of the christian character of Mrs. Tinney, and sickness she bore all with patience and fixed her faith in Christ the great

physician. The flowers contributed were most beautiful, including a wreath of pinks, violets and roses, inscribed "Wife, from the husband.

MAKING OF TRUSTS

American Beauty Rose

New York, April 10 .- In the course of his sermon in Plymouth church, time. Brooklyn, yesterday, Rev. Dr. Newell D. Hillis referred to the gift of \$100,-000 made by John D. Rockefeller to the on Wednesday. American Board of Foreign Missions and to Rockefeller's son. He said in

"The saddest words that have been written in this generation were spoken Patriots' day, and in the afternoon at before Brown university by a young man who is to inherit one of the greatest fortunes in this country. They were spoken in defense of the trusts. Listen to them:

"The American beauty rose can be produced in all its splendor only by sacrificing the early buds that grow up around it.

"The rose has one thousand bulbs Beauty the gardener goes around it nomic argument this young man tells small business men must be snuffed out of existence in order that his American Beauty, the trust, may be produced. Listen to Christ: 'Let the strong bear the burdens of the weak': and again: 'Give, and it shall be given unto you.'

"These words in defense of the trusts are the most heart-breaking things in literature to those who know what is going to come in the future. Can you wonder that after that, when a man by an old-fashioned barn dance. gives gifts, we have no gratitude to re-

With so much depending upon the issue, they argue, both countries have mutual interests in avoiding an actual test, and it is not impossible, therefore, that a new move in the direction of peace may come just as the world expects to hear the call to quarters for the greatest naval battle of

modern times. Certainly the spirits of the war party have been greatly raised by Rojestvensky's success in penetrating to the Chica sea; and the prospet of a naval battle, even with the odds against a Russian victory, which would change the entire complexion of the situation, has aroused something like a flash of

enthusiasm in many Rossian breasts. Some naval officers express the opinion that Rojestvensky, having now safely navigated the straits, instead of sailing north to meet the Japanese, can also carried two postoffice maps and afford to calmly await Vice Admiral Nebogatoff with his division of the squadron, who could arrive there in

without comment, The Sviet being the only exception. This paper views the news from Rojestvensky as an aus-

picious prelude to a decisive battle. The Sviet expresses the hope that Rojestvensky is destined to turn the tables and that even in case of defeat some of his vessels will be able to break through and reach the Japanese

Fifty-one ships of Rojestvensky's second Pacific squadron passed Singapore Saturday. The most important fighting vessels of the squadron, including the battleships Kniaz Souvaroff, Alexander III.. Borodina and Orei with their complement of cruisers, torpedo boat

destroyers, etc., did not arrive, and their whereabouts is totally unknown. The surprising fact is that Rojestvensky has been able to steam so far north in the China seas, as present reports indicate, without having been

met by the Japanese admiral, Togo. The cause undoubtedly is that the Japanese commander discredited the probability of the Russian admiral directing his course through the Straits of Malacca, and then rounding the Singapore cape, as that route is the most obvious, the shortest and the reg- mankind would have to ular commercial ship channel to the China seas, and thence north to Vladivostok or to Port Arthur.

CHAPTER XXIV.

was the next day that George went to see Ireland. At the door he was informed that Ireland had been very ill with his heart and that the doctor had been called in. Nevertheless Ireland would not obe; the advice of his physician and stay in bed. He was up and dressed as usual and in his study.

George entered the large room and saw his former guardian seated at his desk as usual. The man looked very ill. His large, placid face was extremely pale, there were dark circles under his eyes, and he even seemed to have grown lean. His clothes hung loosely on him, and he did not rise 10.377 when George entered.

"Excuse me, George," he said, with an attempt at cheerfulness, "but I am not so well as I might be." "You are looking ill-very ill," said

George, taking his seat. Ireland nodded. "I can't live long," he remarked in his heavy voice. "So the doctor informs me. My heart is extremely weak. It's as bad as it we'll can be. For the last few days I have deviated sadly from my usual habits. I have not taken a walk, and my system of life is quite upset. It's the beginning of the end." He paused and "You are looking well,

George." "I have every reason to. Mrs. Ward has consented to my marriage."

"With her daughter? How is that?" "Well, the church where my parents were married has been discovered The marriage has been proved beyond a doubt. My grandfather has seen the copy of the certificate and now holds

"Very pleased. He is now as friendly toward me as he has been hitherto

hostile." Ireland nodded, breathing heavily. "I thought he would be. He and I had a long talk about you on the day I called. That was when I saw Mrs. Ward and"-"You can go on," said George, see-

ing his hesitation. "I know the whole story. "What story?" asked Ireland suspicicusly.

"The story of what happened at San Remo. Mrs. Ward I know was Violet Howard, and her sister Jenny is Miss "Yes. Poor Jenny, she was the bet-

ter of the two, and now she drags out a miserable life in a London lodging house. While Violet, who is a bad woman"-"And the mother of Dorothy," inter-

rupted George imperiously. "Say no more, sir." "You are quite right. As I can't say good of the woman, let me say no bad.

Well, you know how she loved your "I think she flirted with him, but it was Jenny who really loved."

"And look at her reward!" said Ireland, with a deep sigh. "Those who try to do their best always come off worst. I loved your mother, George, and I have been a lonely man all my life.'

It was a sad case. George wished to get at the truth, but he was so sorry for Ireland, who had passed so many miserable years, that he did not like to inflict more pain. Nevertheless it was necessary to learn if Ireland had really visited Mrs. Jersey on that night so as to set Bawdsey's mind at rest. If George did not learn the truth Bawdsey might attempt the discovery, and he would handle the old man in a much worse manner than George was likely to do. While pondering how he could set about his unpleasant task George was saved from making the first step, always the most difficult, by an observation from Ireland, which paved the way to an explanation.

"How did you discover the church?" he asked idly.

"In rather a queer way. Lola Velez"-Ireland opened his eyes, which had been closed, and looked up. "Wno is Lola Velez?" he asked anxiously. "She is a dancer whom I helped-oh,

quite in a proper way, Mr. Ireland. You know the name?" Ireland, contrary to George's expectation, nodded. "There was a woman in San Remo about the time of your father's death. She was called Velez and was in love with him."

"He seems to have been a fascinating man," said George, smiling, to set Ireland at his ease. "But this Lola is the daughter of the woman you mention. It was she who found the church."

By this time Ireland was quite awake and keenly anxious for details. "How did she learn its name?" he demanded quickly.

Mrs. Jersey." was holding, and, leaning back in his your father's death." chair, looked anxiously at George. "What do you mean?" "Well," replied the young man, keep-

ing his eyes fixed on Ireland's face, "it seems that Mrs. Jersey left a confession behind her as to what took place at San Remo." "Who has that confession?" "I have! I got it from Lola!"

"Arrested?" "Yes. I wonder you did not see the case reported in the papers." "I have been too ill to read the papers lately," said Ireland, looking round the room in rather a helpless way, "and none of my servants told me. What happened?" "Oh, Lola was let off with a small fine. She is now back dancing at her music hall. She gave the confession to me."

"Did any one else see it-the authorities?" "No. You can set your mind at rest, Mr. Ireland. I got it from Lola before she was taken to prison. No one had seen it but myself and Lord Derring-

Ireland drew a long breath of relief. "You made a strange remark just now, George," he said, not looking at the young man. "You told me to set my mind at rest. Why did you say that?" "I have read the confession," said

George quietly. "Then you know?" "I know that my father's death was due to an accident." "What! Did that wretched woman

tell the truth?" "She told the truth." "And she did not accuse me of hav-

ing murdered your father?" "No. She did not. I suppose she thought it was as well to go to her long home with as few sins as possible on her conscience."

"Thank God for that," said Ireland. "George," he said in faltering tones, "I have suffered greatly on account of that most unhappy accident. Your father and I were not very good friends, as I found it difficult to forgive him for having taken from me the woman I loved. But at San Remo we got on better together. I stifled my resentment so that I might see as much of you as possible, George. Knowing that I was not on good terms with Vane, I thought that Mrs. Jersey might have accused me of the crime. She did try

to get money out of me." "So Bawdsey told me."

"Bawdsey. Who is he?" "I forgot you don't know. He is a detective who has been looking after the case on behalf of Lord Derrington. I learn from the confession of Mrs. Jersey that he is her husband."

"George Rates. I remember. She told me she married him and went to America. It was after her return from America that she tried to get money out of me. I refused. Not that I did not realize the danger to which she could expose me, but I knew that if I once yielded I would be in her power. Besides, I had a defense, as she got the stiletto from the woman Velez." "And it was with that same stiletto

that Mrs. Jersey was killed." "By whom?" asked Ireland. "Did her husband"-"No. We do not know who killed

her. Perhaps you may know?" "I!" Ireland looked genuinely surprised. "No. How should I know?" "Well," said George, rather awk wardly, "it seems that Bawdsey has got it into his head that you knew about this confession. That you were afraid it would be published after her death and that you went to the house on that night to get it. He doesn't exactly accuse you of the murder, but"-

"I don't know what else you would call his statements but accusations," retorted Ircland, with some heat, "but I never was near the house. I certainly though that Mrs. Jersey might leave some such confession, but I never asked her about it."

"Then you cannot guess who killed her?" "No. I was never near the house. I was in bed and asleep. My servants

will tell you so." "I need not ask them," said George quickly. "I never thought you were guilty, and I only came to receive your assurance so that I might tell Bawdsey

and prevent him troubling you." "If Bawdsey comes here I'll soon make short work of him," said Ireland sharply. "I am not afraid." "You need not be. Mrs. Jersey's own

"I don't mind even that. I would have faced the worst had it to be faced. I never was a coward except in "She found it in the confession of one thing." He paused and looked timidly at George. "I shrank from telling Ireland snapped the paper cutter he you how I was the unhappy cause of

"You were not the cause, in my opinion. Mrs. Jersey was the cause." "Well, I thought you would shrink from me did you know all." "I do know all, and I do not shrink

from you," replied George, leaning across the desk to shake Ireland's hand. "It was a pure accident and has been related by your enemy." "And how did she manage to obtain "I am so glad the truth is known to ron at last," faltered the old man. Quincy, March 17.

"I am dying. But what of that? am glad to die. I shall meet Rosina again after long, long years of sorrow. Go, George. We understand one another, and you have forgiven me. There is no more to be said. "There is nothing to forgive," replied

George softly. Then, to humor his old guardian, he departed. A strong grip of the hand was exchanged between them. George left the room and saw Ireland lying as still as any corpse. Only his lips moved, and they murmured continuously, "Rosina, Rosina!" He was true to the woman he loved to the very end.

George left the house, as there was nothing he could do, but he intended to call in again. Meanwhile he repaired to Amelia square to see Bawdsey. Derrington wished him to tell the de tective to stop looking after the case and discharge him from his employment. In his pocket George had a check for £1,000, and when this was paid the whole case was to be relegated to obscurity. The sooner Bawdsey married Lola and went to America the better, Derrington thought. And for his own sake Bawdsey would hold his tongue, seeing what a close connection he was of the dead woman.

Bawdsey was at home and saw George at once. He looked rather excited and could hardly keep his seat. "Well, Mr. Brendon," he asked, "what is it?

"I should rather ask you that," said George. "You seem excited." "Not very. Only I have been fortu-

nate in some business, and"-"What is the business?" "I'll tell you that later. What is yours?"

Dorchester Man Comes to Quincy for His Bride.

A very simple and pretty family A. M. wedding took place at 29 Pleasant street on Monday evening, April 10, when Breta Frances, youngest daughter of Mr. and Mrs. Wm. H. Mitchell of Quincy, and Curtis White, eldest son of Mr. and Mrs. A. R. Pierce of Dorchester, were united in marriage by the bride's pastor, Rev. Edwin Noah Hardy of Bethany Congregational church.

The house was prettily trimmed with palms, Easter lilies and white carnations, carrying out a general color scheme of green and white. At 7.45 P. M. the wedding party

CHURCH CHANGES

New Presiding Methodist Elder For Boston District

DR GALBRAITH CHOSEN

viously Removed by Conference--Zion's Herald Criticised

Melrose, Mass., April 11.-Rev. Dr. John Galbraith is the new Methodist presiding elder for Boston district, and Rev. James B. Brady is assigned to

Before an audience which filled the local Methodist church, Bishop Fowler of New York, the presiding bishop at the 109th annual session of the New England conference, announced the ap pointments of presiding elders and pastors for the coming year.

Two of the four presiding elders were changed, Rev. Dr. John Galbraith, recent pastor of the Bromfield Street church, succeeding Rev. Dr. W. T. Perrin in the Roston district, and Rev. Charles F. Rice of Springfield being appointed presiding elder of the Cambridge district to succeed Rev. Dr. Joseph H. Mansfield.

Among the many changes announced was that of the Rev. James B. Brady D. D., who for the past year has been acting as field secretary of the Preach ers' Aid society. Dr. Brady was assigned to the First church, Temple street, Boston, as assistant to the pastor, Rev. Franklin Hamilton.

Dr. Brady was removed from his position by the action of the conference last Saturday, when it was unanimous ly voted to abolish the office which he held. Dr. Brady declared that he had

Owing to a deficiency in the money appropriated for Dr. Brady's salary, which was to be raised by apportion ment on the pastors, the conference was his debtor to the extent of \$400, and it was voted that the treasurer be authorized to make payment in full at once, and provision would be made to raise the amount at a later date.

Zion's Herald, the official organ of the Methodist church, came in for a severe criticism at the conference session. Rev. C. H. Stackpole, for the committee on the paper, made a report in which he stated that at present the persons saw George G. Bauer, a buyer paper is not official in its utterances and for Arbuckie Bros., sugar refiners, leap the conference is not responsible for to death under an elevated train. His what it says. "The conference has absolutely no voice in its manage ment," said Stackpole, "and I would strongly recommend that a committee Red be appointed by this conference to report on just what the exact relation is between the Wesleyan association and the New England conference."

His report, embodying this recommendation, was adopted and the committee as appointed by the bishop consisted of Revs. Rice, Stackpole, Skene, Pickles and Blackett.

L. W. Staples, in making the annual report of the committee on sustenation fund, from which ministers who do not receive a sufficient salary are helped, recommended, and the conference adopted, that it should be suggested to the appointing powers that churches that cannot raise at least \$500 for the support of pastor should not be allowed the full services of a minister.

A. P. Sharpe of Somerville, who for more than 16 years has served the conference as statistical secretary, was presented with a purse. Gifts were also presented to Rev. Dr. W. T. Perrin and Rev. Dr. J. H. Mansfield, the two retiring presiding elders.

The report of the conference treasurer, which was given at the evening service, showed that the total collections of the conference for all benevolent causes during the past year had been \$88,000, a slight gain over last

The engine crews jumped and with the exception of Engineer Holmes of the freight train escaped serious injury. Holmes landed in a barbed-wire fence and was badly cut. Both locomotives were wrecked, but the cars were not greatly damaged, only the forward truck of the baggage car leaving the rails.

The accident was due to a misunderstanding as to which train had the right of way. Conductor Munson of the passenger train says that his orders gave him a clear track south of West Rutland. London, April 11.-Forecasts as to the expected naval battle are put out was destroyed by fire, and with it went of joint by the unexpected division of the entire town, consisting of about 150 the Russian fleet. The vessels that company houses and millions of feet of passed Singapore on Saturday included

The vessels reported on Saturday loss is obtainable. were sighted Sunday at anchor off the Anambas islands, 150 miles northnortheast of Singapore, and about 650 miles from Batavia. The presence of the battleships is, however, contradicted by one dispatch from the island of Java, which says that supposed Russian vessels sighted off Muntok were the Dutch East India squadron.

It is possible that the Anambas islands are the rendezvous for the whole pelled the other men to quit. They atfleet, which may have been divided to puzzle Togo's scouts, and delay an attack. When the Russian ships passed Singapore they were going in a northeasterly direction, and if the Russian admiral desires to put his vessels in better condition before meeting Togo's fleet he must do one of two things.

The easier and less perilous course would be for him to make direct for the port of Saigon, French Indo-China, which is only 750 miles to the north. Whether France would allow the Rus-1905 sian ships to remain for any length of time at Saigon is problematical, but the complaisance of the French government previously in allowing the Russians to stay at Madagascar and Jibuti has led in some quarters to the beseems nothing for him to do but make the Japanese vessels.

Balington channel, 200 miles wide is between Luzon, the northernmost big island of the Philippine group, and Formosa, while Formosa strait, less cording to recent advices, expect the 2000 miles.

As the Russian warships are reported to be travelling at a speed of eight miles an hour, it may be a fortnight before this point is reached. Should Rojestvensky, eluding the Japanese, gain the waters of the Pacific, he might try to reach Vladivostck by way of La Perouse strait, a narrow waterway between the northernmost Japanese island and Sakhalin. From Singapere to Vladivostok in a straight line is 2500 miles, but the course the Russtaps would have to follow would greatly increase the distance.

Japanese Gruisers In China Sea Manila, April 11.-The German steamer Struve, from Saigon, reports that on Sunday she sighted two Japanese cruisers in the China sea headed for Sinapore.

Te Keep Tabs on Hostile Fleets Washington, April 11.-Admiral Train, the commonder-in-chief of the Asiatic station, cables that he has dispatched the cruiser Raleigh and several torpedo boats to the island of Palawan to observe the movements of the hestile fleets which must pass through those waters. This direction is under the broad instruction sent some months ago to the commander of the Asiatic station to take all proper steps to guard against any violation of neutrality by either belligerent in the Philippines. There is no dock in the Philippines big enough to handle any of the great Russian battleships, so that it will not be necessary for the state department to decide whether or not the Russian vessels can dock in our ports to clean their bottoms. There is a drydock at Saigon which would accommodate the Russian ships, so that the French government is liable to be confronted with this question.

Fine Features of Washington's Vast Railway Station.

RICH IN ARTISTIC ARRANGEMENT

Structure Is to Be Model of Terminal Facilities and Architecture-Main Building Will Be Built of White Granite-General Waiting Room to Be One of the Finest In the Land.

One of the largest and most important piece of railroad work now in progress in the country is the erection of a new Union station in Washington and the construction of the necessary approaches to it, says the New York Tribune. These terminal improvements will cost about \$16,000,-000, and the Baltimore and Ohio railroad will bear a large proportion of the expense. An addition it will have to lay a lot of new tracks and make other improvements required in the new terminal scheme, involving an expenditure of about \$4,000,000. This means that the Baltimore and Ohio railroad will spend about \$10,000,000 on the entire work. The present expectation is that the work will be completed by the fall of 1906, and one of the greatest achievements and benefits will be the elimination of every grade crossing, as all tracks will go either over or under the street crossings. The terminal improvements are being made by the Baltimore and Ohio railroad and the Pennsylvania railroad. The new station will be of monu-

mental design and will stand on low ground at Massachusetts and Delaware avenues. Its construction involves some decided changes in street grades. To simplify these changes to some extent a plaza 500 feet wide by 1,000 feet long will be formed in front of the building. It will be decorated

with balustrades, terraces and fountains. To form the plaza and bring the streets to the proposed new level will require about 75,000 cubic yards of earth, the fill being thirty-five feet over a considerable area. Nine streets will lead into the grounds, three of which will be new and two modified to better fit the plaza scheme. Through these radiating streets and avenues large crowds will be able to enter or leave the station without difficulty, while the plaza will provide ample space for massing troops and taking care of the

Commissioner.

Unitarian Supper.

Walter E. Simmons Elected for President Next Year.

Edward McSweeney, of Boston, formerly commissioner of immigration, was the speaker Tuesday evening at the Unitarian Club supper at Wollaston. His subject was "Immigration," and e treated it ably, and interestingly.

Mr. McSweeney said in part: We have room in this country for 160 millions mere of immigrants. The figures concerning crime, pauperism, etc. which some statisticians give us, remind me of the schoolboy who on being shown a drawing of a crater in eruption and asked by his teacher what it was, said, "I don't know what it is, but it looks like hell."

Statistics are worthless in dealing with the foreign question. I know because I have prepared a great many ly after his wife died. myself. Some immigrants are counted ten times; that is, every time one returns to this country after visiting his old home in Europe he is counted. Some of the people who come to us from Italy have grievous faults, but also the potentialities of strong citizenship

This country owes much of its prestige

to foreign immigration. I am not satisfied with the progress my own race, the Irish, are making here. Their advantages and numbers in Boston are great, but they own only one-tenth of the wealth. Pride of race and religious devotion must be dominant in any race, or it must pass on. If we Americans are not to endure as a people, it is because of shortcomings in these two respects. The Jew has

preserved an indestructible nationality through the ages, because of loyalty to ace and devotion to his faith. Those are the reasons why a Chinaman is never anything but a Chinaman

He never becomes a Christian except for present and material purposes. The Japanese nation has no promise of perpetuity, for Shintooism is not religion but a superstition.

The triumph of Japan over Russia in the present struggle, which we so glibly prophesy, would really prove a bad thing for the United States. We shall then have to fight Japan, not with Maxim guns but with factories. She ing to China the things that great empire needs and the Japs can do everything a little better than we can

except hard manual labor. The opening of the Panama door to the Chinese last week, through a technicality in the law of exclusion, is fraught with grave danger to the a lowering of the moral tone and the creation of "superior" castes among us for protection.

Aside from the Chinese, immigration does not lower American wages. On the contrary, if you stop immigration fully for five years wages will de-

Mr. McSweeney offered to answer any questions that any one cared to ask, and before the adjournment several members took advantage of this offer to learn more about the subject of "Immigration.

It was the last regular meeting of the Wollaston Unitarian club for this season. The club assembled at 6.30 and after an excellent roast beef dinner held a short business meeting. The reports of the secretary and treasurer 1905 were read, and the following officers were elected for next year:

The annual banquet of Bethany Brotherhood at Bethany church on Tuesday evening was a most enjoyable Mrs. William M. Moon of Hancock one. It was largely attended; the turstreet died Tuesday evening of typhoid key supper by the ladies of the church pneumonia, after a brief illness. Rev. Allen Stockdale followed, his theme being:-"Shall the corners of a man's mouth turn up or down." No short synopsis of his address of an hour in length would do justice. He kept his audience good natured from first to last, putting considerable dramatic effect into his remarks and illustrating often with facial expressions which

were apt and amusing. It was a talk in advocacy of optimism rather than pessimism. The speaker's attention had first been called to his subject by two groups of statuary. In the one illustrating malice, discontent, envy, chagrin, mortification, etc., the corners of the mouth all turned down. In the other illustrating love, happiness, prosperity and contentment, the

corners of the mouth turned up. Transposition of the mouths would make entirely different faces, he said. Much of our life is told in our face, not always in the words we say but in the way we look.

The speaker illustrated in turn-love, fear, jealousy, contentment and scorn. Things that tend to cause the corners of the mouth to turn down are: Our overstrained nervous condition resulting a badly dressed fellow who wanted help from the demands of the day; also He had brought a recommendation, the worry. Most potent to turn up the effort of a poor woman. It ran thus: corners were: Love and appreciation of "Sier i have Know this man nerly child life; love of fun; love of struggle years and I have not seen him eny drefand work. SKELETON IN WOODS

Found to Be That of Man Who Killed Himself Long Ago

West Granby, Conn., April 12.-The mysetery of the disappearance, 21 years ago, of Lewis Case, a farmer, doubtless was cleared up yesterday afternoon by the identification of pieces of the clothing of a skeleton found in this town by the two sons of William Ruic.

The two boys, while walking through the woods, noticed a skull lying between two large boulders, and in making an investigation found a skeleton cressed in weather-beaten clothes. Some of the clothing, which was still in a fair state of preservation, was positively identified by Mrs. Case as belonging to her husband. Among the things found in the pockets was a fourounce bottle of laudanum partly full.

The theory is that Case, who was despondent when he left his house 21 years ago, committed suicide by drinking laudanum, choosing the secluded place in which the skeleton was found to die. It is in a remote part of the is rather an attractive house. town and resting as it did in a crevice formed by two large boulders the body might never have been discovered. Case was 51 years old when he left his home and family.

THE CULEBRA GUT

Controlling Element In Construction of Canal

WORK ACTIVELY PUSHED

Chief Engineer Wallace Still In Favor of Sea Level Canal--Experiments Will Later Reveal Best Course to Pursue

Washington, April 12.-John F. Wallace, chief engineer of the isthmian canal commission and a new member thereof, says that there are now practically 5000 men engaged under his direction on the engineering and construction work of the canal. During the last 90 days laborers have been coming in freely from Costa Rica, Jamaica and the Barbados.

plans and the organization of the force each month the output of material is increasing. The work of the sanitary department is beginning to show positive results. The water supply systems also are being installed at various points along the line of the canal work. Several large hotels for the accommo dation of the Americans are nearly completed. The employes are becoming more and more contented as conditions are improved, and there has continued to be a steady accession to the

Mr. Wallace says that every additional month he is permitted to continue his investigation and experimental work the more reliable will be the data available for use in deciding on a plan for the canal. Thus far he has not committed himself to any definite plan beyond his official recommendations to the former isthmian canal commission. He takes the ground that no plan should be adopted which would prevent the ultimate and eco nomical construction of a sea level canal, should such be decided on at any stage of the work, or even after the canal has been constructed.

In the event that the expert engineers who will be called on to recommend a plan decide that it will be feasible from a physical and engineering standpoint to construct either a sea level canal or one at a higher level, Wallace says then the decision will resolve itself into one of general na-

it would require about two years to machinery to complete the excavation for a canal at a 60-foot level, work which would be necessary in any event. During this period ampie time will be afforded for investigation and thorough analysis of all the elements or factors that go to make up the problem as a whole.

Meantime the excavation of the cen-Quincy, Mass. tral Culebra cut, which is the controlling element both as to time and cost, will be pushed vigorously with machinery, which is being manufactured as rapidly as possible and sent to the isthmus.

The investigations being conducted include diamond drill work along the entire lien of the canal, the character of the formation being revealed in this manner to a depth of 40 feet below the surface. These borings will give absothe material to be encountered in the

A report covering all that has been done up to Feb. 1, last, was made to the former commission by the chief engineer, and it is understood that it was largely on the information contained in this report that the engineering committee of the former commission predicated its recommendation for a sea level canal. In his report Wallace did not actually recommend a sea level canal but held the same views then as now. As to the necessity of a tidal lock in a sea level canal. Wallace said it was an undetermined question as to the real effect of tidal action in the operation lish theoretically. A tidal lock might or might not be necessary. In any case ma side, several miles inland from the mouth of the canal.

Mr. Wallace is attending the daily meetings of the commission and has gone over the ground on these questions thoroughly with his colleagues.

The strikes at the Da vol and Granite mills are being fought on their merits, and the weavers are steadily returning to their work. The significant feature is the return of many of the weavers who left when the strike

was declared. Many of the hundreds of operatives who left the city last fail are now com ing in from Canada and from the western islands. Two mills in the southern section of the city, which have suffered from a lack of weavers for many the first time since the strike was

It is expected that Mrs. Smith will be sent to the Tombs, where Nan Patterson now is, after her arraignment on the conspiracy charge. Smith will have not only to answer the conspiracy charge, but also will have to appear for contempt of court before Justice Newburger in the supreme court.

"I have brought them. They can now call them," said Rand last night, referring to calling Mr. and Mrs. Smith by the defense in the Patterson case. On the way to this city Mrs. Smith declared that she and her husband were coming east anyway. She was arrested their mother was sick in Washington and that she needed her more than did her accused sister. She declared that at the time of her sister's trial she was ill in Montreal and especially at the crucial time of the trial she was on the operating table in hospital there. Since then, she said they had been making every effort to go back to New York.

Herbert R. Limburger, retained to defend the Smiths by J. R. Patterson had a long conference with J. M. Smith last night. Later Limburger said: "I told Smith that it would be best for him to tell everything. There is nothing he told me that can be Mass to the hurt of Nan Patterson. Payment

is the fixed rule of the American Surety Company.

Without quibble or technical objection, and with only such delay as careful examination of proof requires, losses are promptly paid, the check being often mailed the same day the claim is filed.

On Personal Security, recovery necessarily takes time; with the American Surety Company, recovery upon proof of loss is certain and immediate. Such quick action often saves a bank from closing its doors, or a firm from bankruptcy.

Persons, firms and corporations requiring bonds from their employees, should write to the

TRUNKS IMPOUNDED

Contents May Shed Light on Doings of Alleged Beef Trust Chicago, April 12.-An investigation by the federal grand jury which is inquiring into the working methods of the alleged beef trust of a much deeper nature and a wider scope, it is asserted, is to result from the examination of the contents of the eight trunks taken from the safety vaults in the First National bank building.

When these trunks were opened, it is said, the entire secret transactions of the Aetna Trading company, a corporation through which the alleged secret business of the packers was transacted, were revealed to the jurors, and as a consequence many new witnesses will be subponaed.

The trunks and contents have been impounded on an order by Judge Sanborn, so that no one by legal process can obtain possession of them. Among the names of the new witnesses subpoenaed yesterday are said to be those of G. H. Godfrey, alleged secretary and treasurer of the Aetna Trading company, and R. H. Cowan, another official of the company. Godfrey and Cowan, it is asserted, left Chicago the day the said all trace of them was lost.

a sorely tried woman." Before the astonished George knew what she was about he felt a pair of cold lips pressed to his own. The next moment she had pushed him out of the room and had locked the door. That

was the last George saw of her. Whether Margery had agreed to die with her or whether Miss Bull, knowing what a miserable life the girl would lead after her death, compelled her to take the poison will never be known, but when the door was burst open the two women were found on the floor in one another's arms. On the table was an empty glass, and it was ascertained that Miss Bull and Margery had taken prussic acid. Bawdsey entered the room an hour after the death, alarmed by the sllence. He found that his prey had escaped. Miss Bull was buried under her false name, and Margery was buried with her. Nothing of Miss Bull's sad past or of her killing of Mrs. Jersey came to light.

Six months later George Vane was seated in the library of the mansion in St. Giles square. It was after dinner, and Lord Derrington occupied his usual chair. The old man looked brighter and happier than he had looked for many years. Daily George grew a greater favorite with him, and on the morrow George was to be married. Lord Derrington had insisted that as it was his last night as a bachelor George should dine alone with him and would not admit even Walter. "It's the last time I'll have you all to myself, George," said the old man piteously. "After tomorrow Dorothy will possess you."

"Not at all," replied George, "you will have us both. We will come back from the honeymoon in a month, and then we will live here. A lady in the house will make a lot of difference. You won't know this place when Dorothy is flitting about."

she has become religious." "Bah! That's only a phrase. Poor Miss Bull!" said Derrington. "I like to think of her under that name. She had a sad life. I don't wonder she killed herself. Do you think she was

mad, George?" "No. But I think the memory of her wrongs, which were all caused by Mrs. Jersey, was too much for her. She was mad for the moment, but she told me the terrible story in the calmest manner."

"And who came in at the front door that night?" asked Derrington.

"No one. After the murder Miss Bull opened it to fly-panic struck, I expect-but Margery came downstairs and stopped her. Miss Bull closed the door and remained to face the worst." "Well, she is dead and buried, and the scandal is laid at rest, unless that Bawdsey revives it."

"Oh, you can trust Bawdsey," said George, smiling. "He and Lola are quite happy, and she has almost forgotten me. I got a letter from Bawdsey the other day. He is acting as his wife's agent, and they are making a

Reception to Miss Julia E. Underwood.

She Now Places Herself in Hands of Her Friends.

A Boston paper reports that the April 15 to October 15. golden anniversary reception to Miss Julia E. Underwood has been "abandoned," but the facts are it has only been postponed for a few weeks, allowing more time to reach former pupils, associate teachers, and friends. Plans are maturing for a grand reunion.

In the letter of Miss Underwood of April 5, was the following: "I positivey decline the honor at this time." The time was not auspicious; the chool term ending this week has been anusually long and fatiguing, with only a week's vacation since the opening in September. Then the bereavement of close friends has made it doubly hard NO, 1566 HANGUCK STREET for Miss Underwood.

After the spring vacation, teachers and pupils will be refreshed, and in response to irrestible demands it is not surprising that Miss Underwood has WEDNESDAY, APRIL 19, 1905, reversed her decision. She writes as

Editors of the Daily Ledger: matter in the hands of my friends.

Yours truly, Julia E. Underwood. Quincy, April 12, 1905.

At no time has the committee given up the proposed reception, but it had a little setback when on April 5 Miss Underwood sent her first letter to the press. Now that her consent has been assistance of volunteers, will continue the work with renewed energy and pleasure, and ask the cooperation of all the people of Quincy, especially former pupils of Miss Underwood, Quincy Quincy, Mass. friends of education generally. The teachers of today and past years, and date will be announced later.

The warrant was issued we require only a small deposit as a basis to trade on. \$30.00 will carry 1,000 bushel Wheat, 3c. \$20.00 will carry 1,000 bushel Corn, 2c. following an autopsy performed upon the bodies of William and Ella Shanley, 3-months-old twins, who died Tuesday. Medical Examiner Pegram gave as his opinion after the autopsy that the 82 Devonshire Street, Boston, Mass. children died of chronic formaldehyde

poisoning. MacDonald was arraigned at a special session of the district court shortly after 11 o'clock last night and was held for trial on April 28 in \$10,000 bail, which was furnished by friends of the prisoner. He was also arraigned on a charge of three violations of the milk there are likely to be frequent rumors laws and held in bonds of \$2000. Macof great naval battles. The report of Donald pleaded not guilty on all the charges.

MacDonald had supplied the Shanley family with milk for five years. W. O. Scott, the city milk inspector, examined samples of the milk delivered to the Shanley family and milk taken frem MacDonald's cans. In each instance, it is said, forma'dehyde was found, as well as analine coloring, which made the milk appear thick and creamy.

The warrant against MacDonald charged him with the manslaughter of Ella Shanley. An inquest has been ordered by the coroner.

The two babies, whose only food was the milk supplied by MacDonald, were aparently in excellent health Tuesday, but later in the day were taken suddenly ill about the same time and died within five hours.

GLADDEN'S COMMENT

Pirate's Booty Acceptable to the American Board

Columbus, O., April 13.-When informed of the final action of the prudential committee accepting the Rockefeller gift, Rev. Washington Gladden, D. D., authorized this statement:

"The prudential committee has placed itself on the broad and intelligible position that all gifts must be received, no matter what may be the character of the giver, nor by what immoralities or crimes his gains may have been gathered.

"No discrimination is henceforth to be made. The pirate or the train robber may bring his booty to the treasury of the American Board and it will be evening and hear the petitioners for a thankfully received and, if sufficiently large, will be described as a 'magnificent gift.'

"By the decision the prudential committee rejects the word of Him who said 'I hate robbery for burnt offerings,' and reverses the ethical judgment respecting the rewards of iniquity which has guided Christendom hitherto. It openly proclaims that money to which the giver has no moral right may be rightfully given to a missionary society if only his motive is to do good with it; and it assumes the power of judging the motive of the giver. It the crack infielder, to hold down the knows and declares to the world that second bag. Avery was formerly of the there can be no motive but that of Bigelows and there promises to be some benevolence in the bestowal of this gift. excitement when he comes to the bat.

"That is a great testimony from such a high authority. From this decision the appeal will now be taken to the conscience of the Congregational churches and the conscience of Christendom.'

Could Not Return the Money

Boston, April 13.-The retention of John D. Rockefeller's donation of \$100,-000 for the work of the American Board of Commissioners for Foreign Missions, decided upon by the prudential committee, was confirmed by the issue of a formal statement of the reasons which actuated the committee in accepting the report of the special sub-committee that the money be kept. This statement may be summarized in a sentence, as arguing that the return HIGH Scoring Barred Piymouth Rocks, a sentence, as arguing that the return mated for best results. 75c per 13. of the money would be morally wrong and legally impossible.

> Gotham's Great Hippodrome New York, April 13 .- The hippo

drome, New York's newest and largest place of amusement, was opened to the public last night and every one of the 5200 seats was taken and wherever there was standing space it was filled. The performance began with the spectacle, "A Yankee Circus on Mars," following which came a spectacular production of American Civi. war incidents. The great hippodrome tank was utilized in the battle scene, the forepart of the stage sinking, this process of submersion continuing until the stage represented a river. With mounted troopers represented in retreat, horses and riders rush forward and plunged into the water, many feet deep. The magnitude of the presentation of the battle made a very effective scene.

"Thou" and "You" Abroad. The only safe rule for the Englishman abroad is to stick to "you" in French or German. "Tutolement," or "theeing and thouing," would imply a deliberate intention to insult, a patronizing assumption of indisputable superiority to the person addressed or such familiarity as is proper only between lovers, parents and children and intimate friends. At one time every individual was "thou," but after flatterers began to call Roman emperors "you" (monarchs remain "we" to this day) the polite plural spread until in Louis XIV's time only servants were "thou" in France. The restoration of "thou" as a pronoun of familiar endearment is due to Rousseau and the revolution. It has survived throughout in poetry and in addressing the Deity.

The Buried Bell. Near the little village of Raleigh, in England, there is a hollow, said to have been caused by an earthquake centuries ago, which is said to have swallowed up a whole village, including the church. To this place the villagers of Raleigh were in the habit of repairing every Christmas morning, putting their ears to the ground and listening as they asserted, to the church bell ringing beneath them! What was real ly heard was the bell of a neighboring church, the sound being borne along the surface of the ground. This cus tom was in existence, we believe, as late as half a century ago.-London Tit-Bits.

It has been stated that the oyster's deadly enemy, the starfish, has been most successfully subdued in the Long Island beds by putting down within its reach an instrument very much like a long handled house mop. As soon as touched by it the starfish invariably grasps the strands and can be captured and destroyed by the thousand, for it will not let go until it has been held out of water long enough to secure the impossibility of its return.

Japanese "Silent" Music. A curious ceremony is performed in Japan by the court musicians at cer tain Shinto festivals. Both stringed and wind instruments are used, but it is held that no sound should be allowed to fall upon unworthy ears, and, as some of the ears present might be unworthy, all the motions of playing are gone through by the musicians, but not a single sound is heard. This strange custom dates back many generations, but since the advent of civilization has rapidly lost favor.

A New Variety.

A New York woman tells of an experience which she had recently in one of the large department stores. She was looking for some house furnishings and, walking up to one of the floorwalkers, asked where she could see the candelabra.

Extremes In the Mails. Extremes sometimes meet in the mails. In a recent pile of exchanges the Yukon News from Dawson, Yukon territory, was in juxtaposition with the Isle of Pines Appeal from Santa Fe, Isle of Pines, and the Freethinker of London lay cheek by jowl with the Christian Intelligencer of New York.-New York Tribune.

Aunt Jane-What a man Henry is to tear and swear! You used to say he never lost his temper. Emily-Yes, that's when he was paying attention to me. Evidently he was saving until after he was married.-Boston Transcript.

"I thought he was a confirmed bachelor, but he's engaged to Miss Capsetter."

A CHURCH INNOVATION

Illinois Congregation Provides Lunch at Prayer Meetings.

SCHEME TO AROUSE INTEREST.

Methodist Church In Bloomington, Ill., Adopts Novel Method of Attracting Members to Midweek Services, and the Attendance Is Growing-Simple Food Served.

Arguing that the only way to reach the souls and hearts of some men is through their stomachs, the congreof Bloomington, Ill., has introduced a system of lunches to be given to attendants of the weekly prayer meetings, says a special dispatch from Bloomington to the St. Louis Post-Dispatch.

These meetings are held on Wednesday evening, and, although the church has a membership of 1,800, one of the largest charges of the Methodist denomination in central Illinois, it has been impossible to draw an audience of more than seventy-five to a hundred persons to the prayer services.

Dr. Charles P. Masden, who came to the church as pastor from the First church of Milwaukee last fall, determined to arouse interest in the prayer meetings. He suggested supplying lunches and, although the idea was considered revolutionary by staid members who consider all innovations of this character as questionable, the pastor finally succeeded in inducing the congregation to give the system a trial. He arranged for the members of the Ladies' Aid society, which looks after the needy members of the charge, to take their sewing each Wednesday afternoon and prepare the lunch for the prayer meeting. The women agreed and also expressed their willingness to remain to prayer meeting also. This was a gain among the fair sex.

Next the men were sought. The merchants and clerks who closed their places of business at 6 to 7 o'clock and went home to supper hesitated in too many instances about going "back uptown" to prayer meeting. The mechanic who left his work bench and laid aside his tools after a wearisome day's work and who walked perhaps a mile to his suburban home usually felt too weary to retrace his steps to the church after eating his evening meal.

Men in other occupations who once reached their homes after the day's toil felt more inclined to remain by their own fireside than to brave the weather to hear an hour's service. These were the candidates for the lunch bait.

The bait was set daintily, and the fish bit greedily. Every member who had been neglectful of the prayer meeting service for the reasons given was invited to step over to the church when his day's work was done and partake of the lunch. Once inside the dining hall the hour passed quickly, and when the steaming coffee was served at the close the participants, with hunger abated, were willingly led to the assembly room of the church, where the

prayer meeting was held. The first prayer meeting held with the lunch as a prelude was marked by the presence of 100 more members than at any similar meeting in years. Of these seventy-five participated in the lunch feature, and it was estimated by the pastor and others interested in the unique idea that the increase in attendance was due directly to the gastro

nomic attraction. The menu served is simple, consisting only of coffee, bread and butter, beans with pork, ham sandwiches and a dish of fruit. There is no limit to the amount each person is allowed to eat. Women in neat attire wait upon the tables, and the repast is opened with a blessing upon the food and the object sought. Long tables, such as are commonly used for church suppers, are in service For the opening meetings with the lunch attraction tables and seats were only provided for 100, but as the attendance and interest grew more room

was needed and more provender was prepared. Since the idea was first introduced Dr. Masden has received many inquiries concerning the results and the plan of operation. He is enthusiastic over the results and believes that the investment is wise.

He is strongly supported in his views by many of the most influential members of his congregation, and the doubting Thomases who have looked upon the innovation with pessimistic expressions have been silenced. It is believed in Bloomington that the prayer meeting lunch is a permanent fixture and that it will prove a winner in soul saving.

Oyama Parasols For Our Women.

It would seem Japan was busy enough with her war not to care a fig whether there were any new spring styles for American women. But the little Japs are making such easy work JOB PRINTING of trouncing the bear that they have plenty of time to devise beautiful new fashions that we shall borrow gratefully for our summer wardrobe, says a writer in the New York Press. Our parasols, for instance, are to be strictly Japanese, and somebody has bestowed the name Oyamas upon them, possibly because the sun of success shines upon that general. They are fashioned like the paper sunshades that we have used so largely for decorative purposes, only the material is silk or the wonderful brocade for which the country is famous. Now that several American women are clipping their eyebrows in the Japanese manner it will be a temptation on summer days to peep around the edges of these flowered, bedragoned parasols to see how complete a picture may greet us.

CLEANLY WOMAN.

Erroneously Thinks by Scouring Her Scalp That She Cures Dandruff.

Cleanly woman has an erroneous idea that by scouring the scalp, which re-moves the dandruff scales, she is curing the dandruff She may wash her sealp every day, and yet have dandruff her life long, accompanied by falling hair, too. The only way in the world to cure dandruff is to kill the dandruff germ, and there is no hair preparation that will do that but Newbro's Herpicide. Herpicide by killing the dandruff germ, leaves the hair free to grow as healthy Nature intended. Destroy the cause you remove the effect. Kill the dan-druff germ with Herpicide. Charge Upon Which Meat Packers' Employes Are Held

INDICTED BY GRAND JURY

Four Men Said to Have Arranged For Departure of Clerk Wanted as Witness and Assisted Him In Leaving Jurisdiction of the Court

Chicago, April 14.-Four men, three of whom are employes of Schwarzschild & Sulzberger, meat packers, and one an attorney for that corporation, by a federal grand jury which is in-

vestigating the alleged beef trust. It is charged that the four men obstructed and impeded Deputy Marshal Bach in efforts to serve a subpoena on Edwin B. Fish, a clerk employed by Schwarzschild & Sulzberger. Fish recently returned from Canada.

The men indicted are: Joseph Weisenbach, attorney for Schwarzschild & Sulzberger; B. S. Cusey, traffic manager for the company; G. D. Hopkins, auditor for the company; L. S. Joseph, employed in the provision department of that concern.

The indictment alleges that a subpoena was issued for Fish on March 3; that this subponea was given to Bach for service; that the four men had arranged for the departure of Fish from the United States to Canada, and assisted him in leaving the jurisdiction of the court.

Attorney Weisenbach, who was for several years an assistant to Governor Deneen, when the latter was state attorney, declares that it was at his instance that Fish returned from Canada and agreed to go before the grand ernment officers. Weisenbach also declares that he has never seen or spoken Roosevelt on "The Strenuous to Hopkins; has never spoken to Cusey concerning Fish, and asserts that Joseph was never in any manner interested in the affair.

The four men were taken into custody shortly after the return of the indictments and released in bonds of

Chicago, April 14.-Prices of beef have advanced in every important market of the United States. The consumer is paying the advance price which to him represents several cents a pound over what he paid up to 10 days ago. Leading packers state that no beef has been supplied to the retail markets of the country during the last month and a half except with a loss. This, it is declared, has been partially due to the fact that the breeders of stock and the handlers of range cattle have been holding back on supply until the grass on the range becomes nourish-

Charge Against a Seventy-Year-

Old Lawyer of Boston Boston, April 14.-In the Suffolk eriminal supreme court Assistant District Attorney Sughrue declared that Charles M. Reed, one of the oldest lawyers in this city, was guilty of embezzlements aggregating at least \$90, 100. Reed, who is 70 years of age, is charged with the embezzlement of \$7800 from the Cushing estate. In opposition to a plea for clemency

toward the prisoner, Sughrue said: "For 25 years this man (Reed) has been a thief. In 1850 he was appointed trustee of the Sampson Reed estate from which he stole \$45,000. A short time later he was appointed to the estate of John W. Wilkins, from which he stole \$45,000. In fact, from the beginning until now this man has stoler over \$90,000 of other people's money On previous occasions he was allowed to go with the promise that he would never again handle estates. Yet, in spite of this, he has stolen \$7800 from the Cushing estate. I do not agree with counsel for the defense that clemency should be shown."

Stephen Tyng, counsel for the de fendant, said he was surprised at the revelations of the prosecution and asked that sentence be postponed until a later date. His request was granted by the court and Reed was returned to jail pending final action in his case

Body Found In Pond

Waltham, Mass., April 14.—The body of Mrs. Louise H. Johnson, wife of former Mayor Johnson, was found in Plimp's pond, near her residence, and the medical examiner pronounced death due to suicide by drowning. Mrs. Johnson had been subject to frequent attacks of illness, and this fact, added to the shock which she received upon the violent death of her son about a year ago, is believed to have unbalanced her mind. She was 70 years old.

Patt Shows Improvement Washington, Conn., April 14.-When FRANK A. BAD ACCIDENT AVERTED

Diver Finds Obstruction on Hull of a Battleship

New York, April 14 .- During the process of placing the new battleship Connecticut in drydock at the navy yard here, what might have proved a serious accident was averted by the action of the officer in charge in sending down a diver to make a thorough examination of the hull before the water doors nowadays for runs. should be pumped out and the vessel

lowered onto the keel blocks. The diver discovered a heavy timber stuck fast to the hull on the port side of the keel, where it had adhered to the rough plating while the vessel was on the ways and had not been released in launching. A failure to have discovered the timber, it is said, would have resulted in the buckling or crimping of the keel and lower frames when the vessel settled on the blocks. The timber was removed and the docking evening. completed without mishap. The Connecticut is about 73 percent completed.

Several days previous to the launchng of the Connecticut last fall there were rumors of attempts to injure the boat. Divers were sent down to examine the ways, and found a large spike placed where it would have pierced the hull had it not been found. Later an official investigation disclosed holes bored in one of the plates. The evening. vessel was launched, however, without any accident or mishap.

A Joke on the "Prophet."

Some time in the thirties of the last century Prophet Joseph Smith, Sr., the Mormon, and a party of his followers were proselyting in Muskingum county, O. He appointed a certain day when he would show the people his wonderful powers and that he was a second Christ by walking on the waters of Mud creek. The water was always muddy. A day or two before the time set grandmother's brother Robert and a couple of neighbor boys were accidentally attracted to the Mormons working at the creek and, concealing themselves, watched the Mormons put down stakes and put planks on them from bank to bank, the plank resting about six inches under water. After the Mormons left the boys went down and took out the center plank, where the water was about ten feet deep. The next day Balaam Smith came down to the creek and, after a long exhortation, started across the creek. He was all right and on top till he came to the center, where his "powers" seemed to leave him, and he went to the bottom. This was the end of Mormonism in that

"The program which the general board worked out contemplates the construction of 48 battleships, not all in a lump, but two or three a year. The battleship is the main thing, all the rest are auxiliaries. It is a mistake to believe a battleship would be obsolete in a few years. Ships of this type should be good for 50 years to come.

"It has been estimated that a fleet of 48 battleships would cost the country annually \$200,000,000, but this estimate was based on the idea that all the ships would be in commission at the same time. This would not be the case unless we were engaged in war. I do not believe our expenses would be more than \$100,000,000 per annum. The country surely ought not to begrudge that amount for its protection.

OLD GRANITE MAN. SCORING GOVERNMENTS

Tolstoi Says All Are Institutions to Commit Crime.

HE ADVISES GENERAL LIBERATION

Only Means of Attaining It, Russian Count Says, Is to Religiously and Morally Perfect Separate Individuals - Declares That We Are All Slaves and Do Not Know It.

Count Leo Tolstoi in a recent letter to the London Times says that he regards not only the Russian government but all governments as "intricate Mr. Field moved to Dorchester, and institutions sanctified by tradition and later to Holbrook. He leaves a widow custom for the purpose of committing by violence and with impunity the most dreadful social crimes." He therefore thinks the efforts of

those who wish to improve social life should be directed to the liberation of themselves "from the governments whose futility in these times is becoming more and more obvious." This object, he holds, could only be attained by the unique means of religiously and A Washington dispatch to the Herald morally perfecting separate individdue to the fact that the Russian government is not organized on the model

For the purpose of correcting this, Count Tolstoi continues, the people have used all the means at their disthe external forms might alter the essence." Such activity, he says, is inexpedient and unreasonable in that the people assert rights which they do not have. Violent strife by "external means on the part of an insignificant This is a thing we should take to handful of men against a powerful heart. We have done much in a mili- government defending its life is only comical from the point of view of the possibility of success and piteous as regards the unfortunate misled individuals who perish in the unequal

strife. "The Russian government has no right to claims which do not appeal to the great mass of the people. One hundred million of the peasantry need nothing of these demands, their one desire and expectation being the liberation of the land from the law of prop erty or common ownership of land matters which are entirely ignored in Liberal positions and speeches and only incidentally alluded to in the revolutionary Socialistic programme." Concerning the present demands,

Count Tolstoi says: "The people in great mass still be lieve in autocracy, both by reason of inertia and because they think that only through autocracy and through the czar can they attain this communalization of land. The present activity is pernicious because it distracts the people from the moral perfecting of separate individuals, whereby only can be obtained the objects toward which those who are fighting the government

are striving. "One cannot participate in political action which draws the people into intrigue, subterfuge, strife and spite, extending to murder. Political action not only fails to contribute to the lib eration of men from the violence of governments, but, on the contrary. renders the people more incapable of that vigor which only can liberate them.

"Light minded people, judging superficially, especially those upset by the butchery in St. Petersburg, thought the chief cause of those events lay in the despotism of the government and if the autocratic monarchical form of the Russian government was replaced by a constitutional or republican one then such events could not be repeated.

"But the chief calamity from which the Russian people are suffering is not St. Petersburg events, but the reckless, disgraceful, cruel war instigated by a score of immoral individuals. The war, which already has destroyed hundreds of thousands of Russians, imposes an enormous tax upon the labor of future generations. That which took place in St. Petersburg on Jan. 22 is nothing in comparison to what is taking place in Manchuria."

In conclusion Count Tolstoi says that in America, France, Germany, Japan and England the pernicious character of the governments is so marked that those belonging to those nations point to events in Russia and naively im-Timbers of oak keep the old agine what is done in Russia is done homestead standing through only in Russia, while they enjoy complete freedom and need no improvement of their positions.

Therefore the aim both of the Russians and of all men should not be to replace one form of the foundation for a sturdy con- government by another, but to free themselves from every government and abolish it."

Unique Smuggling Scheme.

Police officers recently discovered a new method of smuggling liquor, says a Muskogee (I. T.) correspondent of the Kansas City Star. A teamster working on a railroad grade devised the plan. He had two very large horse collars made water tight. He would make regular trips to Texas, and every time he would return the laborers would get drunk. After watching him for a long time the officers discovered that he would take the extra horse collars with him and bring them back full of whisky. Each collar would hold shout two gallons of liquor.

The Early Use of Skates. birthplace of skating, and without Double Consciousness Developed by Holland is said to be the home and

doubt skating was first practiced there and in the far north. In a country of lakes and canals the necessity of walking and running on ice must have been felt from the earliest days. In Holland they show the bone skates which were found in one of the mounds of which a Friesland village was built. The skates were fastened to the feet by straps passed through holes which were made in the bones. A Danish historian mentions the sport in 1134. The bone skates were also first used in England. A writer in his account of the amusements of the young people of London in the twelfth century mentions the fact that it was usual for them to fasten the leg bones of animals under the soles of their feet by tying them around their ankles; then, taking a pole shod with iron, they pushed themselves forward with great rapidity by striking this pole into the ice.

Aunt Chloe and the Dinner. Mrs. McJarvis had invited a number of friends to dinner, but the cook left her on the morning of the appointed day without a moment's notice, says the Chicago Tribune.

In this emergency she hunted up an old friend of the family, Aunt Chloe. wife of Uncle Ephraim, and asked her to take the cook's place. "I'll cook de dinnah, missis," said

Aunt Chloe, "if you'll give me wot's Mrs. McJarvis agreed, and within a few hours the dinner was well under

way. Later in the day she visited the kitchen. "Why, Aunt Chloe," she said, "I have only five persons to entertain, and you

are cooking everything there is in the house! What is that?" "I want to make sho', missis," said auntie, "dat dere'll be sum'n lef'."

London's First Omnibus The first London omnibus was really much more gorgeous than its successor of today. It was an imposing vehicle, beautifully decorated and painted, with accommodation for twenty-two passengers inside, and was drawn by smart coachman in livery, and its conductor was gay in a blue cloth uniform. like a midshipman. This conductor, by the way, was the son of a naval captain and spoke French so well that it was quite common for the poke bonneted young ladies from Paddington to the object of improving their French the Yorkshire Stingo, at Paddington, to the Bank was a shilling; halfway, she expect to be forgiven. Care of Harness.

Take the harness to a room where you can unbuckle it and separate the parts completely. Wash each part well in lukewarm water to which has been added a little potash. Scrub well with a brush until all the grease and dust have been removed. Work the pieces well under the hand until they become supple. It won't do to oil until it becomes so. Let the parts dry in a place where they will do so slowly. When just moist oil For this no se us cod liver oil. It is the best for the purpose. Besides, if you were to use neatsfoot the rats and mice are your enemies at once, while they will not touch a harness oiled with cod liver oil. Give a good dose of oil to all parts, then hang up to dry. When dry, rub well with a soft rag.

A Russian Sentry. In 1859 the Russian emperor saw a soldier in the middle of a grass plot in the palace grounds. Why was there a daily guard, relieved at stated intervals? No one knew. Curlosity was aroused, and at last a veteran was discovered who remembered hearing his father say that the Empress Catherine -she died in 1727-once saw a snow drop in bloom at that point unusually early and asked that a guard be stationed there to protect it. And there a sentinel remained for at least 132 years; no one knew how much longer.

For Sore Throat. Those subject to sore throat will find the following preparation simple, cheap and highly efficacious when used in the early stage: Pour a pint of boiling water on thirty leaves of the common sage and let the infusion stand for an hour; add vinegar sufficient to make it pleasantly acid and honey to taste. The mixture should be used as a gargle twice a day. There is no danger if some of it is swallowed.

Disappointment on Both Sides. "You said the house was only five minutes' walk from the station," complained the victim. "To say the least, I'm disappointed in you."

"And I'm disappointed in you," replied the agent. "I thought you were a very rapid walker."-Philadelphia

The coldest inhabited country is Werchojansk, in eastern Siberia. The A MENTAL PUZZLE.

Speaking of instances of double consciousness, Mental Science notes the following case:

affection that may have been meningitis, but this is not known positively. She then developed acute maniacal excitation. During this illness the patient presented some remarkable changes of personality - such as are seen in hysteria. The author does not term the curious manifestations by this name, but describes some nine or more different varieties of personality manifested by the patient that are quite interesting. Thus the patient had spells of blindness, deafness, paralysis, etc. The most interesting of these manifestations, because the least easy to explain, was the patient's ability to draw the full figure of a nurse, etc. during her spell of blindness. To con vince himself that this was the actual case the author held a book between the patient's eyes and the sheet of paper on which she was drawing or put his hands before her eyes while she was drawing without in any way interfering with her drawing. Her sense of touch was highly sensitive during that period; she could detect a line drawn across her drawing paper, dates written at the top of her drawing paper merely by touching the paper where the intruding lines had been drawn. During her normal state the patient could never draw either before or after her illness.

FRIENDSHIPS.

Differences Between Those of Men and Those of Women.

One difference between men and women in their relation to friendship is that a man's friends like him in spite of himself; a woman's friends or acquaintances care for her because of herself, because of her powers of agreeability, her tact or her charm. A man may be as grouchy as he likes

on occasion. He may swear at his best friend and treat him as cavallerly as he pleases, yet that friend will wait in three handsome bays, driven by a patience for "the old man to come round," knowing well that beneath the surface are a kindly heart and a will ingness to share a last crust with him With her friends a woman may take no such liberty. The kind heart and the good intentions count for nothing

beside a woman's bad manners and ride as far as the city and back with lack of taste in the treatment of her nearest and dearest, and condemnation by chatting with him. The fare from is swift and sure. Nothing excuses her, and she is rarely forgiven. Nor would ing that large patience undeniably necessary to friendship or the power of forgiving and waiting for the "grouch" to blow over, she does not look for forgiveness when she has sinned against these laws of a woman's making.

Rather she gives up her friend and contents herself quite placidly with another. But then, as we said before, a woman has no genius for friendship.

It seems, by the way, almost forgotten that it was with a burlesque of Ibsen that Mr. Barrie made his first bow as a dramatist. His travesty of "Hedda Gabler" was one of the most delicious pieces of fooling ever seen at Toole's theater, and in it Mr. Toole (as Ibsen himself), George Shelton as Tesman and Miss Irene Vanbrugh as a blend of Thea and Hedda were delightful. In one scene Tesman was busy writing a review when Hedda entered, and the following dialogue took

place: Tesman (looking up)-Thea-Hedda (languidly)-I am not Thea. I am Hedda.

Tesman-Then, Hedda, is there a k in "Christianity?" Hedda (very slowly and intensely)-There-is-nothing-in-Christianity. Tesman-Fancy that!-London Pall Mall Gazette.

Fame a Wild Beast. "Literary fame," said a well known author whose name a few years ago was in everybody's mouth, "is more easily caught than kept. He who has a reputation to maintain has a wild beast in his house which he must constantly feed or it will feed on him. He who writes in a modern language is but the suicide of his own fame, scribbling with sand what the next wave of time will obliterate. He gets a short respite, not a pardon, from oblivion."

Sign of an Egotist.

Toward the latter days of George D. Prentice as the editor of the old Louisville Journal a thief got into the editorial room one night and stole the big dictionary. As soon as the loss was discovered Prentice said to his amanuensis: "Go out and purchase another copy of the dictionary. A man who will attempt to edit a newspaper without an unabridged dictionary is an egotist, and I do not belong in that category."

Vindictive. "Ah," sighed the young rhymester, band, don't you?" asked the visiting "you care nothing for the trials of us poets."

"Probably not," replied the crusty editor, "but I'd like to be on the jury in just one trial."-Philadelphia Ledg-

> It developed that the City of Quincy only owned to high water mark, when it was proposed to build the landing, and that the flats below high water mark between the steamboat wharf and the old Mears wharf was owned by the steamboat company. They placed a high valuation upon their property but were willing to lease to the city for an annual rental of \$200.

The petitioners saw immediately that this would be probibitive and that it would thus defeat the passage of the bill before the Legislature. The Steamboat Company representatives would make no better terms, however,

There is a possibility, however, that a narrow strip of land large enough for the proposed landing may be obtained. There is such a strip between the property of the Steamboat company and the Quincy Yacht club. This belongs to Mr. Mears and although he was present he would not set a price upon it. He promised, however, to give a price on Monday.

In order to secure the advantages of the proposed dredging bill, it will be necessary to take some action before that bill is considered by the Ways and Means Committee of the Legislature. It was therefore desirable that some action relative to the matter should be taken by the City Council next Monday evening.

The Committee on Public Buildings cannot report as the matter now stands. A meeting of that committee however, will be held Monday evening at which time it may be possible for the committee to make a favorable report.

Autopsy on Founder of Our Navy After a Century of Interment -- Labors of General Porter Crowned With Success

Paris, April 15.-The remarkable search which Ambassador Porter has conducted for the body of Paul Jones has been crowned with success by the discovery of the body and its identification by the highest French medical experts as unquestionably that of the famous American admiral who founded the American navy.

Ambassador Porter cabled to Washington last night, announcing the successful results of his long and difficult search. The body is in a good state of preservation, considering that the interment took place over 100 years ago.

The circumstances leading to the conducted the search for the last five years and when congress recently took no action upon the president's recommendation for the expenses incident to the extensive labors at his own expense. A large force of workmen has been engaged night and day tunneling and cross-tunneling the old St. Louis cemetery. This constituted a huge operation, embracing nearly a block covered with buildings and requiring a system of subterranean mining.

Hundreds of wooden caskets were found, but not until Wednesday were unearthed four leaden caskets which gave promise of containing the body of the admiral. Three of them bore plates designating the names of the de-Adams street, junction of Dimmock and Han-ceased. The fourth showed superior cock streets. DISCRIMINATING LADIES.

Enjoy Using Herpicide on Account of Its Distinctiveness.

The ladies who have used Newbro's Herpicide speak of it in the highest terms, for its quick effect in cleansing the scalp of dandruff and also for its exas a general hair-dressing. It makes the scalp feel fresh and it allays that itching which dandruff will cause. Newbro's Herpicide effectively cures dandruff, as it destroys the germ that causes it. The same germ causes hair to fall out, and later baldness; in killing it, Herpicide stops falling hair and prevents baldness. It is also an ideal hair dressing, for it lends an aristocratic charm to the hair that is quite distinctive. Sold by leading druggists. Colonial Fete.

The Woman's Auxiliary of the Y. M. C. A. are preparing for a grand three days' fair to be given May 4, 5 and 6, afternoon and evening, in the new Y. M. C. A. building, at which time will be the formal opening of the building. The fair will take the form of a Colonial Fete and all the thirteen original colonies will be represented at the different booths, where all kinds of useful and ornamental things will be sold. There will be an entertainment each afternoon and evening and on one evening the ladies are planning for a grand supper. Everything is being done to make the affair attractive to both old and young. One of the great features will be an automobile ride, which all should try. Everyone should secure a season ticket, as the prices are to be very reasonable, and help out in this grand work.

Nantasket Trains.

For the accommodation of cottage owners and others who may desire to visit Nantasket Beach and vicinity, the New Haven Railroad has arranged for the resumption of its Sunday service on the Nantasket Beach branch beginning Sunday, April 16. Trains will leave Boston at 9.13 A. M., 12.43, 4.43, and 5.43 P. M. Returning, trains will leave Pemberton at 8.32 A. M., 12.02, 4.02 and 6.02 P. M., and Nantasket fifteen minutes later. Unfortunately none of these trains stop at Quincy.

The New Edifice at Braintree to be Dedicated Next Week

The dedication of All Souls church will be on Tuesday, Apri 118, at eight o'clock. The service will be conducted by Rev. Frederick R. Griffin. The sermon will be by Rev. Minot J. Savage, D. D., of New York. An address will be given by Rev. Frederick W. Hamilton, D. D., of Roxbury. Admission will be by card until 7.55 when all seats remaining will be open to the public. The committee regret the necessity of using cards for admission but as the seating capacity is limited this course was the only possible one. On Sunday, April 23, Easter, there

Secretary Barton's Story of Rockefeller Gift of \$100,000

SAYS IT WAS SOLICITED

Never Had Any Question as to Propriety of Asking Financial Aid From Church Members For Needy Institutions

Boston, April 15.-The gift of \$100. 000 to the American Board of Commissioners for Foreign Missions from John D. Rockefeller was solicited by representatives of the prudential committee, according to a statement sent to the press last night from the headquarters of the board. This is an entirely different version of the matter than that given in an interview with Secretary Barton on March 27, and also made public through the local office of the board.

In the earlier statement Dr. Barton is made to say that the gift was voluntary and unsolicited. The original statement, as furnished to the press by representatives of the board, told of a request from John D. Rockefeller, Jr., for a conference with the secretary of the board. A conference was held and later one of the secretaries met the private secretary of John D. Rockefeller following a church service at Mont Clair, N. J., and the two discussed informally missionary affairs.

Dr. Barton concluded: "Subsequently I was asked to present a list of objects which were in imcould not be supported by the regular | the cornices are composition. receipts of the board. Such a list was prepared. Still later an interview was of the board. The conference was fol lowed in time by the promise of \$100.-

"So far as I know, no person sought an interview with Mr. Rockefeller or any member of his family or any member of his staff of secretaries, and no letters were written to bring influence to bear upon him in these matters. I believe that the gift was a spontaneous one given from his own impulse for the purpose of the work carried on under the American Board." The statement sent to the press last

night says: "Secretary James L. Barton, D. D. sent to the corporate members of the American Board today a complete statement, with the correspondence, showing the steps which led to the gift from Mr. Rockefeller of \$100,000.

"This statement, the secretary says, is made in the interests of an accurate understanding and to correct a false impression creation in some quarters by a brief published interview with books and in making untrue statements two weeks and has been widely misused and misquoted."

The conference with Mr. Rockefeller at Mont Clair, N. J., are described as before, the statement concluding:

A BRUAD IDEA

Formulated by the King of Italy, but American In Origin.

The king of Italy has put forth project which appears ideal if not up plan from the sentimental and compa ternal standpoint, yet excellent for an economical and technical point view could it be sincerely and to oughly carried out. At the instance of King Victor Emmanuel the Italia government has addressed a note h the powers proposing that a conference be held in Rome next May for the purpose of considering a scheme for establishing an international chambes of agriculture.

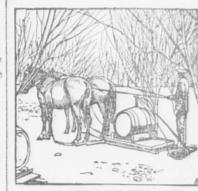

The king explained his proposal in a letter to the head of the Italian govern ment, frankly admitting that the original idea had been introduced to him by a citizen of the United States. Briefly put, the king proposes, therefore, that the different leading nations should combine to form an internation al institution absolutely unpolitical in its aims which would consider the conditions of agriculture in the countries of the world and which would periodic. ally notify the quantity and quality of the crops in hand so as to facilitate the production of such crops and make their distribution less costly and more rapid.

Other points would be the suppling of information as to the demand mi supply of agricultural labor in diffe. ent parts of the world, the promotion of agreements necessary for united defense against diseases of plants and domestic animals and the encouragement of societies for rural co-operation, for agricultural insurances and for agrarian credit.

Naturally such an institution would not only tend to consolidate the agricultural classes, but would yield a powerful influence for peace, for by pronoting a knowledge of other countries and by extending the business relations of the various nations with each other war would daily become a more hateful and impossible thing than ever.

A LITTLE NOTE OF REACTION

Good Horticulturists Are Again Talking Up Oil Spraying. With the present spraying season there seems to come a little note of reaction from the lime, salt and sulphur wash toward the use of oil for the San Jose scale. Not but that the former is still popularly used, but some very

good authorities are again urging the excellence of crude petroleum. Dr. John B. Smith of New Jersey, speaking riments in the state during 1904, says a few growers used it with excellent success, and it is the only material which has not been more or less of a disappointment. As the result of observation made, the undiluted oil, a little warmed and put on in a fine spray, is advised on pear trees in preference to any other material. Good results on other fruit trees have been obtained with 25 per cent mechanical

mixtures. As good an authority as Mr. T. Greiner of Ohio places himself on record thus:

"When I consider all the disadvantages of the lime-sulphur treatmentthe nastiness and corrosive nature of the compound, the necessity of the utmost care to prevent clogging of the nozzles and to protect the men who handle it and the horses, too-I come to the conclusion that I must stick to my old and tried remedy for the scale, the clear petroleum spray, which when properly applied and at the proper time makes a clean sweep so far as the scale is concerned with a minimum of labor and inconvenience and at rea-

sonable expense." The lime, salt and sulphur mixture has the advantage of controlling peach leaf curl and to some extent at least the apple scab. It seems to act also as a stimulant to clean and thrifty growth in the tree. If only one spraying can be made, apply in March or early April and cover thoroughly. The plum has been injured if sprayed too early in winter.

Hostile Fleets Believed Near to Scene of Battle

PROBABLY OFF FORMOSA

Russians Reported Coaling Off United States Territory -- All Europe Awaits Tidings of Maritime Tragedy Which May End the War

London, April 15.-The final death grapple for mastery in the Orient is a matter of hours only, it is believed, and the Russian fleet under Admiral Rojestvensky may even now be within short steaming of Admiral Togo's powerful aggregation, in battle array off southwest Formosa, in waters practically of his own choosing and admirably adapted to torpedo attack.

Tokio cables that the Japanese have imperative orders not to allow the foe to slip through the tortuous channels north of Luzon, and among the smaller archipelagoes south of Formosa.

Last night Admiral Rojestvensky was reported off Mindoro, coaling, and as it is United States territory, that country has already dispatched swift cruisers to prevent his utilizing American possessions as a base from which to sally to the fray.

The place where the Russians were coaling and provisioning is 80 miles south of Mindoro. From it extends reefs charted as treacherous, and skilful pilotage will be essential to the

The Japanese, on the other hand, have in Makung harbor, Formosa, their base, an ideal place, sheltered from the terrible typhoons, and easily accessible from all points.

The tidings that three of the Russian cruisers had left the main division, scouting, arouses apprehension in Japan lest they ravage the coasts, allow the main fleet to escape to Vladivostok, whence it would be able to launch more effective blows. Togo, however, will not be recalled.

The rival fleets, too, are in such proximity that a clash is believed to be inevitable, and Europe, breathless, awaits tidings of the maritime tragedy that may end the war.

British naval critics still incline to the opinion that the coming sea fight will be in the Sea of Japan, near Viadivostok, rather than in the vicinity of divostok, rather than in the vicinity of Formosa. Their chief reason for this belief a that by giving battle here the belief & that by giving battle here the Japanese will not be forced to divide their forces to protect their rear from the Vladivostok squadron.

This does not seem a sufficient reason, however, to influence them to forego the strategic advantages which they hold in the North China sea. The Russian fleet fighting near Vladivostok and find safety in Vladivostok, where, as a "fleet in being" under an energetic commander, it would be a constant menace to the Japanese. Vladivostok Port Arthur—a task of months and a sacrifice of thousands of lives. would then have to be taken as was

On the other hand, by accepting battle in the North China sea, Togo, if not successful in destroying Rojestvensky's fleet there could, by reason of the higher average speed of his vessels, retire to the Korean straits and again attack the Russian fleet if it attempted to force a passage. The same would be true if the Russians sought to go through Tsugara straits.

Censure and Special Commission St. Petersburg, April 15.—Grand Duke Alexis, high admiral of the Russian navy, has issued an order severely censuring Captain Clado (formerly chief tactician on the staff of Vice Admiral Rojestvensky) for his criticisms miral Rojestvensky) for his criticisms of the navy and, at the same time, in order to "give him an opportunity to repair his faults," appointing Clado to "special service in connection with the equipment and command of vessels navigating rivers in the theatre of war."

Suffering at Viadivostok

London, April 15 .- The Daily Tele graph's Tokio correspondent says: Owing to military necessities, the residents of Vladivostok are suffering privations. Five submarine boats have arrived at Vladivostok from America. The cruisers Gromoboi and Rossia are kept in constant readiness to leave port.

Satisfactory Business Conditions New York, April 15.-R. G. Dun & Co.'s Weekly Review of Trade says that good news still predominates in trade and industry. Easter business is of large volume, dry goods, clothing, footwear and all lines of wearing apparel reporting an unusually good demand, and shipping departments are taxed to their full capacity in many

Desertions Not Numerous Washington, April 15 .- In view of recent publications to the effect that there have been heavy desertions from the north Atlantic fleet in Florida waters, an official statement has been issued that on the 8th instant the total number of absentees from the ships was 80, a trifle more than 1 percent of the personnel of the fleet.

Makes Himself Out a Desperado Chicago, April 15 .- Frank Litzo, a young man arrested for a minor offense, declared to the police last night that he had committed two murders, shot one man who afterward recovered and had committed nine robberles and burglaries. The police doubt his story.

PRIVATE COINAGE.

At One Time It Was Quite Common In This Country.

The history of the issue of coins in companies would make a very interesting book. When gold was struck in North Carolina a man named Bechtler started a mint of his own there, which was abolished by law in 1849. Half eagles, quarter eagles and one dollar pieces issued by him were largely circulated in the south and west. Al though of honest gold, they were about 2½ per cent under value on an average.

About the same time Templeton Reid coined gold in Georgia. He moved to California in 1849 and minted eagles and twenty-five dollar pieces on a considerable scale. Many companies and refineries in California and elsewhere made a business of striking gold coins during the same period. Naturally there was a great temptation to make these coins under weight and of inferior fineness. The Mormons in Utah issued eagles, half eagles and double eagles which bore on the obverse an eye, with the legend, "Holiness to the

Quantities of twenty-five cent and fifty cent gold pieces were likewise manufactured at San Francisco, the former containing only about six cents' worth of the metal and the latter twelve cents' worth. Years ago a lot of these were taken over to Germany and circulated there, which elicited a formal diplomatic protest from that government. The private minting business was finally stopped.

office of the Fore River Shipbuilding Co. this morning contained the information that the company had been awarded the contract to build two scout cruisers. The contract price for which has been received and it will be seen that the company has considerable work ahead.

Washington dispatches report that bids were opened at the navy department on Saturday for three scout cruisers of 3750 tons each. The department is planning to have the American turbine installation in one ship, the English turbine in another and the regular steam installation in the third.

According to the figures, the proposal of the Union Iron Works to build at \$1,666,000 each and that of the Fore River company to build two at \$1,557,000 each are apparently the lowest for the construction of the ships, under the department's plans, while the price submitted by the Bath Iron Works to conturbine class.

"TAINTED MONEY"

The Subject of Discoureses From Many Pulpits

A GIVER OF \$28,500,000

Declared by New York Clergyman to Be Not a Benefactor-New Haven Minister Protests Against American Board

New York, April 17 .- There is a moral quality in money. Judas sold the Savior for 30 pieces of silver. That is | 40,000 feet of Land between Silver and Hill Sts., \$5.10 in our money. Do you suppose Judas is the only person who has betrayed the Savior for \$5.10? Every man who takes money from his neighbor without equivalent is betraying his master, declared Rev. George F. Pentecost in a sermon at the Madison Avenue Baptist church, on the subject of socalled "tainted money."

"Some people," he continued, "ask why we need to inquire into the color of money, whether it be clean or dirty, so long as it be given to God, for the altar sanctifies the gift. I do not hesitate to say this is the most immoral doctrine I ever heard."

The richest man in the world, the speaker declared, is said to have from \$500,000,000 to \$1,000,000,000. "He has given," he said, "in charity \$28,500,000 during his life, and some people hail him, therefore, as one of the greatest benefactors of modern times. I tell you it is no more for that particular gentleman to have given that enormous sum than it would be for the man with an income of \$5000 a year to give 5 cents a year. If the Lord has so prospered him as to give him the high genius, the high integrity to make so great riches, the \$28,000,000 is not benevolent; it is a mere paltry excuse."

New Haven Minister's Criticism New Haven, April 17.-Rev. Artemus J. Haynes, pastor of the United Conpreached a sermon yesterday on the Rockefeller gift, using as a text the words from St. Matthew, relating to Christ's casting out the money changers from the temple.

With reference to the American Board's acceptance of the gift, Dr. Havnes criticised the action and words of the prudential committee as indicating in his oninion; shameful evasion of Christian duty. The finding of the committee he characterized as a document which might have been prepared

ROASTED IN SHANTY

Suspicion of Foul Play In the Death of Two Lumbermen Otis, Mass., April 17 .- George Mc-Mahon, 28, of Westfield, and Joseph Barrett, 20, of Manchester, Conn., were

found burned to death Sunday in the SATURDAY, April 22, 1905, ruins of a shanty occupied by an Italian known as "Johnny George," near brough from Squantum Street, to the main the Chester line. The origin of the fire theorough fare and is well located for building is a mystery and there is some suspicion of foul play, although one explanation is that the men, returning to the shanty late, built a fire and went to sleep and the building caught fire from an overheated stove.

McMahon and Barrett were employed as lumbermen by Charles Sparks and had been to a dance on Saturday night. They were seen about midnight in company with the Italian and Frank Farrham, who lives in the neighborhood. Joe Garneau, a quarry man, was awakened Sunday by the flames in George's hut and, rushing down, found Farnham and George outside the but, while the two others were inside. At tempts to rescue them were without

Medical Examiner Wilcox viewed the bodies and State Detective Woods of Pittsfield will make an investigation.

Blaze In Vermont Cathedral Burlington, Vt., April 17 .- A charcoal ember from the censer, accidentally kicked into a closet filled with paper, started a fire in St. Mary's cathedral last night while the edifice was crowded with worshipers. Fearing a panic, Fr. Barrett announced that service would be suspended on account of an accident and asked the people to leave the building. Not un til the congregation was out of the church did it know the nature of the trouble. The firemen confined the flames to the chapel, but the loss by smoke will be heavy.

Stirred Up Over Liquor Woburn, Mass., April 17.-Following the confiscation of wagon loads of liquor by deputy sheriffs and officials of the anti-Saloon league at alleged speak-easies Saturday, charges are being openly made that the city authorities for months have countenanced the operations of a "rum combine" by refusing to raid questionable resorts and bring violators of the law to justice. Members of the anti-Saloon league, clergymen and public workers make the allegations. Flat denials have come from the men being made the targets of censure.

The Government Helps Maine Augusta, Me., April 17 .- Congressman Burleigh has received from Secretary of War Taft a deed conveying to the state of Maine the Kennebec arsenal property in this city. This reservation having been abandoned for military purposes by the government, authority was granted by congress for its transfer to the state for use in con-nection with the Maine insane hospital, whose land it adjoins. The arsenal property comprises about 42 acres of land and a number of stone buildings, all in excellent repair.

Used Pistols and Stilettos

Boston, April 17 .- Four Italians were wounded last night during a fight on Fleet street, in the North End of the city, in which stilettos were used after revolvers had been emptied. None of the wounded men is in a serious condition. Two of the wounded men are under arrest, as are two other Italians who escaped injury. The affray was the culmination of a feud.

Bronson Freed In Murder Case Guildhall, Vt., April 17.-Reuben Bronson, who was charged with the murder of Charles Lyon at Bloomfield March 31, 1904, has been acquitted. Lyon was shot and killed as the result of a quarrel among men who had been in the lumber woods during the winter previous to the shooting. Bronson held that the killing was done in self-

CASTLE SQUARE THEATRE.

In announcing for this week's attraction at Castle Square Theatre, Tom Taylor's "Ticket of Leave Man," the management will without doubt, meet the wishes of many younger generation of their patrons to whom this play will prove a novelty, despite the fact, that it has held a place on the English and American stages for half a century. It was first made known to American audiences at the old Winter Garden Theatre, New York, with Mr. W. J. Florence as Bob Brierly, in the season of 1863-1564, and it proved so successful, that Mr. Florence alone appeared in it more than 2500 times. The play has not been seen in Bos'on since it was played at the Castle Square three years ago. Its characters, which present the types upon which many a melodrama has since been built, are of the English lower world mainly and the players of the present company at the Castle Square should find in them opportunities for their best work. The usual free distribution of souvenir boxes of choice chocolate bonbons will be made at the Monday matinee.

RUSSIAN SHIPS SIGHTED

Possibility of Their Infringing Chinese Neutrality--Rojestvensky May Have Been Compelled to Split His Squadron

London, April 17.-There is as yet no news of a naval battle in the far east or of the whereabouts of the rival fleets. The Hong Kong correspondent of The Daily Mail sends a rumor of a small engagement, but there is no confirmation of this report.

Details regarding the Russian ships in Kamranh bay, Cochin China, are too meagre to be instructive. According to The Daily Mail's Singapore correspodent the North German Lloyd steamer Prinz Heinrich saw five battleships and six cruisers in the bay, but the dispatches to other London morning newspapers are not so precise.

The Daily Telegraph's Singapore correspondent merely reports "18 vessels" and adds that the captain of the Prinz Heinrich states that possibly more warships were inside the harbor, but that they were invisible from the

The Latest From Manchuria Tokio, April 17.-It is officially announced that the force advancing north from Singking, driving the enemy before them, occupied Yingecheng on the afternoon of April 14. A detachment of the same force, co-operating with cavalry, occupied Pachiatzu at 6 o'clock in the evening of the same day. The enemy's force near Pachiatzu consisted of seven troops of cavalry and one battery of artillery. They first retreated toward Yingecheng; then came back to Pachiatzu. Finding it occupied, they were thrown into confusion and they retreated in great disorder over Tieling pass, two miles north of Pachiatzu. There is no change else-

Mrs. L. C. Hewson accompanied by her daughter Marion of Newcomb place, have been the guest of her

parents at Hanover the past week. There was a snow squall about 9.30 What it Pays this morning which lasted for five minutes. The last fall of snow was on

March 22, and the number of days of sleighing for the winter was 55. Auctioneer Crane will have three

auctions of real estate at Quincy Point on the morning of Patriots' day, including house lots on Cleverly court, house lots at Point Holes, and house and stable on Arnold street.

Mrs. Beatrice Porterfield will hold her last home matinee whist of the season at her home on Granite street on Thursday and it will be a very unique affair. Favors will be different than any ever given at a whist party.

Eugene H. Sprague has recently sold the Eaton ice business to C. E. Giles, of Dorchester. Mr. Sprague and family will move into the house now occupied by Charles R. Sherman, of Park street, Wollaston, about the first of May.

Odd Fact Regarding the Ages of Five Successive Presidents.

John Adams was eight years older than his successor, Jefferson; Jefferson was eight years older than his successor, Madison; Madison was eight years older than his successor, Monroe, and Monroe was eight years older than his successor, John Quincy Adams.

Washington, Adams, Jefferson, Madison and Monroe ended their terms each in the sixty-sixth year of his age. John Adams, Jefferson and Monroe ended their days on the Fourth of July, the two former dying within a few hours of each other, just half a century after the Declaration of In-

John Adams lived to be ninety years and eight months old, while Garfield died at the middle age of forty-nine years and ten months. Jefferson, Madison and John Quincy Adams lived to be octogenarians; Monroe, Jackson, Van Buren, Tyler, Fillmore and Buchanan got well into the seventies, and Washington, William Henry Harrison, Taylor, Pierce, Johnson and Grant only reached into the sixties. Polk died at the age of fiftythree years and Lincoln and Arthur at fifty-six.-Washington Post.

Werification of Bodine's Story of His Crime

TROUBLED BY CONSCIENCE

Had Hatred For Tramps and Threw One Into Aroostook River Eight Years Ago--Confessed to California People

Fort Fairfield, Me., April 18 .- The fact that Earl R. Bodine, who, on March 21, confessed to Oakland (Cal.) authorities that he murdered an unknown tramp here eight years ago by throwing him into the Aroostook river, was a resident of this town at about the time he describes has been verified. Bodine worked on the farm of Josiah Fitzherbert under the name of Patrick O'Brien. Bodine is now in the Oakland (Cal.) jail awaiting the confirmation of his self-accusation.

When the news of Bodine's confession reached here a careful inquiry failed to discover anyone who had ever heard of him, neither could the local police bring any charge against him. The identification was brought about by a letter received yesterday by the local representative of The Associated Press from Chief of Police Hodgkins St. Louis of Oakland. The letter gave a more complete description of the prisoner | Cincinnati and said that the latter admitted having been known here by the name of Brooklyn O'Brien. As "O'Brien" the man is well remembered, while Fitzherbert confirmed many of the statements made to the Oakland police.

According to Fitzherbert, Bodine worked for him from the last of April to the first of July, 1897. During the time he associated more or less with They have woman suffrage in the tramps, although he always seemed to West, and if the President will listen to hate them and claimed frequently that the tempestuous rhetoric of some of the they were responsible for what he fair sex who have learned bow to vote termed his own worthless life. German Admiralty May Have Tried to Throw Japs Off the Scent--Pro-Japanese Tone In British Newspaper Discussion of Neutrality Question

London April 18.-In the absence of further information regarding the posifleets, the London papers are keenly discussing the neutrality question, for the most part in a strong pro-Japanese tone. The Morning Post takes the milder view that Kamranh bay is a mere fishing port and unable to provide coal or other supplies to the Russian squadron, which probably took shelter llers, and that, though a technical breach of neutrality has been committed, the French authorities could hardknowledge of Rojestvensky's inten-

Reports from several places on the southeast coast of Asia seem to show that the Russian fleet was at Kamranh harbor, on the Cochin China coast, 200 miles north of Saigon, last Friday, and near Turan harbor, 350 miles further north, on Sunday. This apparently disposes of the German admiralty statement that Rojestvensky had taken his ships into the Sulu sea. in the midst of the Philippines. That statement may conceivably habe been a manifestation of German friendliness to Russia, designed to throw the Japanese scouts off the scent

The Russian fleet is evidently proview of the large use it has had to make of neutral harbors. Dense clouds of smoke filled the other floors, driving the tenants, some of whom had retired, to the windows and fire escapes. Samuel Langmaid was taken out unconscious from his room on the second floor.

Mary Powers, 10 years old, had an almost miraculous escape. She jumped from a window on the fourth floor and was caught in the arms of Ladderman Jack McDonald, who stood on a ladder reaching only to the floor below. McDonald stood on the top round, and there, with his arms extended, called to the child to drop. Anything but a straight descent would have meant the death of the child, and possibly that of her rescuer. The little one did not hesitate, but dropped into the arms of the fireman, who bore her safely to the ground.

Adams Academy Wins 2 to 1 Game

Defeating the Roxbury Latin School.

But Little Work for Outfielders on Either Team.

Adams Academy played its first scheduled game on Monday, at the Park, with the Roxbhry Latin School and won 2 to 1 in a ten innings game. The high wind did not prevent an interesting game. Eleven of the visitors were caught out by Hoxie while 14 perished at first. Only six of the home team struck out, but a larger number failed to reach first. Each side got a run in the third innings and it was not until the last of the tenth that Hoxie dissolved the tie The full score:

DEATH OF CAESAR YOUNG

Defendant to Take Stand Again and Tell of Fatal Struggle In Hansom Cab--Court Adjourns Until Next Week

New York, April 20 .- The jury which is to decide the fate of "Nan" Patterson, on trial for the third time upon the charge of murdering "Caesar" Young, a bookmaker, was completed at 7:40 o'clock last night when Recorder Goff adjourned court until next Monday morning. The adjournment for this length of time was taken in order to avoid a court session on Good Friday and to give the lawyers connected with the case an opportunity to go out of the city to spend the holiday.

Miss Patterson is again to face a jury composed almost entirely of married men, only two of the accepted panel of 12 being single, one, P. W. Lyon, a bachelor, the other, W. J. Mura widower.

Most of the jurymen are men of middle age and beyond. Many of them have large families, some grown daugh ters who are married. The personnel of the jury as completed last night is as follows:

Lovell M. Aldrich, foreman, 48 years of age, manager; John H. Splint, 63, merchant; Julius Goldstone, 38, cloak manufacturer; Newcomb C. Barney, 60, interested in mines; Francis Vail, 59, retired merchant; Eberhard L. Luder, 37, sugar importer; Walter W. Tinsley, 49, coal merchant; Preston W. Lynn, 37, business manager; William F. Realization of Possibility of Baltic Squadron Being Joined by Ships Under Nebogatoff--Ja-Russians In Kamranh Bay

London, April 20.—The British public duct of the approaching naval contest. Until Vice Admiral Rojestvensky actually arrived in the Straits of Malacca there was a disposition to ridicule the efforts of the Russian squadron; but now that there is seen to be a growing likelihood of Vice Admiral Nebogatoff joining Rojestvensky before the fateful struggle opens, lukewarm interest is deepening into anxiety.

According to the Tokio correspondent of a news agency, a momentous war conference, lasting five hours, was held there yesterday, attended by the elder statesmen, the premier and ministers. It is not difficult to conjecture the nature of the council's deliberations.

'Financial Solidarity" Asked For by Federation's Representative-- He and Other Labor Officials Enjoined by United EDWARD J. MURPHY, Special Agent. States Judge at Ponce

Washington, April 20.-President Gompers of the American Federation of Labor has been appealed to by the labor interests of Porto Rico for support in their efforts to secure an increase of wages which has resulted in conflicts with the police authorities of the island. The appeal came from Santiago Iglesias, the local organizer of the Federation of Labor in Porto Rico, who sent two telegrams to President Gompers. They are dated at

Ponce and are as follows: "Ten thousand strikers want finan-

cial solidarity." "Pacific meetings thousands of workers being destroyed by the police. Sixty workers wounded by shooting and asked increased wages. Your solidarity should cause great benefit."

Boston, April 18 .- Though they fought for their existence with all the means at their command, sending two attorneys and several officials to Washington to plead their cause before the assistant attorney general for the postoffice department, the Ubero Plantation company of Boston and the Consolidated Ubero Plantations company could not save themselves.

The fraud order which they sought to prevent, and which will deal a death blow to their business, has been issued by the postoffice department. It reached Postmaster Hibbard of Boston yesterday and goes into effect immeeting to be held by the Knights of mediately. It deprives the two companies and their agents from the further use of the United States mail ser-

> Large investments are involved charged that they have taken in about \$1,500,000 through sales of stock and bonds and they have no assets with obligations. Their claim has been that they owned a vast amount of fertile soil in Mexico on which to plant rubber trees, and that they are raising such a tremendous amount of by products that they are able to pay high dividends on the investments while the real crop—the rubber trees had a par value of \$500, while the par value of the shares in the Ubero Plantation company of Boston was \$150.

The contention of the government, upon which is based its fraud order, or planted nothing but a little corn on their land in Mexico. Their sole pur-It is rumored that Charles Hall of pose has been to sell stock and bonds, sales, instead of out of any products of their soil.

on its face, the proposition was backed appear. by such influential men of finance as M. B. Nebeker, who was secretary of Harrison administration; Judge Wiley of the supreme court of Indiana; J. C. Daley, former secretary of state of

Indiana, and others well known. It was this showing of financial strength that saved the companies two years ago when William B. Snow, a postoffice inspector at Boston, made an investigation and reported to the postpeace. In this first instance they were at that time, but the postal authoriaimed at Portugal. About a hundred ties kept a watchful eye on the transaction

Before public confidence in the investment had been shaken the postoffice department knew there was something wrong. Chief Inspector Letherman, them-to all the rascals of the Baltic, who has charge of the New England authorizing them to victual the besieg- district, assigned Inspector Snow to investigate it again. At the same time dividends were passed by the companies and this aroused the suspicion instituted an inquiry looking toward the displacement of the board of officers for a new board which should will start in next week Wednesday. continue the business.

The government investigation revealed a condition which was regarded as startling. Inspector Snow says that instead of there being a rich crop of tropical fruits growing in a deep soil, preparatory for the rubber crop, only about \$1400 worth of corn has been secured on the alleged rubber plantation,

improvement of the plantation. With this evidence in its possession the postoffice department gave the companies notice to appear in Washington to show cause why a fraud order should not be issued against them. Inspector Snow went there for the government and two Boston lawyers went to look after legal rights of the companles and to oppose the issuance of the fraud orders. The hearing was held before the assistant attorney general PATRIOT OFFICE for the postoffice department.

Hyde Declines to Address Them at New York

WILL REMAIN IN OFFICE

Says Compliance With Request to Resign Would Be "Unworthy and Disgraceful" to the Memory of His Father

New York, April 21 .- After First Vice President Hyde of the Equitable Life Assurance society had informed a 1463 Hancock Street, Quincy, Mass. committee of managing agents that it would be impossible, because of previous engagements, for him to address them, the agents' convention, which has been in session in this city for

three days, adjourned without day. This committee did not see Hyde, but telephoned to him at his office, and was given the information that the first vice president of the Equitable was glad to receive the invitation, but could not accept; that, however, he would prepare a statement and transmit it to the committee, covering the situation as he conceived it. This statement, it is understood, will be circulated among the agents when it is received.

The invitation to address the agents followed a call by a committee on Hyde with a request that he resign as an officer of the society. This Hyde declined to do in an address in which he said he would consider such an action 'unworthy and disgraceful to the memory of my father" and further that "it is evident from your extraordinary request and from the reing that you have not the remotest conception of the unfortunate controversy or the motives behind the struggle for the control of the society."

Mr. Hyde's speech had followed one by Joseph Bowes, chairman of the agents' committee, in which the latter recited that the request for the resignation was unanimous.

These were the principal developments of the session of the agents at tion was effected and officers chosen and shortly before adjournment it was decided that the committee of 72 named to wait on the state superintendent of insurance and upon Governor Higgins to urge legislation favorable to mutualization should proceed to Syracuse and see Insurance Superintendent Hendricks at his office there and then return to Albany and meet Governor Higgins Saturday.

The executive committee of the Equitable also met in President Alexander's office, but further than the an-Hyde's resignation was discussed nothing was given out.

In connection with the legal ends in the Equitable tangle, the announcement Hyde's counsel, in spite of stories to the contrary, was interesting. The retention of Joseph H. Choate as one of the Hyde counsel was also confirmed.

There was some talk last night of a settlement of the difficulties between the Hyde and Alexander parties, but no confirmation could be secured. A traced to any authoritative source.

It was learned officially last night that the vote on the resolution asking for Hyde's resignation was 74 to 11. Of the 11, nine were from New York city and two were from Illinois.

The executive committee of the agents' organization have been given power to call a meeting at any time. This committee will send a report of the proceedings to every Equitable agency in the world.

Almed at Yankee Fishermen

St. Johns, April 21.-The colonial government has issued a series of regulations under which Newfoundland and lowed to procure bait in colonial waters, restricting the quantity permitted them and imposing severe penalties for any violations of the rules. This action is designed to prevent the native fishermen from obtaining excess stocks of bait from which they might supply American fishing vessels excluded from these waters under the new Bond bait act.

No Disposition to Resign

Washington, April 21 .- Secretary Hitchcock has received from Governor Brady of Alaska a letter in response to WOTTIL'S TEE Hitchcock has received from Governor his request for an explaantion of his connection with a mining development enterprise which has been extensively advertised. Brady defends his company as entirely legitimate, but does not manifest a disposition to resign either as governor or as a director of the mining company.

ASSURANCE GIVEN JAPAN

Size of Kamranh Bay Permits Ships to Enter and Anchor Without Being Within French Territorial Waters

Paris, April 21 .- Acting upon instructions from his government, Dr. Motono, the Japanese minister to France, called on Foreign Minister Delcasse last evening and submitted representations on behalf of Japan concerning the presence of the Russian Pacific squadron in Kamranh bay,

An official communication issued after the meeting states that Motono's action had not the character of a formal protest gainst an alleged violation of neutrality, but was to obtain assurances that France would observe strict neutrality. Notwithstanding the official version, it is evident that the intention and effect of Motono's action is in the nature of a protest.

M. Delcasse's assurances sought to allay the apprehensions of Japan, which he maintained | alry. had not been justified by any specific

The exact terms of Japan's repre sentations have not been disclosed, but it is understood that, while having the usual courteous form of diplomacy, they set forth that serious apprehensions had been aroused by the stay of the Russian warships in Kamranh bay and the urgent desire that French neutrality be placed beyond doubt.

The terms of the French response although not given out, tend to give ample assurances upon all the questions Besides these general assurances the

conference doubtless permitted of the explanation of the French point of view concerning the stay of Russian warships in Kamranh bay. It is maintained that this was at most a brief sofourn and not a prolonged stay, official information leading to the belief the the squadron actually left Kamranh bay last Sunday. No Japanese ships were in the vicinity during the stay of the Russian squadron, and therefore, it is held, it had not the character of giving asylum to a belligerent

against the enemy. Moreover, it is maintain that the size of Kamranh bay permits ships to enter and anchor without being within French territorial waters. The bay has a triangular shape, its greatest length being 16% miles, its greatest width 10 miles, and the distance across the en- baby, Joseph Sarcofski held several trance about eight miles. These dimenmooring without crossing the threemile French shore limit. From the French standpoint it is not to be presumed that ships are within French waters until it is affirmatively established that the three-mile limit has been encroached upon. Furthermore, officials say that France had no previous knowledge that the Russian second Pacific squadron intended going to Kamranh bay and, therefore, bad miner's carlessness. It was pointed out in this connection that the chief article of contraband-namely, coal-had been furnished to the Russian squadron by German ships which store of Benedict & McFarlane was contook on their cargoes from the British tinued yesterday by hundreds of export of Cardiff, presumably for other cited women. However, the attitude of socialist deputies promises to bring up the entire question before the chamber. M. Pressenso has given notice of his intention to question the government on the presence of the Russian squadron in Indo-China waters. He holds that neutrality has not been observed with sufficient vigor and will ask the government to acquaint the chamber with the precise instructions given the Indo-Chinese authorities, and also whether Rojestvensky's squadron has or has not left Kamranh bay.

The socialist movement follows the general sentiment in socialist quarters against the Franco-Russian alliance.

THE BRITISH FEELING

which is approaching a climax in which, by some mischance, Great Britain might be called on to play a part.

The announcement in the Paris dispatches that Dr. Motono, the Japanese minister there, has called upon Foreign Minister Delcasse with regard to the question of neutrality, has not changed the views of officials at the foreign office, where it is pointed out that Japan probably has not made a formal or specific protest, but simply desired assurance that France will continue to maintain neutrality and not desired assurance that France will afford the Russians any advantage inconsistent with France's responsibilities as a neutral. The foreign office assumes that France most certainly will give such assurance to Japan.

The foreign office states that it is not at all likely that Great Britain will be requested by Japan to take action in support of any protest. The attitude of the foreign office is that there is not as yet any proof that neutrality has been violated, and it prefers to think that France is preserving neutrality, according to her own interpretation, and that Russia will not wilfully involve her ally. It is pointed out that similar charges were brought when Rojestvensky's squadron was at Nossi Be, and that there is no reason to believe that there is any more ground for the charge of actual violation of neutrality at Kampanh hay tion of neutrality at Kamranh bay.

A. R. She received 362 votes, against 322 for Mrs. Sternberg. The total number of votes cast was 690, six being blank. The announcement early in the ses-

sion of the result of the ballot taken Wednesday for national officers, which resulted in no election for president general, indicated that the contest was extraordinarily close. On the first ballot Mrs. McLean received 342 votes of a total of 717 cast, leaving her 12 votes short of an election. Mrs. George M. Sternberg, District of Columbia, received 201 votes, and Mrs. Charles W. Lippitt of Rhode Island 164 votes. Mrs. Lippitt withdrew from the contest and another ballot was obtained.

The balloting was not completed until 2:45 p. m. Then the congress took Why not begin to think of it now an hour's recess for luncheon and until 6 o'clock routine business was transacted, while the delegates were awaiting the report of the tellers.

At 6 o'clock Mrs. Elroy M. Avery, chairman of the tellers, appeared on back the remains of the admiral to the stage with her report. As she was recognized by President General Fairbanks, the animated assemblage became silent instantly. She said the total number of votes cast was 690, six being blank. Report in Full of Special Committee of Council.

The report of Councilman William M. Chase, for the special committee appointed to confer with the Metropolitan Park Commissioners, was a model in many ways. It went into detail and gave those who are interested in the location and the work the information that they desired. The Ledger gives it in full:

The committee appointed under order No. 68, March 27, reports: That a conference with the Metropolitan Park Commissioners was granted and was attended by President Nichols and Councilman-at-large Chase, April 10th. The Mayor was unfortunately prevented from attending by reason of a previous engagement on other official business of the city.

ceived by the chairman of the Metropolitan Park Commission, Mr. DeLas Casas, and Commissioner Whitney. All answered by them. It was not necessary for your committee to present our reasons for claiming that, in the expenditure of the legislative appropriation of \$3,000,000, made in 1903, which the commissioners were to expend during the period of five years following, on parkways and reservations, a much greater portion should be used in Quincy than had been heretofore expended. They admitted the contention, and assured us that the greater portion of this year's funds were to be used in construction work in Quincy.

DANCING PILGRIMS.

The Annual Carnival of the "Saints" of Echternach.

On every succeeding Whitsun Tuesday from time immemorial 19,000 to 20,000 pilgrims of both sexes and of every age and condition of life dance for four or five hours at Echternach, in the grand duchy of Luxemburg, to an unmistakable polka tune and an apparently nonsensical refrain. The central figure of this great Echternach "springprozession" is St. Willibrord, who migrated from Northumberland to the frontiers of the Black forest twelve centuries ago. Emperors and kings have in vain forbidden the "saints" of Echternach to indulge in their annual carnival.

With the peasantry of East Luxemburg and Eiffel the "springprozession" is as popular today as it was in 1131, when King Lothaire came to pray. at St. Willibrord's tomb. The simple minded dwellers on the banks of the Sure and the Moselle are firmly convinced that their best hope of freedom from mystic dance of five steps forward and two backward, by which, after three hours' indescribable toll, they cover the the starting point, at which the pilgrims receive the episcopal blessing and the goal at the steps of St. Willibrord's shrine.

KNOWLEDGE AND CULTURE.

The Two Do Not Necessarily Walk Hand In Hand.

High marks in examinations depend upon a trained memory and a power of acquiring irrelevant information. Culture, on the contrary, is a sym-Culture, on the contrary, is a sympathetic assimilation of the best in the Quincy, Mass.

Over. F. A. PERKINS, 28 Cherry Areas April 3 if realm of thought and achievement. Culture is a slower process and a deeper, and its reward strikes further in. Assimilation of the best that has been thought and accomplished affects not merely the brain, but the characterthe whole spirit of a man. Culture implies a soil plowed and fertilized, where whatever seed falls has the better chance for growth. Information even in vast quantities, so long as it remains mere information, used for purposes of passing examinations, need not affect the manners nor the FOR SALE—The fine estate at the commod of Hancock and Greenleaf streets, with modern improvements; on liberal terms morals of a man; both may remain hopelessly lax in an encyclopedian mine of facts. But culture affects primarily the manners and the morals. A cultured gentleman has external

methods of getting on with his kind; he has the true sense of relationship, the feeling that all he can learn to feel or to be is not for himself, but for service; he knows himself in a network of human inter-relations. In the end the test of knowledge is not examination marks; it is living.-Harper's Weekly.

THE WOOLSACK.

It Is In the House of Lords and Yet

Is Not a Part of It. It is a curious fact that the woolsack on which the lord chancellor sits in the British house of lords is not, strictly speaking, in the house of lords, and this is why when the lord chance rises to take part in debate he first of all moves away from the woolsack to his own place as a peer before he speaks.

The fact, too, explains why noble lords who desire to avoid voting sometimes merely withdraw to the woolsack, where, not being in a parliamentary sense within the house, they are not counted in a division.

Again, though the lord chancellor is now invariably a peer, he is not necessarily so, and as a matter of fact the office has been held several times in the past by commoners. In such cases the lord chancellor could take no part in debate, not having a place in the house as a peer, and his functions as speaker were strictly limited to the putting of questions and other formal proceedings regulated by precedent from the woolsack.

The Copts of Egypt. The Copts in Egypt are the bookkeepers and scribes; they are also the ewelers and embroiderers. Their ancient tongue has fallen into disuse and is practically a dead language. They now use Arabic, like all the rest of the nation, but the speech survives in their church service, a part of which is still given in the old tongue, though it is said that even the priests themselves do not always understand what they are saying, having merely learned the sentences by heart, so that

they can repeat them as a matter of

TO ASK NEW TRIAL

Mrs Rogers' Petition Being Prepared by Her Counsel

FIRST GOES TO JUDGES

Upon Their Decision Rests the Question of Stay of Execution -- Reprieve Granted by Governor Expires June Second

Rutland, * ..., April 22 .- A stay of execution is expected by counsel for Mrs. Mary M. Rogers of Bennington, who is in the state prison under sentence of death for the murder of her husband, Marcus Rogers, and who, on Feb. , last, was granted a reprieve by Govrnor Bell until June 2.

Their expectation is based upon the belief that the state supreme court will not be able to consider the application for a new trial for the woman before June 2, and in that event the court is expected to grant a stay of execution until it has given the case its consideration.

T. W. Moloney of Rutland, one of Mrs. Rogers' attorneys, states that the petition in application for a new trial will be presented to the judges of the supreme court within a week or 10 days. This petition, together with the affidavits setting forth the nature of the evidence upon which the application for a new trial is based, will have to be presented to two of the supreme court judges. If, in their opinion, there is sufficient warrant for a consideration of the matter of granting

ew trial, they will grant the atpermission to file with the sucourt a formal application for the court as a whole to grant a hearing upon the malter.

The next session of the supreme court vill be held in May, but it is believed that, even if the application for considering a new trial is granted, the case cannot be reached until after June 2, the day upon which the reprieve expires. In that event the court has power to grant a stay.

Mr. Moloney says that he and his associates are making the light for Mrs. Rogers' life at their own expense. "A small amount of money," he says, has been placed at their disposal, but it is insufficient to meet the numerous and burdensome expenses connected with the court proceeding.

At the time Governor Bell was being besieged with appeals for clemency in Mrs. Rogers' behalf the statements were made by her friends that if a new trial could be granted sufficient money would be forthcoming to furnish her with the most expensive legal talent and to do everything possible to avert the death sentence.

Fourteen Killed In Convent Fire Montreal, April 22.—The little village of St. Genevieve is in mourning over of 14 lives in a fire which destroyed the convent of St. Anne there. One nun, nine children, ranging in age from 10 to 18 years, and four old women perished in the flames. Two nu: s were so severely burned that it is feared they will die. There is no organized fire protection in the village, The fire was beyond control by the time the sleeping people could be aroused and the quaint old structure was reduced to ashes.

No Blame Attached to Foote Washington, April 22 .- The court of inquiry which has been in session at Fort Myer, Va., for some time investigating the accidental wounding of Second Lieutenant Cubbison at Mount Gretna, has submitted its report to the department. The court exonerates Captain Foote, who was in charge of 1387 Hancock Street, the artillery practice which resulted in the wounding of Cubbison, and recommended that no further proceedings be had.

Honors From German Empress

New York, April 22.—Consul General Buenz of Germany has received from the Empress Augusta Victoria of Germany 51 diplomas to be presented to the women at the city hospital on North Brother island, who assisted in the work of rescuing and caring for those who were saved from the steamer General Slocum, which burned last June with a loss of more than 1000

How Nugent Emulated Maeterlinck

By KEITH GORDON

[Copyright, 1904, by T. C. McClure.] UGENT was in despair. For three weeks he had been trying to ask Virginia Dinsmore that pointed and personal question that should decide matters between them, and for three weeks he had been held back by an invisible but impassable barrier,

Ralph Merton, of course, was always hanging about her, but that gentleman, Nugent assured himself, was neither invincible nor insuperable. The thing that he was afraid of was less Merton than the long, mystical discussions that the two held concerning the meaning of certain modern writers whose very names were strange to himself. So, procuring a few volumes of Maeterlinck, he determined to prepare himself to "trot in the same class" with her, as his horsy friend, Michaels, would have termed it.

Clad in an old coat whose pockets slippers whose original shape and color could only be guessed at and fortified by his beloved pipe, he settled down Quincy, Mass, one evening and solemnly opened the Diasmore shook her head he went on: first volume of Maeterlinck that his hand fell upon.

But, though he made an honest effort, the atmosphere of his comfortable bachelor quarters, whose golf clubs.

pipes, swords, riding crops, etc., displayed themselves with masculine variety and confusion, did not seem conductive to the study of the modern mystic. Horse and dog pictures looked down on him, and pictures that were neither of these noble animals testified somewhat frivolously to the existence of the eternal feminine. Rows of smartly bound volumes filled the low bookcases decorously, bearing witness to their owner's aspirations, while his actual achievement was evidenced by the litter of magazines and several dog eared Kipling books upon his library table. Obviously it was not a Maeterlinck room.

"Good Lord!" he groaned at last. "Good Lord! And to think that she can read such slush as this when there are horses to ride, good golf to play and men to talk to." For one passing moment a doubt of Virginia's common sense assailed him, but only for a moment. Not even Maeterlinck could make him disloyal to her.

Besides, it must mean somethingall this endless dialogue in which fear whitened men and women echoed each, other's words to the accompaniment of shricking winds and ghostly moans in a greenish gray light that never existed outside a melodrama. Surely no man would write all this stuff without meaning something. But that was just it-what?

"You may search me!" growled Nugent, throwing aside the second volume with a disgusted air and refilling his pipe. "If I've got to stand above ninety in Maeterlinck before I can win Virginia-well, I might just as well

It contained but a few words, but in them all the poetry of Nugent's strong, sane nature had been compressed, and with a little catch of the breath Miss Dinsmore pressed the slip of paper to Press.

The book that she had been reading had fallen to the floor. With the tip of her toe she gave it a disdainful little kick as she fluttered across the room to her writing desk.

EASTER IN JAPAN.

The Cherry Blossom Festival, Resurrection of Fruits and Flowers.

By reaching Japan just at the beginning of spring you will find yourself in the midst of the native Easter season, which in reality is the cherry blossom festival. Because it comes at the time that Easter is celebrated in the western countries it is given that name.

The dawn of Easter in Japan is a Cazzling and fascinating sight even to like Merton should understand things an American, used as he is to the great which he, Nugent, could not, especial- display of flowers and bright and dainly when Merton's diabolical keenness ty costumes that come out on that day gave him the advantage of Virginia's in all the cities in the United States to welcome the season.

The Japanese are like a lot of happy school children let out to play, happy in their religious fewer festival. None of the church ceremonies has any part in their celebration, and, although the cherry festival commemorates the resurrection, it is the resurrection of the fruits and flowers.

All Japan rejoices. The children have a day set apart for their special delectation, and the grown people do little but seek to make the young people hap-"I see!" he ejaculated slowly. "I see py. Receivers for Scale Company.

Wm. H. Baker and Lucius R. Eastman, Jr., were on Friday appointed ing music: receivers of the United States Standard Processional, orchestra and organ, Scale Company, a Maine corporation, Vide Aquam, having a manufacturing business at Kyrie, Wollaston, by Judge Colt in the United Gloria, States circuit court. They were named in a suit brought by Samuel W. McCall and Charles F. Choate, Jr., receivers Sancius, of the Union Trust Company, says the Benedictus, Herald.

The Scale company, on Sept. 18, 1901, Recessional, orchestra and organ, gave a mortgage and trust deed to the Solemn High Vespers 7.30 o'clock with Union Trust Company on all its prop- the following music: erty and patents to secure an issue of Psalms, bonds. The plaintiffs claim that the Antiphons, Scale company has committed breaches | Haec Dies, of the trust arrangement by not paying Magnificat, taxes upon its real estate and by suffer- Regina Coeli, ing several of its lots to be sold for unpaid taxes, and that several suits have been brought against it, including one Recessional, orchestra and organ, by the Trust company, which has recovered a judgment upon notes for \$11,000. This judgment is not satisfied.

The bill further alleges that the Scale company has validly issued only \$25,000 of its bonds, but that other bonds, the number and amount of which is not Hymn known to the plaintiffs, have been unlawfully issued to other parties, includ- Hymn ing Andrew A. Meyer, its President, Anthem, and H. A. Meyer, his son. The receivers Hymn are to furnish bonds for \$20,000 each.

All souls that kindle and aspire.

Be this your altar and your home, In work and worship all akin, Whate'er your creed, come in, come in!

O Soul of Souls, O Lord of all. Be this a mansion of Thy house, Where young and old with joy recite Thy praises, Father Infinite.

The sermon of dedication was given by Rev. Thomas Van Ness. He said in part. Why have you Universalists and Unitarians come together to form this church? Because you believe as your responsive service says in the one-The Eternal- and the only God, and that God dwelleth in you. One of the foundation stones of this church is the belief in the permanence of the spirit of man. He emphasized the part that this church believes that the human part that God is our Father, the father of the white, the brown, the yellow and this human brotherhood! Hoyt of

By both temperament and feeling, Senator Platt was peculiarly the representative of New England ideas and of is slipped in just as the great circle is the old-fashioned Puritan integrity and conscience. Throughout his whole life never for a moment be left free."- he kept himself in the most sympathetic touch with New England institutions of every kind. The church, the township, the farm and the schools were the objects of his keen interest.

Senator Platt's last public ufterance was at the state capitol on March 21, when he delivered the eulogy over General Hawley, whose body lay in state.

judiciary committee of the United States senate. Later he was made chairman of the special committee of the senate appointed to conduct the -Mrs. Roosevelt's action in wearing Swayne impeachment trial, and this was followed by his appointment as presiding officer of the senate sitting as a court during the impeachment trial That was his last high public duty before returning to his native state to assist in paying honor to the memory

Senator Platt was first elected to the senate in 1879 to succeed Senator Barnum, a Democrat, who had been elected to fill the vacancy caused by the death of Senator Ferris, Republican. His last re-election was in 1903.

As regards his political and public personality Platt was a man to the last degree plain-spoken. While not a brilliant speaker, he was a clear and forceful one on the public platform. using speech without metaphor. This plain speaking quality brought him in public as well as in private very near to his constituency and friends and was one great source of his influence. particularly as in both public and personal relations he was always approachable.

Probably the most striking feature in Platt's public life was his intimacy with the state of Connecticut and its problems and interests as connected with federal affairs. All citizens of the state looked up to him with the most profound respect. During the first two not prominent as a speaker, but it was in those days that, by faithful attention to the work of the committee room and by tireless industry in studying the subject and methods of federal law making, that he laid the foundations on which were built his later leader-

ship in congress. In stature and face, Platt was an impressive figure, more than six feet tall, erect, strongly built, and with features which, above a full beard, often reminded his friends of Abraham Lincoln. In private and domestic life and the intimate relations with friends he carried the same directness and DR. CLAYTON R. MARSTIN simplicity of bearing and of speech which marked him as senator and pu')-

lic servant. Washington, April 22.-That the death of Senator Platt is a distinct loss to the president and senate and to the country at large is the unanimously expressed opinion of public men. To President Roosevelt his death will be especially felt, as the senator was a frequent visitor at the White House and at all times consulted by the president when important matters of state in and out of congress were under discussion. The senator's opinions and advice were no less highly regarded by his fellow-senators, who placed a high

estimate on his abilities and sagacity. Failure of Rallway Strike Rome, April 22.-The strikers' committee of agitation has officially decided to stop the railway strike. Many employes have already returned to work and the railway service has been practically resumed as it was before

Antiquity of the Spring Festival. From earliest times mankind has celebrated a joyous festival at this season of the year. Pagan nations made merry at the return of the sun to the north-710 the heirs-at-law next-of-kin, creditors and all other persons interested in the land when the sleeping earth awakened after the death of winter and all nature had a new birth. The rude Saxon tribes read meanings in the blossoming flowers and the fresh beginnings of natural life. In the south the Romans made feasts, the Persians regarded the occasion with gifts of eggs, typifying a resurrection of the body, and, taking all the festivals and their meaning, the thoughtful mind can readily trace them, leading to the great Christian festival teaching of the eternal life of the soul and the resurrection of man from the dead.

Russian Easter Eggs.

On Easter morning in Russia every one in the royal household distributes eggs. Those given the high officials are often very valuable, made of gold and set with precious stones, and very often worth thousands of dollars. In all the Greek and Roman Catholic countries the reigning sovereign is on Easter presented after high mass with a large basketful of beautiful decorated eggs, natural or artificial, which he distributes to the immediate members of the royal household.

Delcasse Announces His Intention to Resign

SHOCK TO THE CABINET

Diplomat Prevailed Upon to Reconsider His Determination In View of Agitation Over Morocco and Neu rality

Paris, April 22.-After a notable service of nearly eight years in the direction of foreign affairs, Theophile Delcasse has informed President Rouvier of the council of his desire and inten-

steps to endeavor to secure a reconsideration of his determination. A cabinet council was held at which it was interest of the country at this particu- plaints had come from Cambridge. lar time required that Delcasse retain the president of the council.

The motives leading up to Delcasse's sudden determination to retire from internal controversies over the Moroccan question, and this to some extent has been accentuated by similar controversies over French neutrality in the far east. The opposition have been quick to seize upon both questions. and, headed by Socialists and Nationalists, have directed their criticisms against Delcasse.

The Socialist criticisms have been particularly vehement during recent days on the Moroccan question and this appears to have finally decided Delcasse to surrender the question into other hands. It is felt that his retirement now would be hailed in Germany as a German triumph, and this Why not begin to think of it now is one of the main considerations leading to an earnest appeal to Delcasse

> The announcement concerning Delcasse's intention to resign was one of many incidents in a day of much anxiety throughout government quarters. Following close on the heels of the complications with Germany over Morocco, the Franco-Japanese incident suddenly assumed serious proportions, and unusual energy was shown in preventing its embroiling France in complications in the far east.

In order to secure definite co-operation between three departments of the government, namely, naval, colonial and foreign, a conference was held between leading representatives of each ance of the neutrality of Indo-Chinese | to try Hoch is proving a difficult waters and orders were sent to Governcific squadron and whether it had or men. had not withdrawn from French

Communications with St. Petersburg led to orders being transmitted by the Russian government to Rojestvensky to rigorously respect the neutrality of French waters. It was even stated czar in order to assure complete respect of French neutrality.

Probably the most significant development from the energetic measures adopted was the recipt of a dispatch from Saigon saying that imperative orders had been given for the disarmament of the Russian cruiser Diana, which sought refuge in the harbor of Saigon eight months ago for purposes of repairing. The main portion of the Diana's machinery must now be handed over to the French naval authorities at Saigon.

It is stated at the foreign office that o representations of any kind had been presented by Great Britain concerning neutrality. At the same time it is anticipated that some such representations will be made. The fact that British Ambassador Bertie has given up his Easter holidays and will return to Paris today after a conference with Foreign Secretary Lansdowne appears to support this view.

However, the cordial relations existing between France and Great Britain would doubtless modify any reprethis time would be deeply wounding to France, who relies on the Angio-French entente as a counterpoise to Germany's menaces over Morocco.

British Regret His Departure

London, April 22.-It is a long time since the fate of any foreign minister has been watched with such keen attention in Great Britain as is M. Delcasse's today. It is unanimously admitted that his downfall would be a great victory for the German emperor, and the strongest hopes are expressed that Delcasse will consent to reconsider his intention to retire from the French | ceed to San Domingo were received late cabinet at this time, when so many delicate questions of policy, such as to take on coal and stores immediately Morocco, far eastern neutrality, etc., and she got away early this morning. are requiring the ablest man at the helm.

The illness of Jefferson which ended death was contracted, it is bewhile on a recent visit to his narles B. Jefferson, at Hobe sound, a few miles above Palm beach, where he went to meet his friend, former President Cleveland. It is believed indigestion. Since his return to his home this condition grew steadily worse with slight rallies until the end.

Joseph Jefferson was born in Phil ouse; of members of the chorus anywhere, any time, at the store of Mr. E. A Hayden, Hancock and Beach streets, and at the jewelry store of Mr. Eben Hardy, Newport avenue, opposite the R. R. station, and at C. F. Petten- fession in this country. He first appeared on the stage as a child and during his career has played in a number of foreign countries. His great reputation was made in Rip Van Winkle, which he played in almost every city in the United States. Of late years he has played but a few weeks of each season and in almost every one of these short seasons he confined himself to the one character of during his career has played in a numfined himself to the one character of

In his retirement he was an enthusiastic angler and derived much pleasure from this sport at his home in Buzzards Bay, Mass. Besides being an actor, he was a painter of more than passing ability and several of his works have attracted considerable attention. Joseph was also the name of Mr. Jefferson's father and grandfather and all were actors. The lives of the three were similar in that their early careers were struggles for recognition and alod. Up to 1857 Jef ferson is said to have merely attained ferson is said to have merely attained the standing of a respectable stock actor, but in that year he became associated with Laura Keene's theatre in New York, where, for two years, he appeared with the elder Sothern, William R. Blake, Charles W. Couldock and Dion Povicenth. We Love and Dion Povicenth. and Dion Bouicault. Mr. Jefferson became prominent in the role of Asa Trenchard in "Our American Cousin." This play ran for 150 nights. Other characters portrayed were Newman Noggs in "Nicholas Nickleby"; Caleb Plummer, in "The Cricket on the Hearth"; Dr. Pangloss in "The Heir at Law," Bob Acres, in "The Rivals," and Dr. Ollapoo in the "Poor Gentle-

In 1860 Mr. Jefferson visited California, but abandoned that field for Australia, where he spent a profitable four years. London was visited against his own inclination in 1865 and at the Adelphi theatre he played "Rip Van Winkle" for a 150-night run. After appearing in some of the larger cities in England he returned to New York in

1866. Since 1867, when he married for his second wife Miss Sarah Warren, he confined himself to a few favorite parts of which Rip Van Winkle was the principal one.

Several months ago Jefferson retired from the stage and has since divided his time between Florida and Cape Cod.

Boston Theatre Closed

Boston, April 24.—Owing to the death of Joseph Jefferson the Boston theatre, where "Rip Van Winkle" was announced for the current week, will be closed until next Monday. Thomas Jefferson, who has been playing his father's famous part, received the news from Palm Branch at the Touraine last evening. Charles Harris, assistant manager of the Boston theatre, and a personal friend of Jefferson, was the first to inform him of the death of Mr. Jefferson was prostrated by the

intelligence, which was unexpected, after the favorable reports earlier in the day, and after he had given directions to cancel his engagement in Bos ton he secluded himself, and denied himself to the many who would have expressed their sympathy in his be reavement. A great many telegrams came for him during the evening, but none were sent to his room.

First Church. Easter Sunday was observed at First thurch by four impressive services, all largely attended. The floral decorations were simple but appropriate, consisting of pots of Easter lilies and ferns, with asparagus vine about the beauti-

ful high old pulpit. At the half past ten service Rev. E. Butler's sermon was impressive and full of the meaning of the Easter day. The church quartet sang appropriate

nusic with several beautiful solos. After the morning service, communion was held which was particularly impressive, the pastor speaking words of comort and encouragement and also of the opefulness of this glad season of oring, with its sunshine and growing egetation all telling of the new life.

The four o'clock service was for the Sunday school and their friends. It was mostly musical with recitations by some of the scholars, and an Easter story by Miss Walker. At the close Mr. Johnson announced a gift of twentyive dollars from a friend who had always taken a great interest in the school, also a gift of potted plants from Mr. Henry H. Faxon, which were distributed to each child at the close of the service. A large collection was taken for the Sunday school mission. It was one of the prettiest services ever held by the school giving pleasure o young and old. The assistance of the church quartet and of Mrs. N. S. Hunting and Mrs. George E. Pfaffmann

added much to the service. In the chapel at seven o'clcck a musical service was held by the Young People's Religious union which drew a large audience and was a fitting close to a most perfect day; a day of hopefulness, and of drawing nearer to God and emulating Christ.

Reynolds Post, G. A. R., of Weynouth, are to do away with the usual Memorial day parade this year. In its place the school children will decorate the graves in different sections of the town. > await the issue of the approaching sea battle between Rojestvensky and Togo The government undoubtedly would be greatly strengthened, at least for the moment, by a victory decisive

> enough to change the war situation. The liberals are impatient at the de lay and suspicious of every move of the government. They are convinced that if victory comes the bureaucracy, to which the realization of reforms has been consigned by the czar, will be abla despite the clamor throughout the country to keep the execution of these reforms in their own hands, which, of course, in their opinion would mean

> of endless commissions. Moreover, they believe that the czar might again be persuaded to listen to the necessity of the old style of repression of the present agitation.

> their eventual dissipation in a labyrinth

Should Rojestvensky be defeated, on the contrary, the liberals believe that the bureaucracy would capitulate and that peace and a constitution would come.

Rojestvensky Preserves Silence St. Petersburg, April 24 .-- Vice Admiral Rojestvensky continues his policy of strategic silence and has answered the admiralty's message of last Saturday, pointing out the position of the French government on neutrality regulations, only by putting to sea, giving no intimation of his plans or destination. Russian naval circles would not be surprised if it should develop that the squadron had been already two days or more on the way northward when the instructions were cabled to him. and that the admiralty was aware of this when the message was sent asking the admiral to move outside the three-mile limit if he happened to be in French territorial waters.

Popular Tension Relieved

Tokio, April 24.—The announcement that in response to Japan's representations France has promised the expulsion of the Russian second Pacific squadron from Kamranh bay and affirmed her determination to maintain neutrality is received here with pleas. It is an Excellent Protection ure and has relieved the tension of popular feeling, although it is believed that, if Rojestvensky entered Kamranh bay for the purpose of finally preparing for a dash north, the purpose was accomplished before he was ordered to leave. There is also a suspicion that Rojestvensky may simply make a technical removal from French territorial waters by going outside the three-mile limit. Hence the incident 61 Chestnut Street. will remain unclosed until the Rus-

TENEMENT HOUSE FIRE incendiary Perhaps Responsible

For Serious Panic Boston, April 24.-One woman was terribly burned, while a score of women and children narrowly escaped death, in a fire in a tenement house at 24 Billerica street, in the West End origin, started beside the front stairway in the hall, shutting off the only means of quick egress from the building, as the draught carried the flames up the areaway to the roof almost instantly.

Bridget Whalen, 45 years old, who lived in the attic of the building, was terribly burned. She was found by the firemen lying on her face in the upper hallway, with the flames all about her. Her clothing was on fire. The firemen carried her to a front window and then took her down a ladder to the street. It is thought that she will recover.

The fire was discovered by a person who was passing by the house and saw the flames bursting from out the hail beside the stairs. Before the firemen arrived the people of the house were in a panic, running from window to window, and threatening to jump to the street. All were rescued by the firemen and carried down ladders to the street. The authorities will investigate, of the fire.

Plan to Improve Forest Reserves About Pasadena, Cal.

A number of millionaires in Pasadena, Cal., have a unique scheme for improving the forest reserves of that section, which if successfully worked out may attract the eyes of the country, says a Pasadena correspondent of the Los Angeles Times. The project is for the establishment of a "game sanctuary," in which will be introduced wild animals from Africa and other far away countries whose climates correspond somewhat with that of southern California. A short time ago Macomber, who is

the son-in-law of L. V. Harkness, the Standard Oil magnate, took several of his friends on a trip of investigation in the wilds that may be populated along lines suggested above. Several of the party were quite enthusiastic over the project. The enterprise has been submitted to T. P. Lukens, the indefatigable forester, who is an agent for the government. Lukens may take it up with Chief Forester Gifford Pinchot. Those back of the plan say they are willing to start the deal along with the expenditure of \$100,000 or so if the government will grant them privileges. Not only will they stock the mountains within a certain limit with all sorts of animals, pheasants and the like, but they will plant thousands of trees at their own expense and contribute extensively to the maintenance of this mammoth private park.

Fred Burnham, who is thinking the project over, is a man of long experience with African game. He was a scout in the Boer war and earned worldwide fame besides recognition by the English government perience also in Africa both hunting. The men interest ground of the mountains, but rather a mammoth outdoor zoo.

UP TO DATE IGORROTES.

Party From St. Louis Had Trunks, Overcoats and Alarm Clocks.

A letter from Lieutenant Walter Martin of the Second cavalry, stationed 190 miles from Manila, recently received by his St. Louis relatives, tells how his command encountered Chief Antonio and his band of Igorrotes at Bangar, fresh from the Louisiana Purchase exposition, says a St. Louis dis-

"We certainly were surprised at the appearance of the bunch," Lieutenant Martin writes. "We hadn't been to the world's fair and had no idea how it would change them. We expected to see the same scantily clad Igorrotes we had frequently met on the trail to Baguio. But these fellows had trunks galore. They also wore overcoats of immense thickness. They had almost every imaginable variety of toy and alarm clocks in profusion. They seem- lars. ed to be the favorite piece of luggage, as the Igorrotes were particularly solicitous about them.

about St. Louis. 'St. Louis very fine place,' they said. 'Lots of people, but very much cold.'

"We inquired about St. Louis dogs. "'Lots dugs there,' they replied. Much big dug-too big, too much hair.'

"THE CRISIS."

An Appeal to the Spirit of Russians

by George Meredith. George Meredith, the English poet contributes to the London Times a poem entitled "The Crisis," beginning: Spirit of Russia, now has come

The day when thou canst not be dumb. After eloquently painting the perils surrounding the empire, the poet thus addresses the spirit of Russia:

Those who bind 33, 382 30, 652 Thy limbs and froncap flesh misdoubt That thou art of the rabble rout Which cries and flees with whimpering 23,045 Which cries and flees with whimperis From reckless gun and brutal whip, But who has at heart the deeds Of thy heroic offspring reads In them a soul not given to shrink From peril on the abyss' brink.

The poem concludes: Give to thy sons a breathing breast And, him resembling in his sight, Say to thy land, "Let there be light."

Speedy Wolf For Presidential Chase A notorious black wolf that has baf-23,710 fled all efforts at capture and has probbly been chased more miles in the last three years than any other wolf in Oklahoma territory was recently taken alive by J. R. Abernathy and party after a chase lasting eight hours, in which fifteen dogs and some of the fastest horses in Comanche county were used, says a special dispatch from Guthrie, Okla., to the St. Louis 14,305 Globe-Democrat. Mr. Abernathy is to 14,274 lead the wolf chase which will be given heat, hot and cold water on each floor 12,533 for the entertainment of President Roosevelt on his southern trip. The wolf that has been caught is the speedlest one Abernathy ever undertook to capture. He was very anxious to secure him for the coming chase.

Quincy Council, Knights of are requested to call upon the Chief of Police, Columbus.

Handsomely Women.

Pretty Decorations, Entrancing Music and a Large Attendance.

An annual event that is looked forward to with many thoughts of pleasure is the Easter Monday night ball of Quincy Council, Knights of Columbus.

being royal entertainers has long been Fair trial given of all horses to responsible successfully established and Monday parties. night's affair at Music hall only served Quincy, Mass. to add another endorsement to it.

A large and efficient committee has long been at work perfecting its arrangements for it was determined that this year's affair should if possible eclipse all previous efforts.

How well they succeeded can be borne out by the many who were in attendance. Entrancing music, handsomely gowned women, gallant gentlemen and pretty decorations served to form a combination whose effect was indeed pleasant to look upon.

While hundreds participated in the merry dance, there were as many more who were content to enjoy the emusic and watch the gay scene from the balcony.

The platform never looked more attractive than on this occasion. Potted plants in large numbers were tastefully arranged along the front of the platform while streamers of green were festooned across the front. It was a setting of green with just a touch of color in pink and white flowers. Behind this hugh bank was Cuff's

orchestra which furnished music for the promenade concert and the ball that followed. It was 8 o'clock when the concert commenced and the following pleasing

program rendered. March, "Topliners" Eastman Concert Waltz, "Loveland" Holzmann Medley Overture, "Blue Bell" Howley Havilan Trombone Solo. Selected.

Caprice, "Love and Kisses" Chas. K. Harris Xylophone Solo, "Karama" Mabel McKinley By Gerald A. Sullivan.

While this was in progress the guests were arriving and at 9 o'clock when the march, that inaugurated the ball, was started the larger part of the guests had arrived.

The march in itself was a feature. Owing to the illness of Grand Knight, Peter J. Cahill, who was floor marshall, the march was headed by Deputy Grand Knight, Timothy J. Carey, and Mrs. Peter J. Cabill.

Following were State Secretary W. J. O'Brien and Miss Minnie Cashman, Postmaster Charles L. Hammond and Miss Mary Carey. In their wake were upwards of one hundred couples.

The program of dances was one that would please all, being made up of the usual modern dances interspersed with uadrilles and the like. At 11 o'clock a supper was served in

the annex.

Among the guests present were Rev. John J. Coan, Rev. John P. Cuffe, Rev. Matthew McDonnell, William J. O'Brien state secretary; James H. Elcock, Chief Ranger of St. Francis Court of Foresters; President M. T. Walsh of Division 18, A. O. H.; President Philip F. Eagan of Division 4, A. O. H. and Postmaster Charles L. Hammond.

The several committees in charge were designated by different colored badges. That of the floor marshall being green and white; floor director, blue and white; assistant floor director, gold and white; the aids, white and the reception committee, crimson. Peter J. Cahill was floor marshal; Timothy J. Carey, floor director; John J. Cunniff and Joseph A. Keating, assistant floor directors and they were assisted by a large corps of aids.

Past Grand Knight William T. Shea was chairman of the reception committee and he was assisted by a large committee who were untiring in looking after the welfare of their guests.

The committee of arrangements to whom the success of the affair was largely due was as follows:

Peter J. Cahill, Chairman, John J. Cunniff, Secretary, John W. Walsh, Treasurer, Wm. T. Shea, Robert E. McDonnell, Timothy O'Connell, John W. McAnarney, Edward J. Sullivan, Timothy J. Carey, Bart. A. McLane.

Thomas Scollan Was Long Fugitive From Justice

CAPTURED AT NEW YORK

Wanted For Connection With "City Teaming Frauds" a Boston and Had Been Indicted For Larceny

New York, April 25.-Thomas J. Scollan, a mining broker, with an office in Wall street, was arrested in this city as a fugitive from justice in Boston. He was committed to the Tombs prison to await extradition. According to the police, Scollan has been wanted in Boston since May, 1898, in connection with some street paving frauds. Since that time he has travelled practically all over the world. Two years ago he came to this city and engaged in business. SUICIDAL MANIA

Man's Desperate Effort to End Life In Children's Presence

Fall River, Mass., April 25 .- While suffering temporarily from suicidal mania last night John Glynn, a mason, struggled desperately, in the presence of his four children, to end his life, and in the struggle cut his own throat and inflicted a severe would in the right arm of a daughter. Both father and daughter will recover.

Glynn was sitting in his kitchen when his three daughters and a son returned home from work. He quarreled with his children and suddenly drew a knife from his pocket and slashed his throat. Frank, the son, Alexander Marnock and family are to and his sisters surrounded the demented father and endeavored to take the knife away from him, but did not succeed until he had cut himself several times and inflicted an ugly wound in the right arm of his daughter Alice.

Relieved of the knife, Glynn fled from the room and in a hallway again slashed his throat, this time with a razor. Bleeding from the several wounds Glynn then returned to the kitchen and was there when the police arrived.

KILLING OF YOUNG

Prosecution Outlines Claims at Patterson Trial

PISTOL BOUGHT BY SMITH

Claim That Former Showgirl and Relatives Conspired to Prevent Young Leaving the Country and Shortening Their Source of Revenue

New York, April 25 .- The third rial of Nan Patterson, the actress, accused of the murder of Caesar Young, the wealthy bookmaker, has begun in earnest before Recorder Goff in the court of general sessions. Confident and smiling in the previous ordeals, the former showgirl yesterday was on the verge of collapse. First Veto.

Men.

Governor Douglas followed the example of Governor Bates yesterday and sent to the Legislature a veto of the bill for the incorporation of the Massa-chusetts Casualty Company. It was his first veto.

As the governor says, our insurance aws are "the carefully prepared results of years of experience," until they are now acknowledged to be the best and most genuinely effective in the country. There should be no letting down of the bars they have raised for the public protection, no matter how innocent appears the process. It may mean no pears the process. It may mean no arritement an insurance arrived a both as a second and company to do both a casualty and a surance laws say that companies shall engage in only one class at a time.
To permit any set of men double privileges on one capital, says the Boston
Journal, is certainly legislative favoritism, and is rightly discouraged.

Peter MacQueen Lecture.

It was a well filled house that greeted Rev. Peter MacQueen last evening at the Washington Street Congregational church, when Dr. MacQueen gave a beautifully illustrated lecture on Russia. The speaker was presented to the audience by Mr. Arthur W. Newcomb. Among the opening pictures were those of the Czar and Czarina. The personality of the Czar was touched upon a good-hearted man with very little backoone. Russia's present ruler will probably be spoken of in the next reign as the unfortunate ruler.

Pictures of Russian scenery were par-Pictures of Russian scenery were par-ticularly fine. The grand cathedrals and palaces at St. Petersburg were also thrown upon the curtain. Mr. Mac-Queen remarked briefly upon each scene and from many shown one could get a fairly ofear idea of far-away Russia.

Mr. Ewing began the examination last Thursday, and yesterday announced an apparent shortage. Cashier Merrill was summoned by the directors and, being unable to explain the situation, was asked to resign. He refused, and at a meeting last night the directors voted to remove him and appointed Assistant Cashier Batchelder cashier. Pending an examination of the pass books of the depositors, the general management has been placed with President Symonds. Following Ewing's examination of the bank's books other parties began a similar ex-

amination. Mr. Merrill is well known here, where he has always resided. He is the son of Judge Merrill, and a brother those who came here for the service of Albert Merrill, treasurer of the Warren Five Cents Savings bank of cial trains. this city. The charter of the bank was recently extended to 20 years.

The capital of the bank is \$250,000, and, according to the last statement, the surplus is \$115,160. Nathaniel Symonds has been president of the bank for a number of years.

Not a Dollar Sunk In Wheat and Stocks Can Be Recovered -- Manipulated Collection Accounts With Aid of Assistant Cashier and Bookkeepers

Milwaukee, April 25.-Frank G. Bigelow, president of the First National Bank of Milwaukee, was arrested last evening, charged with the embezzlement of over \$100,000 of the bank's funds. The arrest of Bigelow followed his confession to the board of directors of the bank that he was a defaulter to the extent of \$1,450,000. Following Bigelow's confession he was removed from the presidency of the laid before the federal authorities.

President Bigelow's confession was made at a special meeting of the board of directors Saturday evening. He met with the directors Sunday and all Sunday night. In addressing his fellow-directors, Bigelow said he had to make a confession that he had misdirected the funds of the bank and that an examination of his books and a comparison of figures would show that he was indebted to the bank for more than \$1,450,000. This money, he said, had been lost in speculation in wheat and stocks. Not a dollar of it could be recovered and the only sum he could offer toward compensating the bank was personal securities valued at \$300,000

A BRAVE QUAKER LAD.

When the question of courage is once settled it hardly makes a difference what kind it is, whether it is on the battlefield or in the tent. In 1861, says Lippincott's Magazine, the great-grandson of a Quaker who had settled on an "It will be no use," said the young man. "I shall never fight. My mother taught me it is a sin. It is her religion, and my father's, and their fathers'. I shall never raise my hand to kill any

The recruiting officer took no notice. "We'll see about that later," said he. The regiment went to Washington, and the Quaker boy drilled placidly and shot straight,

"But I shall never fight," said he. Word went out that there was a traitor in the ranks. The lieutenant conferred with the captain, and all the forms of punishment devised for refractory soldiers were visited on this lad. He went through them without flinching, and then he was taken before the colonel.

"What does this mean?" demanded the officer. "Don't you know you will be shot?" The Quaker smiled a little. He had

steady eyes and a square chin. "That is nothing," he said. "Thee didn't think I was afraid, did thee?" The prisoner went back to the guard house, and the colonel sought out Pres-

"Why, that's plain enough," said the president. "There's only one thing to him home. You can't kill a boy like that, you know. The country needs all her brave men, wherever they are. Send him home."

So the Quaker went back to the is land, to life and duty as he saw them and his children tell the story.

CAMPHOR BYPRODUCTS. How They Are Obtained From Every Part of the Tree.

Every part of a camphor tree, even to the leaves, contains camphor. The forests are not confined to Formosa alone, but are also found in Japan proper. Camphor is found in the form of crystals in the wood tissues and is separated from the crude oil by double distillation. From the first distillation phogenotol, the principle of the camphor oils of commerce. The crude camphor is a dark colored substance,

fusing at 170 degrees C. Among the byproducts may be mentioned crude camphor oil, which comes out simultaneously with the camphor; white oil, obtained by sublimating the crude oil and used in the manufacture of soap. Red oil also is obtained from the crude camphor oil as well as black oil, which is extensively used in the preparation of varnishes. A turpentine is secured from the white oil that is in great demand for medical and indusemployed to a considerable extent in the manufacture of perfumery and also soap, and a disinfectant is also office. the cholera bacillus. Wolf, Camel and Bear. The only two animals besides the wolf for which domesticated animals never seem able to conquer their aversion are the camel and the bear. The former is a case of pure natural aversion. It has been noticed that when the camels in a traveling menagerie have been tethered at any particular spot horses will shy and refuse to go near it, even after the camels have gone on their way with the rest of the show to another town.-Country Life.

Remorseless Progress.

In every great business the chief trouble is to find a powerful and pioneering staff. It is frequently achieved in these days, and especially in America, by a series of remorseless experiments. One person after another gets his chance, and nine-tenths of the number are flung upon the street.-British Weekly.

The end men wore suits of bright red with green trimmings, loud shirts, collars and ties, tall hats and buttonhole bouquets. The interlocutor was in conventional evening dress.

In front of the stage was the Criterion orchestra with George A. Suits as director.

The end men and chorus were made up as follows: Interlocutor, -John J. Henry.

Bones,-Robert H. Fraser, Ellerton C. Williams, Lewis Ela.

Tambos,-William A. Field, Dr. Fred C. Merrill, Dr. Frank E. Dawes. Cupid. - Master Robert Merrill.

Chorus,-William D. Allen, George L. Bean, William M. Chase, L. W. Cochrane, Harold P. Farrington, Arthur Fowler, Roy C. Given, Charles N. Kolstad, Joseph C. Mitchell, Fred H. Raymond, George H. Stebbins, Fred L. White, Harold Winslow.

The songs of the end men were particularly good, especially those of 'Bill'' Field, who sang Lew Dockstader's famous song "Shame on You" and "Doc" Merrill's "Under the Banana Tree" and his encore song, 'Wasn't She a Daisy." Lew Ela's topical song was brimful of hits, one club challenge cup.

Aside from the songs by the end men, there were solos by Herbert Y. Follett, J. Ed. Davidson and P. M.

The chorus was strong and full and was excellent. Between the songs the end men cracked the usual jokes. Some of these were pointed, and the audience was quick to catch on.

The program was as follows: Overture-"The Shoe King" dedicated to Gov.

WEDNESDAY HALF HOLIDAY DURING the SUMMER MONTHS.

HE Saturday afternoon off has become an established custom in nearly all lines of trade, but an impossibility in the grocery and provision business. Nevertheless, we are convinced that those interested in the grocery and provision business should, and can, have an afternoon off on Wednesdays during the summer months with-out inconvenience to themselves or to the public. Therefore, we have decided to close our store at one o'clock Wednesdays during May, June, July and August, excepting those weeks having a legal holiday, and we ask the co-operation of the public in making this innovation a success. Nan Patterson's Comment When Court Adjourned

SMITH IS NOT IDENTIFIED

Pawnbroker Cannot Say Ha Bought Revolver Which Killed Young -- Bookmaker's Relatives' Interesting Testimony

New York, April 27 .- The climax in the prosecution of Nan Patterson, on trial, charged with shooting "Caesar" Young, was reached when Hyman Stern, the pawnbroker, failed to identify J. Morgan Smith as the man to whom he sold the pistol with which Young was killed.

This feature had been looked forward to with much anticipation and was expected to make a sensation. On the contrary, however, it caused but a question chiefly concerns ripple of comment and surprise in the courtroom, although it was the drafailed to identify Nan Patterson or who purchased the revolver. Smith had been brought from jail to confront Stern, and after the latter's testimony

was taken back to the Tombs. The tension was intense as Stern gave his evidence, the room being so still that his heavy breathing, as as be heard. When he said he could not identify Smith, the tension relaxed and a sound arose throughout the court as though everybody present had taken a short indrawn breath

GLADDEN AT THE HEAD Campaign Against Funds From Doubtful Sources

Boston, April 27 .- Dr. Washington next week. Gladden of Columbus, O., moderator of the General Council of Congregational Churches of the United States, was the urday. principal speaker at a secret meeting here of Congregational ministers invited to assemble by the clergymen's committee which is protesting against the acceptance for religious purposes by the denomination and its affiliated societies of gifts from John D. Rockefeller. Dr. Gladden's remarks were embodied in a statement which will be given to the public later.

The committee in charge of the meet ing was appointed originally to protest against Rockefeller's gift of \$100,000 to the American Board of Commissioners for Foreign Missions, but inasmuch as the prudential committee decided to accept the money, the committee has continued its efforts to prevent the ac- Watch cleaned \$1 .- Williams. ceptance by the church of any financial help the source of which is objectionable to the protestants.

were of less importance that the lesan illustration he said that there is always more or less strife between the buyer and seller of a commodity and he could not look into the future and see the time when labor would have a continual harmonizing agreement with capital. There may be mutual agreements to last for certain periods, but labor must eventually share in the business prosperity of the country. Speaking of trade agreements,

President Gompers said that employers of labor have violated agreements with labor ten to any one violation by labor itself. The Civic Federation, he said, is a splendid organization, and it as black as they have been painted, archist he has been pictured.

William H. Pfahler, former president of the National Founders' association. who was associated with the late Senator Hanna in the organization of the Civic Federation, spoke on the subject of trade agreements in which he had participated as an employer. Many such agreements, he said, are merely a due to the pressure brought by organized labor, a great portion of it being due to the enlightment of the employer.

The last speaker was John F. Tobin, president of the Boot and Shoe Workers' union. He contended that trade the strike was practically eliminated and the union scale will be paid. in shops where organized labor is employed. His organization's success and perfect understanding with employers, he said, is due to the fact that the broken agreement is an impossibility in the shoe trade.

The Burden Imposed by Keeping Russian Prisoners.

HEAVY EXPENDITURES ENTAILED

Prices of Meat and Vegetables Have Nearly Doubled In the Last Few Months-Czar's Soldiers Hearty Eat. ers, and It Is Well Nigh Impossible to Make Them Observe Sanitary

Aside from the tremendous burden

of the active campaign itself Japan must find herself saddled with a heavy indirect expense in caring for her Russian prisoners, says the Shanghai Mercury. Already there are at the different prison camps-that is, the places which have been chosen as headquarters for receiving the prisoners - some 30,000 Russian captives, officers, privates and supernumeraries (these last including a few women and several children), all of whom have to be clothed, fed and guarded, and if all of the Port Arthur garrison who are not to be permitted to return to Russia on parole are taken to Japan this number will be very materially increased, without taking into consideration any more who may be captured in other engagements. At a moderate estimate these three items of primary expense-namely, food, clothing and guards-cannot be much less than 50 sen (a coin worth about fourfifths of a cent) a day, and at that rate the total which Japan will have to provide for one year's maintenance of her prisoners of war is upward of 5,000,000 yen (a coin worth about 73 cents), and there is the disagreeable fact confronting the Japanese government that it is probably impossible for it to use the labor of those prisoners in any advantageous way.

No wonder, then, that the people of Japan are grumbling at this heavy expense that is added to their already onerous burden. The legitimate ex penses of the war they bear cheerfully as a matter of principle, although these have already reached a sum quite twice as great as that which was announced by the government at the commencement of hostilities, but there is noticeable in the vernacular press a disposition to ask if the authorities are not needlessly coddling the prisoners, doing too much for them in a sentimental way, and if the men cannot be compelled to do something that shall at least contribute toward their keep, if not pay the whole expense thereof. Yet there is no open revolt at the expressed intention of their government to do what it can to make the Russian prisoners at least comfortable.

Russians justly have the reputation of being hearty eaters, and they are not accustomed to the simple diet which is satisfying to the Japanese, so that even if the prisoners are kept upon a diet that to them might seem almost abstemious the cost of it would quick- CHARLES CRANE. ly run away with three times the sum that is sufficient to feed a Japanese prisoner. In the Japanese jails it can hardly be necessary to spend more than 10 sen a day for the food of a native prisoner, who gets no meat, but little fish and absolutely nothing in the way of what a native of that land would call "luxuries." With the Russian pris-

oners it is very different. To keep them well they must have a good deal of meat and other things that are never dreamed of in arranging the TO LE'T-A Nice Furnished Room with al fare in Japanese prisons at ordinary times. To such an extent is this true that the prices of meat and vegetables have nearly doubled in the last few months. So that it will be seen at once 30 sen a day for food is not an extravagant sum to allow per capita to

those Russian prisoners. This leaves only 20 sen for clothing, medical attendance and expense of guards, a sum scarcely sufficient, and it is quite likely that the estimate of 50 sen a day will be almost doubled when Furniture and Piano Moving, the bills are actually settled. Besides this burden of expense there is staring Japan in the face the grave danger to her people of an outbreak of disease among the Russian prisoners. In spite of every reasonable effort on the part of the Japanese guards it is well nigh impossible to make the Russian prisoners take necessary sanitary precau-

If an epidemic of dysentery or smallpox or something even worse should break out at any one of the prison camps it will have sad effects upon the Japanese people in the neighborhood GESS, Acams Building. Quincy, April 15. and with the approach of warm weather that danger will become a positive menace. It would be interesting to know just how the Japanese prisoners in Russian hands are faring. Exact knowledge is not available, and, besides, the number cannot be comparable with that of the Russian prisoners in Japan, for no such disaster as the surrender of Port Arthur has befallen the Japanese. It is certain, however, that a considerable number of Japanese have been taken by the Russians, but where are they and how have they Music Hall Block; or at residence, 10 Foster been treated? The disagreeable impression created at the time of the surrender of Port Arthur, when the disparity between the number of Japanese prisoners actually accounted for with the number that must have fall-en into Russian hands became evident. | 64 Revere road, Quincy, 6 to 7 P. WEDNESDAY HALF HOLIDAY of JOHN A. HOLBROOK, No. 292 Bridg Street and No. 7 Newton Street, North Wey-mouth, Mass., SATURDAY, April 29th, at 3 o'clock P. M., DURING the SUMMER MONTHS.

HE Saturday afternoon off has become an established custom in nearly all lines of trade, but an impossibility in the grocery and provision business. Nevertheless, we are convinced that those interested in the grocery and provision business should, and can, have an afternoon off on Wednesdays during the summer months without inconvenience to themselves or to the public. Therefore, we have decided to close our store at one o'clock Wednesdays during May, June, July and August, excepting those weeks having a legal holiday, and we ask the co-operation of the public in making this innovation a success. Rowdyism. Editors of the Daily Ledger:

As one of the audience at the very creditable Minstrel show given by the Wollaston Yacht club at Music hall Wednesday evening, I desire to enter a protest against the rowdyism and utter disregard of the rights and comfort of everybody in the hall (except themselves) indulged in by the Tufts College students who attended the show and who from the moment of their arrival owned the hall, and attempted to run the whole performance.

Ringing cowbells, firing torpedoes, beating time with canes, and giving college yells might have been fun for them, but was anything but agreeable to the rest of the audience who had paid their money to enjoy the performance. Such actions ought to have been summarily squelched by the police, and it is to be hoped that in the future annoyances. F. C. F.

Bicycle Railway

In the Massachusetts House on Thursday the committee on street railways reported a bill to incoporate the Boston, Quincy & Fall River Bicycle Electric Railway Company with a capital stock of \$5,000,000 and authority to operate a bicycle railway between Boston and Fall River. This is the well known E. Moody Boynton proposition. The following dissenters are recorded against the bill: Senators Cumming and Burns and Representatives Hannan, Quinlan, Phillips and Willington.

A lively runaway took place Thursday Point. Two teams standing near the Cash market became frightened at the appearance of the car-sprinkler, and ran up street. The horses were stopped of Miss C. S. Hubbard, Hancock street. before much damage was done.

There are a good many people in New York to die, but 1,700 sudden deaths in the first three months of this year is a figure to startle. No, they do not, but Herpicide does, because it goes to the root of the evil and kills the germ that attacks the papilia from whence the hair gets its life.

Letters from prominent people every-where are daily proving that Newbro's Herpicide stands the "test of use." It is a delightful dressing, clear, pure and free from oil or grease.

August 20. A FUND OF \$1,000,000

Will Be Used by Chicago Employers to Fight Teamsters Chicago, April 28 .- With 3100 teams. ters on strike, with constant accessions to their number, and with the express determination of the Employers' association to take a firm stand for the "open shop" and to fight the Teamsters' union to the bitter end, Chicago to all appearances stands on the eve of one of the greatest industrial upheavals in

her history. There was rioting in various parts of the city yesterday, despite the strong guards of policemen and the numbers of private detectives hired by the Employers' association to protect their wagons. During the clashes three persons were seriously injured, two of whom probably will die.

The declaration made by members of the Employers' association that they would promptly discharge any teamster who refused to haul goods to or from Ward & Co, brought out the teamsters in many down town mercantile houses during the day. It is expected that the number will be in creased largely by tonight.

Subscriptions have been taken to strengthen the Employers' Teaming company, the weapon with which the Teamsters' union is to be fought, and President Morton of the company has \$1.000,000 at his disposal, and has ample assurances from business men that he can have as many times that amount as is necessary.

Old Equitable Employe Out New York, April 28.-H. H. Knowles

has been formally discharged from the Equitable Life Assurance society by President Alexander. Knowles was superintendent of agencies until a few weeks ago, when he was suspended by the president. His name was brought prominently in the Equitable contro versy when he gave out an interview criticising Alexander and Second Vice President Tarbell and subsequently made charges against the latter in the newspapers. He had been connected with the Equitable Life for 40 years.

Carnegie Will Give \$10,000,000 New York, April 28 .- A gift of \$10, 000,000 by Andrew Carnegie, to provide annuities for college professors who are not able to continue in active ervice, is announced. Professors in the United States, Canada and Newoundland will share in the distribution of the income of the fund. Fresh Fighting In Manchurla

London, April 28 .- The news of the resumption of fighting in Manchuria is supposed here to show that the Jap anese have now decided not to await the issue of the impending naval contest, but to utilize the few weeks intervening between the drying up of the thawed winter roads and the arrival of summer rains in June, for the resumption of the land campaign. No further news has been received of either Rojestvensky's or Nebogatoff's squad-

Preparing For Beavers' Trial

Washington, April 28.—George W. Beavers, former head of the division of salaries and allowances of the postoffice department, is expected to arrive in Washington next Tuesday, in accordance with the mandate of the United States supreme court. Morgan H. Beach, United States attorney for the District of Columbia, will have charge of the prosecution. He will endeavor to secure an early trial.

Moroccan Question Still Open Paris, April 28.—The Moroccan question is exciting renewed anxiety. The unfavorable turn is due rather to the threatening tone of some of the newspapers. An article in The Matin says: 'No matter what his power may be, the German emperor must renounce the hope of inflicting a check upon us, even to our self-respect. France is no longer isolated as in 1870. The isolation is now on the side of Germany."

Suit For Quarter of a Million New York, April 28.—Robert F. Cutting, head of the Citizens' union, has been served with papers in a suit for \$250,000 damages for defamation of character brought by Corporation Counsel Delaney, based upon the campaign address issued by the Citizens' union city committee of which Cutting is chairman.

Won't Be a Duel

St. Petersburg, April 28.-The Red Cross scandal caused M. Alexandrovsky to send seconds to Baron Tiesenhausen, his principal accuser. Tiesenhausen, however, has offered an explanation and the duel, which was fixed for today, will not occur.

Drouth Brought Misery Madrid, April 28.-Recent rains have only relieved the economic situation to a slight extent. The agricultural population of Seville, Cordova and Granada are clamoring for work or re-

lief for the destitution arising from the

drought.

TESTIMONY OF MRS SMITH

Says Her Accused Sister Expected to Marry Young and Secured Divorce With That Purpose In Mind

New York, April 28 .- While there were no features as sensational as when Hyman Stern, the pawnbroker, failed to identify J. Morgan Smith as the man to whom he sold the revolver which killed "Caesar" Young, the trial of Nan Patterson, charged with the shooting, was fully as interesting yesterday in the many points brought out.

Mrs. Margaret Young, widow of Caesar Young, was on the stand, and as she testified her eyes filled with tears. Nan Patterson dropped her eyes when she saw the widow and did not raise them again until recess. Josiah D. Millin, Young's partner, was another witness and told of the relations between Young and Nan Patterson, The prosecution endeavored to intro-

duce in evidence a letter purporting to show that Miss Patterson had other admirers at the time she professed to be devoted to Young. This letter, however, was not admitted as evidence. The letter that Mrs. J. M. Smith, sister of the defendant, wrote to Young, in which she said Miss Patterson was "frantic" and which was admitted at the previous trial, was also ruled out. As Recorder Goff gave his decision on this point the accused girl smiled. This ruling was considered a strong

point for the defense, as the conspiracy charge against the Smiths was based on the letter. Mrs. Smith was called to the stand and told of her visit to California in \$16 50 to \$200 00 the spring of 1903, where she saw her 12 50 to 500 00 sister and Young together. A year 12.00 to 150.00 later, when Mrs. Smith saw Miss Pat-17.50 to 200 00 terson in New York, she found her in a highly nervous condition. She was hysterical and crying, appeared to be in the background."

5.00 to 75.00 laboring under a nervous strain and 7.50 to 50.00 spoke quickly: "She was almost 7.00 to 200 00 frantic." Mrs. Smith told of Miss Pat-4.50 to 150.00 terson's expectation of marrying Young and said that Miss Patterson secured a divorce with such a purpose in mind. Mrs. Smith, answering questions, said her sister's name is now Anne

Eliza Randolph, when Mr. Levy, counsel for the defendant, remarked that Young was a morganatic relative. After Young's death, Mrs. Smith said she gave the law firm of Levy & Unger about 100 letters Young had written to her sister. On May 1, 1904, Leslie Coggins, a friend of Young, dined with Mrs. Smith at her house and told Mrs. Smith that Young was coming to New York. Coggins said Young was not going to marry Miss Patterson. When became "frantic and perturbed." Mrs. Smith continued: "She said that Caesar Young could not fool her that way. It was impossible for him to do

such a thing." Miss Patterson was in such a highly nervous state that another sister, Mrs. Milburn, formerly known on the stage as May Queen, came on with her from Washington and told Mrs. Smith that Miss Patterson was very unhappy. She did not know what Miss Patterson

'might do next." Mrs. Smith acknowledged writing the letter intercepted by Mrs. Young. The relations of Coggins with Miss Patterson were brought out when Mrs. Smith said: "He told me he wanted to marry

Nan." Young went to the hotel Navarre on the night of May 3, where Mrs. Smith and Miss Patterson were staying. Mrs. Smith left her sister alone with Young about an hour. When Mrs. Smith reappeared she said her sister was very happy and Young had denied what Coggins had said. Later Mrs. Smith went to live at the Hotel Imperial, where Young called on Miss Patterson.

Watkins, and are evidently connected with the financing of the National Electric company. The rest, \$192,000, represents unsecured loans, the largest one being an indebtedness of \$100,000 to the Broadhead estate, of which Bigelow was executor.

The assets of the banker are estimated at \$1,849,800, against which a homestead exemption of \$5000 is placed. The assets consist chiefly of stock in various industrial and other enterprises, life insurance and 1600 acres of coal land in Colorado valued at chief speaker at a banquet given in \$100,000. AN ODD EPITAPH.

George Ritter Likened Himself to Wornout Watch.

"Franklin's epitaph, where he compared himself to an old book, is known to all of us," said an antiquary. "Here is a copy of a less famous epitaph, the epitaph of a watchmaker, George Ritter, who compared himself to a watch that had run down."

The man took out his notebook. "George Ritter," he said, "lived in New Hampshire in the town of Newport. He died in 1822." Then he read:

"'Here lies, in horizontal position, the outside case of George Ritter, whose abiding place in that line was an honor to his profession. Integrity was his mainspring and prudence the regulator of all the actions of his life. Humane, generous and liberal, his hand never stopped till he had relieved distress. He never went wrong except when set a-going by people who did not know his key. Even then he was easily set right again. He had the art of dispensing of his time so well that his hours glided by in one continual round of pleasure and delight till an unlucky minute put an end to his existence. He departed this life Sept. 11, 1822. His case rests and molders and decays beneath the sod, but his good works will never die."-Philadelphia Bulletin.

Crass Ignorance.

An east side kindergartner was about to give her class a lesson, with "The Kitten" as the subject. She began by saying: "Our lesson this morning will be all about the kitten. Now, can any little boy or girl tell me which grows on the kitten, fur or feathers?"

Building For San Francisco. "Deming's toothpick" is what those who have seen the elevation call the tall, thin building which William H. Deming proposes to erect on the northwest corner of Grant avenue and Tillman alley, between Post and Sutter streets, in San Francisco. Its prospective owner accepts the designation with pleasure, for the structure will not be like anything else in San Francisco. The point to the toothpick is not only its height, but the additional and more wonderful fact that it will be only 30 by 25 feet in area, says the San Francisco Chronicle.

In still other respects the building will be peculiar. For instance, within this extremely limited space room wil be found for two elevators, a staircase and three offices on each of the fifteer floors above the store on the ground floor. Each of these stories will be exact replicas, and the offices on each will measure respectively 11.3 by 16.6, 10.6 by 11.6 and 10.3 by 11.3.

It goes without saying that one and all will have exterior light. Deming's toothpick will be of steel construction and fireproof, with its walls in Califor nia sandstone having a granite effect. All this will be done for \$75,000.

BLOW AT FOURTH OF JULY. To LET-A Nice Furnished Room with all conveniences on one of the host streets Chicago Professor Says Independence

Day Is Aug. 18. The Fourth of July is not really Independence day, according to Professor John Franklin Jameson, head of the history department of the University of Chicago, says a Chicago dispatch. By long research Professor Jameson says he has found that the declaration of the fathers was not signed on July 4.

"A big mistake has been made about the signing of the declaration," said Professor Jameson the other day. "It was decided on July 2 that a formal declaration would be drawn up, but it was not until forty-five days afterward that the document was actually drawn up and formulated. Our nation al day should come on the 18th of August. The declaration was passed around over the colonies to be signed."

Tiny Steam Engine.

John H. Cunningham, a jeweler of Eaton, Ind., has constructed what is believed to be the smallest engine in the world, says an Indianapolis dispatch. It stands on a five cent piece, and so small are some of its parts that a magnifying glass is necessary to distinguish them. It is run by steam and operates at a remarkable rate of speed. The screws that hold the parts together are made of needles, and the threads are so fine as to defy the naked eye. The boiler is made of a part of a hand bicycle pump. The striking boxes are packed with lint scraped from silk

Novelty In Fly Paper.

Preparations are being made in York, Pa., for the manufacture of an improvement in fly paper which, it is thought, will fill a long felt want, says the Chicago Post. In this the corners of the sheet are scored so that they may be interlocked, and in this manner a pan is formed which will prevent much of the mischief which the old much of the mischief which the old form of fly paper is largely famous for.

WEDNESDAY HALF HOLIDAY DURING the SUMMER MONTHS.

HE Saturday afternoon off has become an established custom in nearly all lines of trade, but an impossibility in the grocery and provision business. Nevertheless, we are convinced that those interested in the grocery and provision business should, and can, have an afternoon off on Wednesdays during the summer months without inconvenience to themselves or to the public. Therefore, we have decided to close our store at one o'clock Wednesdays during May, June, July and August, excepting those weeks having a legal holiday, and we ask the co-operation of the public in making this innovation a success. Funeral of Ex-Councilman.

The funeral of Alexander W. Thompson, for four years a member of the City Council, was held Friday afternoon from his late residence on Elm street. It was largely attended but of a simple nature. The services were conducted by Rev. Ellery C. Butler, pastor of the First church. The burial was in the Leo. Fiest family lot at Mt. Wollaston cemetery, beside a son and daughter. There was Selected a profusion of beautiful flowers, including a standing wreath nearly six feet Fred W. Hager high from the Newark associates of Mr Thompson, and other set pieces. Several business friends were present.

A SHORT WARNING

Death of General Fitzhugh Lee at Washington

A STROKE OF APOPLEXY

Left Side--Had Served In the United States and Confederate Armies and Filled Many Important Positions

Washington, April 29.—General Fitzhugh Lee of Virginia died at the Providence hospital in this city at 11:20 o'clock last night as the result of an attack of apoplexy and paralysis. At his bedside when he died were his brother, Daniel Dee, and Drs. Edie and their goods outside the fire zone. Kean. The end came quite suddenly and was without pain. The general was doing fairly well considering the severity of the attack until about 10 o'clock last night, when a change came for the worse.

General Lee was stricken early yesterday morning while on a train from Boston to Washington. Immediately on reaching Washington he was removed to the hospital, the gravity of the attack being such that the attending physicians concluded he could receive better attention there than at a private residence. The attack was followed by paralysis of the entire left side. General Lee was conscious those who were admitted to the sick | mother.

All the members of the general's family within reasonable distance of the capital will come to Washington immediately. Mrs. Lee, who has been visiting at Fort Oglethorpe, Ga., will be here tonight with her two daughters. The orders of Lieutenant George Lee, a son who was about to sail for the Philippines, has been changed, and he will come to Washington, accompanied by his sister, the wife of Lieutenant Brown, who is also now on the Pacific coast, under orders to sail with his regiment for the Philippines.

The news of General Lee's illness was a severe shock to his numerous friends in Washington, as was evidenced by the many inquiries made at the hospital throughout the day and evening. General Lee's attack is attributed largely to his activity in behalf of the military and naval review which is to be held in the vicinity of Jamestown, Va. His heart and soul were in the work and he labored zealously to make it a success.

Prior to the Civil war, at the beginning of which he resigned his commission in the United States army, General Lee saw considerable frontier Batteries-Robertaille and Peitz; duty in movements against the Indians. He was an expert cavalry officer and Pct on one occasion, June 16, 1860, he was engaged in a hand-to-hand encounter .600 with Comanche Indians near Camp Colorado, Tex. His services in the Confederate army as major general are well known, and during the interva .444 between this war and his active work .429 in the Spanish-American war, he filled a number of important positions, including the governorship of Virginia, the presidency of the Pittsburg and E Virginia railroad, the collectorship of internal revenue for the Lynchburg pany was to have been transported to 1 district and the consul generalship at

Eaton: | Havana. General Lee was honorably discharged from the volunteer army on 4 March 2, 1901, having been appointed 5 to the regular army Feb. 11, 1901, with Batteries-Carrick and Sullivan; the rank of brigadier general, with

> Arrangements for General Lee's funeral, together with the selection or the place of interment, will not be made until after the arrival in Washington of Mrs. Lee. It is possible that the body may be laid to rest at the national cemetery at Arlington, although it is expected that General Lee's friends may make an effort to have a site chosen elsewhere in Virginia, the state in which he lived so many years and with whose interests he was so strongly identified.

Chattanooga, April 29.-Mrs. Fitzhugh Lee and two daughters, Mrs. Rhea and Mrs. Brown, left here last night for Washington. The news of General Lee's death was not told them until the train reached Cleveland, 25 miles above this city. They will arrive in Washington Saturday night.

A Knight Who Fought For Lady's Smile

By ELIZABETH M'CRACKEN

Copyright, 1904, by Elizabeth McCracken

HE knight sat on a small folding to her room from the settlement kinchair, holding a lank yellow kitten in

patriarchal in experience and point of view, as his mother said, with a pride but feebly echoed by the long suffering college settlement family. "He be only twilve, sure; but, faith,

who'd be knowin' it? He be that forward." He was forward-prominently forward, distinctly forward, constantly

The name of the knight was Warren Flanagan, but he was commonly known as Warv, and one of the younger residents of the settlement once almost shattered the dignity of the institution by declaring that it was an excellent name for him because one had continually to be wary in dealing with him.

"He is the black sheep of the settlement," the head resident explained to the lady the day of her arrival, when she had asked, in that ignorance which ing boy with ragged clothes and searching blue eyes?" The head resident continued: "He teases the kindergarten children, fights with the other boys, is cruel to animals, torments the girlsand wears us to shadows. He is in two clubs, and when they meet-well, life becomes strenuous. We don't like to expel Wary. The settlement is for the benefit of just such boys. We try to help him, to refine him, to make him different, but he is the black sheep of the settlement."

"The black eye would be more apt a name," one of the residents murmured. "Wary always has one."

The head resident and the other members of the family smiled pityingly and indulgently when the newest, the youngest, resident-the lady-said, "Have you told him how unchivalrous all this is?" The lady had pale brown hair and dreamy blue gray eyes, and her name was Ellen-Ellen Douglas-but her own family, and within a week the settlement family also, called her Elaine.

"My dear," said the kindergartner, "we have told him how uneverything else it all is, but we never happened to remember chivalry when remembering Wary. The two don't combine. They would explode with surprise if they were brought within speaking distance of each other," she explained, with a fine disregard for mixed metaphors.

The lady was the newest and the youngest, but her blue gray eyes were not altogether dreamy, and she was of the clan of Douglas.

"Then, if you've tried everything else, I shall try chivalry," she said.

" 'If at first you don't succeed again," laughed the family. "Try anything you like," they said. "You won't Wary. He is invulnerable, like "Achilles had one vulnerable spot."

mused the new resident. "I shall first get acquainted with Wary and then try chiv-alry." She announced this double intention to the family. They again smiled

"Oh, you'll get acquainted with Wary soon enough," they said darkly. The new resident did. The day after her arrival, as she emerged from the house with a list of names, the owners of which she was commissioned to invite to the next mothers' meeting, she met Wary, in the act of ringing the doorbell. was torn and dusty, his brown feet were tanned and dusty, and his black eye was blacker than usual. He had, in fact, just completed a victory, and while waiting for other worlds to conquer he was improving the moment by ringing the settlement bell. The sudden appearance of Ellen's blue scarf, blue scarf, and both scarf and book line and floating blue scarf, did not overpower him. Wary was accustomed to such visions of delight known as "settlement ladies."

During the fortnight that immediately followed Wary reflected upon more than he imitated these knights. He wore Ellen's blue scarf; he read Ellen's book of knightly tales, and both scarf and book became rumpled and solled, and still did such visions of delight known as "settlement ladies."

"You bet!" said the knight. "It won't be so easy, though, 'cause w'en I sees a dog I jes' aches ter tie a can ter its tailbut I'd jes' as soon git along 'thout doin' it, if you find it so awful." The lady sat opposite in a low rocking the lady sat opposite in a low rocking chair, holding a lank vallow kitten in the curbstones were lined with older chilling a lank vallow kitten in the knight was young in years, but dren, chiefly boys. In the middle of the street stood, or, more accurately, danced and cavorted, Wary before two bedraggled cats, whose tails were tied together with an old red necktle. Ellen, for an outraged moment, stood rooted to the spot. Then, with her lips in a line that would have done credit to the Douglas to whose race and clan she loved to think she, Ellen Douglas, belonged, she ap-proached Wary. With one hand she selz-

ed him. "Untie that string!" she said.
"'Tain't no string." "Untie that string!" said Ellen Doug-las. And Wary untied the red necktie, which technically was a string.

One of the cats rushed furiously away but the other, a yellow kitten with green eyes, cowered up to Ellen. She took it in one arm. With the other hand she held Wary. "Come with me," she said. She expected Wary to resist, but he did not. He even opened a cheerful conversation.
"You'll git yourself all smutched up with that cat," he said sweetly, as they

entered the hall of the settlement. Ellen deigned no reply. She way up to her room. Ellen had but one chair. She did not offer her couch. She sent Wary down to the kindergarten room is bliss, "Who is that interesting looking boy with ragged clothes and searchimself in the kindergarten chair, and

"It was fun," Wary said. "My, how they yowled! "But, Wary, it was cruel. It couldn't be fun." "You ever tied two cats' tails together?"

Wary inquired.
Ellen's voice was inflexibly stern.
I never did," she said.

"Then how do you know it ain't fun?"
At a similar point the family usually
dismissed Wary, but Ellen did not. "Wary!" she said reproachfully.
Wary was unprepared by experience for
this. He wriggled, but he replied, "Women's got such upside down ways o' ar-

"I am not intending to argue with you Wary," Ellen said. "I only ask how you could be so cruel to those cats, and so thoughtless to people too? I hear that you are. Why are you, Wary?" She lifted her eyes and looked gently and steadily at the boy. "Why are you?"

Wary was but twelve, in spite of the fact that he was forward. He was having a new experience, and he found himself unprepared for its handling. He had frequently been rebuked; he had frequently been asked, "Wary, how could you?" but this questioner was the first to ask and then to expect and to desire a reply. The vulnerable spot of the child of the streets is acutely responsive if one can but touch it. This girl was unconsciously trying to understand Wary, and Wary happened to need to be understood more than he need-

ed to be made different. He had had so any monitors—and so few friends.
"Why do you, Wary?" Ellen persisted. Wary regarded her frankly. "Well, no-body cares wot I do—'less it bothers 'em, so I jes' do wot I thinks on an' have

"But, Wary, that doesn't excuse you. You ought to do right because - it is right," said Ellen, a trifle uncertainly.

'Don't people care wot you do?" "Yes," said Ellen. "Oh, yes. There are people who do so much—people who are fond of me."

"Yes," said Ellen. "Oh, yes. There are people who do so much—people who are fond of me."

"Did the knights git in much fightin'?"

Ellen was moved to a faint smile by the knight's question. "Not any more than was needed." she said. "And each knight wore—something belonging to the lady who was his—his best friend, to remind him to do things that would be good and kind. Now, Wary, I'll be your best friend, and you be my knight, and here's my scarf. You can wear it for a necktie, and it will remind you. Now, won't you? I'll lend you some stories about the other knights, so you can see how they did. Won't you? Just think how I shall enjoy having a knight!"

smiled, with the mischievousness still in his eyes. "I'll think bout it," he said guardedly, but he allowed Ellen to tie the scarf around under his torn collar.

The growth of New York city, both in territory and population, has been remarkable. In territory, more of the city is now above Central Park than below. It is only seven miles from the Battery to Central Park, but from the Battery to the city line at Yonkers is about sixteen miles. Bronx borough, above the Harlem river, has grown more rapidly than the boom cities of the west.

Drift of Opinion.

The New Englander has regard for the deeds of his ancestors. He has not forgotten, and he does not propose that future generations shall forget, the mighty accomplishments of the fathers. He has, it is true his Emerson, his Longfellow, his Whittier, to sing to all ages the poetry and the tragedy of dying colonial life, but he does not stop there. He puts up monuments and crumble and the tablets will decay, but as long as the New England spirit Ex-mayor Charles M. Bryant of Quin- lasts, untainted by the ribaldry of mod-

THEIR ANNIVERSARY

tainment and Dance.

The Loyal Ladies of Clan McGregor celebrated their 14th anniversary in Hancock hall Thursday evening with a concert, supper and dance, which was enjoyed by all.

The concert consisted of Scotch selections by McTear's orchestra, remarks of welcome by Mrs. Margaret Pierce the president, duets by Miss Gardner and Mr. Wigmore which were well rendered and received great applause. A comedy in one act followed entitled

That Rascal Pat." Pat McNoggerty was impersonated by Mr. Leslie Smith, who made a very funny and clever Irishman; Major Puffjacket, by Mr. Alex Rose whose interpretation of the crusty old uncle was well acted; Charles Livingstone, poor but ambitious, was well rendered by Mr. Harry Doull; Laura, neice to Puffjacket, and in love with Charles, by Miss Mamie Kennedy, who ooked bewitchingly pretty and took her part well; Nancy, Laura's maid, in love with Pat, by Miss May Rose, who was an ideal maid.

They all received very generous applause and the play seemed to be thoroughly enjoyed by all.

The next number on the program was supper, in which all present took their part well with no credit to themselves but with much credit to the committee which provided such sumptuous tables.

The hall was then cleared for dancing which was under the management of 82 Devonshire Street, Boston, Mass. Floor Directoress Effic O'Hara with Agnes Souter as assistant.

residents have found it to their advantage to open an ony Trust Company, even though they continue to carry accounts in their local bank.

Outside of Boston checks on a Boston bank or Trust Company are more acceptable than checks on a local bank, and greater privacy naturally must attend transactions made through a large bank in a large city. Another advantage is that the Trust Company allows 2% interest on daily balances of \$500 or more.

Every account, large or small, active or inactive receives the most careful attention. Checks may be cashed at either the Ames building or the Temple Place office, and arrangements may be made, if desired, that both husband and wife may draw checks against the same account.

The Temple Place office. in the shopping district, is especially useful to women. A pamphlet illustrating and describing it will be mailed upon request.

OLD COLONY TRUST COMPANY . BOSTON

Takes His Office at Meeting of Shipbuilders' Club.

Another successful concert was held by the Shipbuilders Club at Quincy Point on Thursday evening, Among those present were James Gibb the president, Peter Hynes the chairman, N. Fraser and W. Crawford jointsecretaries, John L. Denny, W. C. Allen, W. G. Coburn, J. C. Cogan, C. Krough and some sixty members.

Councilman Hynes in introducing Mr. Gibb, the newly-elected president, said that as Mr. Gibb was so well known to most of them he need say but little by way of introduction, but took that opportunity of congratulating the members upon securing such an able president as they had chosen, and he might also congratulate himself upon being supported by such an able and energetic committee and excecutive officers whose sporting instincts made them determined to make the best possible use of the new club premises so generously granted them by the Fore River Shipbuilding Company, Many innovations and attractions were meditated, and he intended to have a hand in each game, no matter which, if some genuine pleasure was to be gleaned from it.

Mr. Gibb upon taking the chair thanked the members for the honor accorded him in electing him as president, and said he anticipated a continuance of the prosperity and success which had already followed the club in all its doings. He had acted as custodian of the fund obtained from the public exhibition of the steamer "Providence," and he now had much pleasure in handing over to the treasurer the sum of two hundred and seventyfive dollars, which had been made after paying all expenses incidental to the exhibition, and he had no doubt the money would be spent advantageously in furnishing the new premises, which were ideal in every respect, offering as they do every facility for pool, bagatelle, cards, chess, bowling and shooting alleys, boating, bathing and quoiting as amusements, in addition to the necessary reading and writing rooms. A very useful part of the institution, the projected hot and cold water bath, should supply a great need and he looked forward with confidence to seeing the membership doubled within the next few weeks.

The following gentlemen contributed ably to an excellent program: Messrs. Neil J. Loftus, T. Campbell, H. Haswell, I. Hodge and Mr. Micott as vocalists. J. Brown as elocutionist, and Phil Pitts with selections on the

gramophone. Charles Pearson, the head of the R department generously furnished the refreshments, but was unfortunately prevented attending. The usual votes of thanks were given with acclamation.

The first poverty party in Braintree for several years was given in the Town hall last Tuesday evening and it was a credit to the committee in charge. About 300 people were present, mostly Braintree people and a good sum was netted. Judging from the appearance of those present it is safe to say that the citizens of Braintree are not poverty stricken. They are people who earn good wages, dress well and have spending money.

Counsel For Nan Patterson Will Submit No Defense

THE FINAL CONTENTIONS

Sister of Accused Woman Refuses to Turn State's Evidence Under Promise of Quashing of Conspiracy Indictments

New York, April 29.-After a day reboth the prosecution and the defense rested their case of Nan Patterson, the former actress, indicted for the alleged murder of Caesar Young, the wealthy bookmaker, almost a year ago.

The prosecution finished its case just prior to the adjournment of the court and later Attorney O'Reilly, of counsel for Miss Patterson, notified the prosecution that his side would submit no defense and would rest on the contention that the state had failed to long and 300 feet high in the waters | make out any case against the defendant. This plan had been under consideration for some days, but was only decided upon at a conference yesterday between counsel for the defense and Nan Patterson and her father.

The decision means the speedy conclusion of the young woman's third trial for the sensational tragedy on West Broadway. When the case is called Monday, to which date the trial was adjourned. Assistant District Attorney Rand will begin to sum up for the state.

The succession of events which marked yesterday's proceedings inof the prisoner's sister, Mrs. J. M. Smith, in which she stood for the most part on her right to refuse to answer questions on the ground that the answers might incriminate her; Mr. Rand's promise to quash the conspiracy indictments against Mrs. Smith if she would answer his questions, and the protest of the counsel of the defense to the court that Rand's merciless method of questioning was "badgering the witness" and the rejection again by the court of the much quoted letter of Mrs. Smith to Young expressing fear

Mr. Rand tried to bring out that she and her husband were in New York on June 8 last, when the prosecution was searching for them, but the witness declined to answer on the ground that it might incriminate or degrade her. Mr. Rand repeated his promise to quash the indictment if she would answer questions. The witness said several times she

would "stick" to her sister.

Mrs. Smith denied that Leslie C. Coggins had told her that the best thing Nan could do was to marry Matthew Trimble of Washington. Referring to the note sent by the witness to Young that unless he saw Nam she emotions at that time were caused by Coggins' misrepresenting Young's marriage intentions toward her. She said Nan refused to believe the story told by Coggins and was disappointed at the postponement of her marriage to Young. The witness said, however, that her sister had said nothing of her "future intentions" and was not responsible for the much quoted letter. The court again refused to admit in evidence this intercepted letter. Mr. Rand asked numerous questions tending to show the Smiths were fleeing from Stern during their disappearance from New York, but the witness declined to answer that they left any

MRS. JOHN A. LOGAN.

One of the Most Public Spirited Women of the Nation.

Mrs. John A. Logan of Washington, ex-president of the American Red Cross and always an active worker for the welfare of that great society, knows to the smallest Grand Army post commander.

Mary Simmerson Cunningham was only seventeen years old when in 1855 she became the bride of John A. Logan, then prosecuting attorney of Gallatin olete with interesting developments, county, Ill., and a hero of the Mexican war while yet in his teens.

While it has never been argued that General Logan was anything but a brave man, yet not many persons know that his wife deserved the greatest of credit for the record made by him.

Few women in this country displayed greater personal bravery during the civil war than she did, for it was her ambition that her handsome husband should become famous. Harmless Face Cream.

There is absolutely nothing in this cream to encourage a growth of hair even wher used every day for a lifetime. It not only makes the skin white and smooth, but refines it as well. It is best to use a bowl for cold cream making, a generous cooking bowl placed in a deep pan of water and drawn to the front of the stove. Into the bowl or whatever you use put a seant quarter ornce of white wax, two them. Cover closely and let stand five and a half ounces of spermaceti-also scant weight-and two and a half ounces of oil of sweet almonds. When could not answer for the consequences, the bowl and add one and a half ounces of rose water and a tiny pinch of borax, stirring briskly with a silver scent it sufficiently put in at the same give it the fragrance desired. The beator the whites of eggs and is a very necessary part of the operation. Is not this easy? Whatever you use to hold it should be warmed before the cream is put in. Use small receptacles, because the fingers are bound to leave streaks fight for adequate pockets in women's in the cream when you are treating the skin.

Girls of Medium Coloring,

For the vast army of girls of medium coloring the following hints are given: If hair is dark and eyes blue, in choosing a gown seek to match the eyes and contrast the hair. One rule in selecting color is to match the hair by day and the eyes by night. If the complexion is sallow, shades of red and brown franchises and vesting it in the board are good. If the hair is black and complexion swarthy, avoid black and all shades of mauve, green and violet; yellow, scarlet and pink are to be worn. If fair, with no trace of color, the complexion can be lightened by the addition of rose or yellow, glowing purple, dark blue and dark green. White and nile green is an ideal mixture for the New York, April 29.—R. G. Dun & complexions. A red head must beware wear of fair young girls with rose leaf Co.'s Weekly Review of Trade says of pink and scarlet; green is her color that business broadens in a whole- and white is her standby. pour the contents into a bottle (a quart size) of hot water and let stand until cold. The tar will cling to the bottom of the bottle. Do not shake, as you will get the full substance and strength of the tar without shaking. Just use the water from the tar. To use put a little into a small vessel and rub into the scalp of the head and in the hair with a brush-one a little larger than a toothbrush will do-while the hair is wet. Push it forward and press it with the fingers. The constant use of this is a sure recipe, it is said, for wavy hair, and it cannot be used too often. When the water is all used from the personally every national character of tar just replace hot water and conimportance from President Roosevelt tinue so for two or three months, and the tar will last for that length of time, if not longer.

Grace In Walking.

If you want to walk gracefully don't look at your feet, but hold your head well up in the air. Don't shuffle, A little thoughtfulness and practice in high stepping will soon break you of this ugly habit. Don't bend back at the waist under the impression that you are thereby walking erect. It throws the stomach forward and is almost as inimical to grace as round shoulders. Finally, don't allow yourself to walk "pigeontoed"-that is, with the toes turned in or straight. You can never be graceful in movement while you do. It is always hard to tell what to do with the hands. The natural way is not beautiful, but is sometimes obviated by carrying a par-

Marry Not Too Young.

An ancient writer gives this excellent advice on matrimony to those who contemplate it. It is so pithy, so all wise, that modern maids might well appreci

"Marry not too young. Let thy liking ripen before thy love, let thy love advise before you choose, and let thy choice be fixed before you marry. Re member that the whole happiness or unhappiness of thy life depends upon this one act. Remember nothing but death can dissolve this knot, and he that repents him of his own act either is or was a fool by confession."

Whisk Broom Holder.

A clever woman has put her knowl edge of basketry to good account in the fashioning of a whisk broom holder. This consists of two disks of basket work similar to those used for the bottom of a fancy basket and caught together at the sides by large, fluffy bows of three inch satin ribbon, the color be- 1356 Hancock St., Adams Building, Room 13 ing a delicate pink, in harmony with her room furnishings. A band of ribbon of narrow width, but matching in tone, is used to suspend the holder.

Getting Baby Into the Bath. A simple expedient for overcoming the fear of the bath which afflicts some nervous children is to cover the bath with a sheet and then lower the little one into the bath, sheet and all. As he does not see the bath, he does not realize what it is, and, coming gradually into the pleasantly warm water, he rather enjoys it, as a rule. In a very short time this precaution will be found unnecessary even with the most nervous of babies.

The Kitchen Sink.

Placing the sink in front of a window helps to make the routine work of washing pans and kettles less like drudgery, says a household magazine. To secure an architectural effect for the exterior of a house this pleasure of an outlook is often thoughtlessly taken away from the kitchen. The secret of making kitchen work enjoyable is to keep recurring duties at a minimum, relieving them by every possible labor saving device.

Coddled Eggs.

Coddled eggs are the perfection of boiled eggs and once eaten will always be preferred to the other. Have a deep cup or similar receptacle, heated by rinsing with very hot water. Put in the eggs and pour boiling water over minutes if the eggs are liked soft; longer if further cooking is desired.

The Simmerer.

Every kitchen should have at least one simmerer-that is, a saucepan with a double bottom, the lower one perfork till cool. If the rose water does not forated to admit air. There is a space of half an inch between this and the time enough perfume of any kind to upper bottom. Food cooked in a saucepan of this kind cannot burn, and it ing makes it light like whipped cream | may be kept at a gentle heat for hours.

Women's Pockets.

Some day a great reformer in whose aspirations sense is duly blended with enthusiasm will make and win a great street clothes. Why woman does not have more and better pockets in her clothes is one of the mysteries of civ-

Carving Cloths.

For carving cloths buy linen with a round thread twenty-seven inches wide and a yard long for each cloth. Draw the threads to allow a hem two and a half inches wide, hemstitch either in double or single hemstitch. They laundry well and always look neat.

If you cannot overcome the tendency to stoop, which will destroy the best natural figure, try walking about the house half an hour daily with some light article on the head.

Those who take cold easily after washing their head should rub a little eau de cologne or other spirit into the scalp after the hair is dried.

A lump of sugar placed in a teapot when put away after use will prevent it from becoming rusty.

Sir Mortimer Durand, the British mbassador, who sails today for Lonlon, is in full possession of President Roosevelt's views, which he will comnunicate in an informal way to King Edward. So far as the ambassadors at Washington can judge, King Edward and Emperor William are as auxus as President Roosevelt for an early nding of the war.

As an ally of one of the belligerents. Great Britain is prevented from taking the friendly initiative open to the president and Emperor William, but the necessity of the king's co-operaion as well as that of the French govrnment is readily recognized.

GOVERNMENT STEPS IN

Is Made a Party to the Labor Troubles at Chicago

Chicago, April 29 .- For the first time in Chicago since the strike of the American Railway union in 1894, the government of the United States has been made a party to labor troubles. The government was brought into the teamsters' strike by the issuance of an injunction by Judge Kohlsaat. The writ was asked in behalf of the Employers' Teaming association on the ground that the organization is incorporated under the laws of West "Virginia and is therefore under the protection of the federal court.

Copies of the injunction were printed on large cards and attached to every wagon of the Employers' Teaming association. The injunction exerted a pacifying influence and there was less rioting than on Thursday.

The express companies who have had the task of transferring money from the railway stations to the United States sub-treasury, fearing that the wagons might be attacked, informed the treasury department in Washington of the situation and the war department telegraphed to Colonel Duggan, acting commander of the department of the lakes, to use army wagons and a soldier guard if the express wagons and their usual guards could not be used.

Met Old Suitor, Collapsed and Died Rome, N. Y., April 29.-Coming suddenly on a former suitor, Bertha Meyers, 21 years old, fell unconscious to the sidewalk in the business part of the city last night. She died a few minutes later. Albert Phillips had just been released from jail here, where he had been sent in default of payment on a judgment for \$1500 secured in a suit brought by the young woman. Miss Meyers came suddenly upon Phillips as he turned a corner. As they met she collapsed.

Ran Out of Gasolene

Paris, April 29 .- The American autoboat Gregory is at Ponta del Gada, Azore islands, awaiting the arrival of a supply of gasolene. The Gregory was built by Lewis Nixon, and the voyage to Europe, begun at New York Jan. 5. was undertaken as the result of an offer of \$10,000 for the first motor boat to cross the Atlantic ocean under her own power. The Gregory is a steel boat 90 feet long, with 300 horse-power motors, and has a crew of nine men.

World's Greatest Battleship

London, April 29.-Arthur H. Lee, civil lord of the admiralty, says that the lessons of the Russo-Japanese war have necessifated changing the designs of projected British warships, and that new designs are nearly completed. The admiralty, he says, is preparing to begin the construction of the most powerful battleship the world has ever seen and to build it in the shortest time on record.

Grizziles Keep Under Cover

Glenwood Springs, Col., April 29 .-Details of the killing Tuesday of four bears by President Roosevelt's party have not arrived. The rumor that the president had been ill is unfounded. It has not been determined when the party will remove to its new camp. Brown bears have been found in plenty, but the grizzly and the silver-tip appear to be too wily for the hunters.

Death of Artist Talt

Yonkers, N. Y., April 29 .- Arthur F. Tait, one of the oldest and best known of American artists, died at his home here after an illness of three months. He was born in Liverpool in 1819. Tait spent much of his time in the Adirondacks painting the game there. One of his pieces, "Quail and Young," is in the Corocan galleries of art at Wash-

Check to Meningitis

New York, April 29.-There has been a considerable decrease in the number of deaths from cerebro spinal meningitis throughout Greater New York during the past week and with the approach of warm weather the epidemic will probably receive a decided check, if the disease is not almost wiped out.

Discharge of 3500 Men

Lodz. April 29.-The prospects of May day disorders have been increased by the indefinite suspension of operations by two factories. Workmen to the number of 3500 have been notified that they are permanently discharged and other workmen have been laid off for three months.

Twenty-Six Thousand to Strike

New York, April 29.—The rockmen and excavators in this city announce that on Monday 26,000 members of their organization will go on strike for shorter hours, increase of pay and recognition of the union.

To Recruit Six Thousand Men Washington, April 29.-Preparations are making at the navy department to send a recruiting party west to enlist 6000 men. The opportunities offered to see the world will be emphasized.

"Grievous and Inequitable"

New York, April 29 .- The board of governors of the Consolidated Stock Exchange have adopted a resolution declaring the stock transfer tax to be grievous and inequitable.

French Workman Renew Strike Limoges, April 29.-The strike has been renewed at the porcelain factories, including those of C. Haviland, and the movement is extending to other corporations.

Annie Oakley,

THE WORLD'S GREATEST LADY RIFLE SHOT USE 3 AND RECOMMENDS

Newbro's Herpicide

The ORIGINAL remedy that "kills the dandruff germ."

"Travelling as I do continuously, I have been troubled a great deal with dandruff and falling hair, and until I tried Herpicide I never found a remedy that was satisfactory.

Herpicide is a delightful preparation that fulfills the claims made for it, and no lady's toilet is complete without it. I highly recommend it to my friends."

(Signed) ANNIE OAKLEY. It is certainly significant that Miss Oakley, the celebrated

rifle shot and theatrical star, who has travelled so extensively abroad, should choose Newbro's Herpicide as the most efficactous toilet remedy for the scalp No one will doubt her opportunity to choose the best and those who have seen the natty and winsome Miss Oakley, will not doubt her power of discrimination in matters of this sort.

Newbro's Herpicide is a scientific germicide and prophylactic for the hair and scalp, it destroys the germ or microbe that causes dandruff, itching scalp and falling hair, after which the hair will grow as nature intended. Extraordinary results follow the use of Newbro's Herpicide.

If your hair is dull, brittle or lustreless, don't wait until it begins to fall, but save it with Newbro's Herpicide. In addition to its wonderful medicinal qualities, Newbro's Herpicide is the daintiest and most delightfully refreshing hair dressing available. The first application proves its goodness. Try it. Herpicide contains no grease, it will not stain nor dye.

EMPIRE THEATRE.

Everything new and nothing held over will be the rule at the Empire Theatre, Boston, for the week of May 1; and further than that, all the new teatures will be worthy of capitalization. An engagement of popular interest is that of Joe Welch, who without doubt stands today as the foremost delineator of Hebraic character on the American stage. A great drawing card at two cents a sheet or twenty cents a has been secured in Herbert Lloyd, "Jack of dozen, suitable for shelves in closets, all trades, master of none." Mr. Lloyd is one etc. of the cleverest, funniest burlesque comedians in existence. American by birth, he has in the past three years convulsed hundreds of audiences on the continent by his excruciatingly comic performances. Another feature will be Annie Abbott, "The Little Georgia Magnet," she who by some supernatural power is able to lift ten men, while no man or men can lift her. She has defeated the strongest man in the world in internationale chanteuse, fresh from her European successes, will show that she is the most dashing and versatile of singing comediennes; Stinson and Merton will contribute their extremely comic conversation and eccentric comedy.

CASTLE SQUARE THEATRE.
